

## Preface

Brno University of Technoly, Faculty of civil engineering, Department of building materials and Centre AdMaS organized already the 14th International Conference Silicate Binders 2015 that was held with international participation under the abreviation ICBM 2015. The scientifical and practical knowledges of civil engineering industrial binders and materials were presented on this conference. The most important topics on the conference were chemistry and technology of cement and other hydraulic and silicate binders, chemistry and technology of lime production and gypsum based binders. Special attention was paid to the use and behaviour of these mentioned binders in the various kind of building materials, like Concrete, inorganic insulations and in solidified sludges.

The newest knowledge and progresive trends in the field of binders and cement based materials were presented on this conference.
