

Preface

This is the proceedings of the selected papers presented at the International Conference on Materials Applications and Engineering (ICMAE2016) held in Qingdao, China, June 25-26, 2016, which was organized by Shandong University of science and technology.

The main objective of ICMAE2016 is to present the latest research and results of scientists related to materials applications and Engineering. It provided opportunities for the different areas delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find partners for future collaboration.

ICMAE is an important serial conference of Shandong University of science and technology. More than 35 participants attended the conference and the organizers received more than 50 technical papers. By recommendation of symposium organizers and after the peer-review process, the submitted papers were selected on the basis of originality, significance, and clarity for the purpose of the conference; finally, 21 paper are published in the present proceedings

All the organizing members will make ICMAE more and more professional and enjoyable academic research and discussion platform for attendees. Sincerely as always, we look forward to your consistent attention and support to the 2nd ICMAE in 2017.

The editors would like to give the thanks to the symposium chairs and all the paper reviewers, especially Trans Tech Publications Ltd. who worked so hard to provide the help for the younger conference.
