

Table of Contents

Preface, Committee

Chapter 1: Processing and Preparation of Alloys

| | |
|---|----|
| Microstructure Evolution and Macro Segregation of Directionally Solidified Hypoeutectic and Hypereutectic Lead-Tin Alloys K.V. Sreenivas Rao and N. Akhil | 3 |
| Modelling of Tensile Behaviour of NiTiInol SMA Wire by Finite Element Analysis S.H. Adarsh and V. Sampath | 8 |
| The Influence of γ/γ' Morphology on the Rafting and Stress Distribution of Nickel-Based Superalloys Loaded in [0 0 1] Direction X.M. Wang, M.Y. Cao, S.W. Li, Z.Y. Yu and Z.F. Yue | 14 |

Chapter 2: Design and Measurement of Thin Films

| | |
|---|----|
| Effect of Ge Thin Layer Position on Formation and Property of CZTSSe Thin Films and Solar Cells Prepared by Sputtering Method J.Z. Li, H.L. Shen, Y.F. Li and W. Wang | 23 |
| Effect of Temperature on the Microstructure and Electrical Conductivity of Microcrystalline Si Films H. Cheng, D. Wang and F.L. Li | 28 |
| Physico-Chemical Properties of CuO Thin Films Deposited by Spray Pyrolysis B. Boudjema, R. Daira, A. Kabir and R. Djebien | 33 |
| Measurement of Nonlinear Properties for PEI Tetra Sulfonated Indium Phthalocyanine Compounds Self-Assembly Film Using Improved Tophat Z-Scan Technique Q. Chang | 37 |

Chapter 3: Analysis Properties of Composites

| | |
|---|----|
| Thin-Walled Composite and Plastic Shells for Civil and Industrial Buildings and Erections S.N. Krivoshapko, S.L. Shambina and C.A.B. Hyeng | 45 |
| A Possible Correlation Investigation between Young's Modulus and Thermal Properties of Green Composites M. Chikhi, B. Agoudjil and F. Mokhtari | 52 |
| The Low Velocity Impact Properties of Pandanus Fiber Composites H.T.N. Kuan, M.C. Lee, A.A. Khan and M. Sawawi | 56 |
| A New Approach of Shear Connectors to Delay Debonding of CFRP Laminates Used for Shear Strengthening of RC Beams A.S.A. Jabbar, M.A. Alam and K.N. Mustapha | 61 |

Chapter 4: Surface Engineering

| | |
|--|----|
| Preliminary Study of the Effect Microwave-Heating on the Morphology and Surface Area of NaX Zeolite H.I. Umam, A.H. Aimon and F. Iskandar | 69 |
| FTIR and UV-Visible Absorbance Studies of Hydrothermally Grown ZnO Coated with Polyvinylpyrrolidone V.C. Agulto, I.J. Agulo and R.V. Sarmago | 73 |
| Study the Effect of Coating Thickness from Silica Nanocomposite Deposited on Poly(Methyl Methacrylate) Sheets via Spray Coating Technique T. Jirathampradhab, S. Lhosupasirirat, P. Kumnorakaw, T. Akhadejdamrong, P. Rojanapitayakorn and T. Srihirin | 79 |

Chapter 5: Materials Processing Technologies

Modeling of Interface Heat Flux and Thermal Field of Mold Materials during Gravity Die Casting

K.V. Sreenivas Rao, P. Usha, S. Sanman and R. Anilchoudary

85

Effect of Sulfur on the Formation of the Graphite Degradation in Ductile Iron

S. Boonmee and N. Mai-Ngam

89

Study by Numerical Simulation of the Deep Drawing Parameters-Material during the Wheelbarrow Forming

F. Hamza, O. Boussaid and K. Tadjine

94
