

# Table of Contents

## Preface, Committees

## Chapter 1: Performance Test and Analysis of Building Materials

<b>Revised Penetration Method Based on Evaluate High Temperature Property of SBS Modified Asphalt</b> S. Han, P. Sun, Y.M. Liu and W. Li	3
<b>Non-Destructive Tests as Durability Indicators in Cement Mortars with Pozzolanic Substitutions</b> R. Ruiz Ruiz, E.M. Alonso Guzmán, W. Martínez Molina, H.L. Chávez García and J.A. Velázquez Perez	9
<b>Quality Evaluation System for Description of Recycled Concrete Aggregates and Verification of its Functionality</b> I. Nováková and I. Hájková	14
<b>Preliminary Numerical Analysis of a Masonry Panel Reinforced with Pultruded GFRP Profiles</b> C. Casalegno, S. Russo and F. Sciarretta	20
<b>Steel and PVA Fibres Reinforced UHPC Exposed to High Temperatures - Analysis of Residual Properties</b> J. Fořt, D. Čítek, M. Pavlíková, J. Pokorný, M. Záleská, Z. Pavlík and R. Černý	26
<b>Experimental Study on the Structural Performance of Beam-Column Joints in Old Buildings without Designed Shear Reinforcement under Earthquake</b> C.T. Dang and N.H. Dinh	33
<b>The Impact of Electrochemical Chloride Extraction on Reinforced Bond</b> K. Zhang, W. Shan and W.B. Sun	41
<b>Bank Material Study for the Restoration of Historical Monuments in Michoacán, Mexico</b> M.A. Navarrete Seras, H.L. Chávez García, W. Martínez Molina, E.M. Alonso Guzmán and M. Arreola Sánchez	47

## Chapter 2: Preparation and Characterization of Building Materials

<b>Utilization of Waste Plastics in Stone Mastic Asphalt for Infrastructural Applications</b> S.F. Wong, A.A. Htwe, S.H. Oh, T.Y. Leo, J. Cheng and B.K. Tay	55
<b>Effective Porosity Comparison with a Lime Mortar Matrix Base during 350 to 700 Days</b> J.A. Velázquez Perez, W. Martínez Molina, H.L. Chávez García, E.M. Alonso Guzmán and R. Ruiz Ruiz	60
<b>The Study of Oil Palm Shell (OPS) Lightweight Concrete Using Superplasticizer, Silica Fume, and Fly Ash</b> E. Tjahjono, A.M. Fani, D.D. Dodi, E.P. Purnamasari, F.A. Silaban and E. Arijoeni	65
<b>The Carbonation of Cement-Based Materials with Different Aggregate Content</b> Q.Z. Shen and G.H. Pan	74
<b>Characterizations of Newly Fabricated Composite Materials Based on Organoclay Incorporated Polymeric Matrix</b> B. Lal, Attaullah, S.A. Arain, S. Haleem and S. Kumar	79
<b>Ash Substitution Effect in Brick Fabrication in Induration Time and Mechanical Resistance in Mortars Portland Cement Base</b> M. Arreola Sánchez, E.M. Alonso Guzmán, H.L. Chávez García, W. Martínez Molina and M.A. Navarrete Seras	83
