

Preface

Brno University of Technology, Faculty of Civil Engineering, Department of Building Materials organized already the 15th Conference Binders 2016 that was held with international participation under the name "ICBM – International Conference Binders and Materials" and that were presented both scientific and practical knowledge of the civil engineering industry binders and materials. The most important topics presented on the conference were chemistry and technology of cement and other hydraulic binders, chemistry and technology of lime and gypsum. One section was focused on organic binders like epoxides etc. and the last one contains topics about concrete and application of binders in practice.

The newest knowledge and progressive trends in the field of binders and building materials have been presented in the conference.
