

## Preface

It is our great pleasure to introduce the Proceedings of the Material Science and Chemistry Symposium, one of the symposia in the Fourth International Conference on Science and Technology (the 4<sup>th</sup> ICST 2018) that was held in Eastparc Hotel Yogyakarta, Indonesia on 7–8 August 2018. The conference had seven symposia that are (1) Computer and Information Technology, (2) Environmental and Earth Science, (3) Electronics, Communication, Control, and Instrumentation, (4) Material Science and Chemistry, (5) Mechanical and Industrial Engineering, (6) Power and Energy, and (7) Remote Sensing and Geomatics.

This volume of proceedings from the symposium provides an opportunity for readers to connect with a selection of refereed papers that were presented during the 4<sup>th</sup> ICST 2018 conference. Divided into 4 chapters, the papers published here pick up on the multiple dimensions of the properties of materials. The symposium on Material Science and Chemistry alone received 76 contributing papers, most of them made to the full-length article.

We thank all the members of the conference committee and reviewers for advice given to the successful conference and for efforts to improve the quality of papers selected for conference program and volume for publication. We do hope that the proceedings will contribute well to the advance of chemistry, mainly in the field of material science. Also, we are looking forward to welcoming the contributing authors to the Fifth International Conference on Science and Technology, which is going to be run in August 2019.
