

Preface

The 3rd International Conference on Materials Sciences and Nanomaterials (ICMSN 2019) and 2019 3rd International Conference on Advanced Manufacturing and Materials (ICAMM 2019) was successfully held. The vibrant academic atmosphere at the conference promoted exchanges of scientific and technological ideas among the participants and disseminated recent developments in the field of materials sciences, nanomaterials, advanced manufacturing and materials.

ICMSN 2019 and ICAMM 2019 provided a platform for researchers, engineers and academics to further develop materials sciences, nanomaterials, advanced manufacturing and materials. A number of distinguished professors were invited to deliver keynote speeches relating to the latest developments and trends in their respective fields. More than 40 presentations were made in two parallel sessions covering a wide spectrum of research topics. It was a golden opportunity for the researchers, engineers and students to interact with the experts and specialists for their advice. All the participants enjoyed the active academic atmosphere of these two conferences.

The conference proceeding includes a selection of papers submitted to the conference from various universities, research institutes and industries. All papers were selected based on the quality and relevance to the conference.

We would like to thank all the authors who have contributed to this volume and also to the organizing committee members, reviewers, speakers, chairpersons, sponsors and all the participants for their support to ICMSN 2019 and ICAMM 2019.
