

# FOREWORD

We do our best to increase the quality, scientific novelty and the engineering significance of published materials that, in the first place, will be very useful for young researchers.

Journal "Nano Hybrids" (NH) is a peer-reviewed journal which publishes research and review articles on hybrid nanomaterials such as inorganic-organic, inorganic-inorganic and organic-organic. NH cover a wide range of engineering and scientific decisions from field of development of nanocomposites and application of nanohybrid materials in different areas of human activities.

Publishing results of basic research which have, or may have in the future, practical value, as well as engineering solutions and ideas in the field of technical and technological progress is the main goal of our journal.

Dear Readers, we hope that our journal will be useful into your scientific activity.

We are very grateful to all the reviewers for their invaluable assistance in the preparation of the 9th volume of the journal "Nano Hybrids".

Dr. Stanislav Kolisnychenko,
