

Table of Contents

Fabrication and Characterization of E-Glass Fiber Reinforced Unsaturated Polyester Resin Based Composite Materials M.N. Islam, H. Ar-Rashid, F. Islam, N. Karmaker, F.A. Koly, J. Mahmud, K.N. Keya and R.A. Khan	1
Comparison of some Fresh and Hardened Properties of Self-Consolidating Concrete Composites Containing Rubber and Steel Fibers Recovered from Waste Tires H. Bensaci, B. Menadi and S. Kenai	8
Removed: Effect of Aggregate of Electric Arc Furnace Slag on Durability of Reinforced Concrete Structures in Chloride Environment (Part I) F. Faleschini, M.A. Zanini, M.A.F. Ruíz and C. Pellegrino	14
Removed: Effect of Aggregate of Electric Arc Furnace Slag on Durability of Reinforced Concrete Structures in Chloride Environment (Part II) F. Faleschini, M.A. Zanini, M.A.F. Ruíz and C. Pellegrino	21
Development of Nano Modified Eco-Friendly Green Binders for Sustainable Construction Applications H. Shoukry	25
Advancements in Properties of Cements Containing Pulverised Fly Ash and Nanomaterials by Blending and Ultrasonication Method (Review- Part II) M.S. Kirgiz	37
