

Table of Contents

Controlling of Grain Boundary Structure and Interface Structure of Advanced Materials and their Joints M. Naka	3
Control of Texture in Intermetallic Compounds by Thermomechanical Processing Y. Umakoshi, H.Y. Yasuda and T. Sakata	9
On the Liquidus Surface and Reaction Scheme of the Ternary System Cu-Si-Ti A. Berbecaru, M. Naka and J.C. Schuster	15
Interface Development in Joining Yttria Stabilized Zirconia to Stainless Steel by In Situ Alloying with Ni/Ti Filler Metals J.E. Indacochea, J. Beres and A. Polar	19
Interfaces in Joints and Composites Composed of Hard Materials and Metals W. Tillmann, M. Gathen and A.M. Osmanda	25
Hard α-$\text{Si}_3\text{N}_4/\text{MeN}_x$ Nanocomposite Coatings with High Thermal Stability and High Oxidation Resistance J. Musil and P. Zeman	31
Development of Telerobotic System for Remote Welding Operations in Unstructured Environment L. Wu, H.C. Li, H.M. Gao and G.J. Zhang	37
Distribution of Zn and Interfacial Microstructure of Braze-Welding CMT Joints between Aluminium and Galvanized Steel Sheets J.C. Feng, P. He and H. Hackl	43
Reverse Monte Carlo Modeling of Atomic Configuration for Amorphous Materials T. Fukunaga, K. Itoh, K. Mori and M. Sugiyama	51
Hybrid Simulations for Desining of Nano-Interfacial Structures S. Ogata and T. Kouno	57
On the Fracture Mechanics Theory Called $(\text{MN-r}_p\text{-}\sigma_\theta)$ R. El-Sheikhy and M. Naka	63
Experimental Determination fo Ga Activity in Liquid Ga-Sb-Tl Alloys by EMF Method I. Katayama, Y. Sendai, D. Zivkovic, D. Manasijević, Z. Zivkovic and H. Yamashita	71
Reaction Diffusion in Diffusion Couples Ni-Al SolidSolution/Intermetallic NiAl and Ni/Intermetallic NiAl T. Yamane, K. Katayama, Y. Minamino and H. Araki	77
Effects of a Small Amount of Ta on Diffusion Behavior of Carbon in Molybdenum Y. Hiraoka and T. Inoue	83
Characterization of $(\alpha+\beta)/\beta$ Transformation in a TC11 Titanium Alloy L. Geng, B. Xu, Y.T. Li, A.B. Li and G.S. Wang	91
Hydrogen Permeation in V-Nb Alloys O. Yoshinari, M. Yamada and N. Iwata	97
Transmission Electron Microscopy Observations on Cu-Mg Alloy Systems K.I. Nishikawa, S. Semboshi and T.J. Konno	103
Oxidation Behavior of SiC/TiAl Composite Material K. Hashimoto, Y. Fujino and T. Kuramata	109
Reaction of Sn to Nanocrystalline Surface Layer of Cu by Near Surface Severe Plastic Deformation Y. Minamino, Y. Koizumi, N. Tsuji, Y. Nakamizo, T. Shibayanagi and M. Naka	115
Interfacial Residual Stresses in Semiconductor Devices Measured on the Nano-Scale by Cathodoluminescence Piezospectroscopy G. Pezzotti	123
Direct Synthesis of Isolated L1_0-FePtCu Nanoparticles by RF-Magnetron Sputtering H.W. Ryu, K. Sato and Y. Hirotsu	129
TEM Studies on Phase Stability in Nanometer-Sized Alloy Particles J.G. Lee and H. Mori	135
Electron Dose Rate Dependence of Phase Separation Induced by Electronic Excitation in GaSb Nanoparticles H. Yasuda, A. Tanaka, H. Usui, H. Mori and J.G. Lee	141

Temperature Dependence of Internal Stress and Crystal Growth of Dilute Cu Alloy Films Y. Koike, T. Inase and S. Takayama	147
In Situ Synthesis of Hybrid-Reinforced Titanium Matrix Composites D. Zhang, Z.F. Yang, W.J. Lu and D. Xu	155
Development of Multi-Phase Intermetallic Alloy Composed of Ni₃X-Type Structures T. Takasugi and Y. Kaneno	161
Collaborative Sintering of the Amorphous Alloy and Ceramic Powders for Nanocrystalline Composite Materials H. Kimura, K. Hongo and M. Naka	167
Fabrication and Wettability Test of Silicon Nitrides with Ordered Protrusions N. Kondo, H. Hyuga, K. Yoshida and H. Kita	173
Preparation of Tungsten Carbide/Stainless Steel Functionally Graded Materials by Pulsed Current Sintering Y. Kawakami, F. Tamai, T. Enjoji, K. Takashima and M. Otsu	179
Advanced CFRM Joint Device for Mover Engineering Y. Nishi and K. Tanaka	185
Development of Freeform Fabrication of Metals by Three Diminsional Micro-Welding T. Horii, M. Ishikawa, S. Kirihara, Y. Miyamoto and N. Yamanaka	189
Phase Change of Zr-Al-N and Nb-Al-N Films Prepared by Magnetron Sputtering Method Y. Makino, K. Saito, Y. Murakami and K. Asami	195
Rust Layers Formed on Weathering Steels by Long-Term Atmospheric Exposure to Industrial and Coastal Environments K. Asami and M. Kikuchi	203
Characterization and Dissolution Behavior in a Physiological Solution of Heat-Treated CaTiO₃ Thin Films with Different Thicknesses N. Ohtsu, K. Saito, K. Asami, T. Hanawa and H. Kimura	209
Oxidation Behavior of Mo-Si-B In Situ Composites A. Yamauchi, K. Yoshimi, Y. Murakami, K. Kurokawa and S. Hanada	215
Electrical Property of TiO₂ Thin Film Deposited by RF Sputtering K. Niizuma, T. Hayakawa and Y. Utsushikawa	221
Classification of Oxidation Behavior of Disilicides K. Kurokawa and A. Yamauchi	227
Corrosion Behavior of Pre-Treated Fe-Al Alloys in Aqueous Acid Solutions N. Masahashi, G. Kimura, M. Oku and S. Hanada	233
Development of Large Area Plasma Reactor Using Multiple Low-Inductance Antenna Modules for Flat Panel Display Processing Y. Setsuhara, K. Takenaka, A. Ebe and K. Nishisaka	239
Wear Properties of DLC and Plasma Sprayed WC Structure Coating M. Yatsuzuka, Y. Oka, A. Tomita, N. Murata and M. Hirota	245
Preparation and Characterization of Hard (Ti,B)N Films by Ion Mixing and Vapor Deposition M. Yamashita, S. Hanaki, D. Iwasaki and H. Uchida	251
Numerical Simulation of the Stress Field of Thick 7B04 Aluminum Alloy Board during Continuous Manufacture Procedure H.Y. Fang and C.I. Fan	259
Microstructure and Properties of Brazing Joint between YG8 Cemented Carbide and A3 Steel J. Zhang, L.Y. Lin, J.C. Xu and X.Q. Liu	265
Bonding Strength of W-Cu Joint by PECS Method Y. Fukuzawa, S. Nagasawa and S. Takaoka	271
Room Temperature Micro-Bonding of Fine Wires to Foils Y. Takahashi, M. Maeda, T. Doki and S. Matsusaka	277
Evaluation of Compound Layer Formed by Impact Welding Using Phase Transformation Technique H. Date and M. Naka	283
Pulsed Electric Current Bonding of Tungsten to Copper with Intermediate Layer A. Nishimoto and K. Akamatsu	289

Laser-Arc Hybrid Welding S. Katayama, Y. Naito, S. Uchiumi and M. Mizutani	295
Theoretical Approaches to Erosion and Wetting Phenomena during Laser Brazing Process K. Saida, W.H. Song and K. Nishimoto	301
Prediction of Laser Fusion Zone Profile of Lotus-Type Porous Metals by 3D Heat Transfer Analysis T. Tsumura, F.X. Ye, T. Murakami, H. Nakajima and K. Nakata	307
Study on Improvement of Oxide Layer and Properties of Plasma Sprayed Alumina in Thermal Barrier Coatings A. Kobayashi, G. Shanmugavelayutham and S. Yano	313
Spraying Using Electromagnetically Accelerated Plasma H. Tahara, N. Yoshimura and Y. Koshiro	319
Adhesion Behavior of WC Coating Deposited on Titanium Alloy by Electrospark Deposition P. He, Y. Qian, Z.L. Chang and R.J. Wang	325
Laser Cladding of Fe-Cu Based Alloys on Aluminum K. Uenishi, Y. Ogata, S. Iwatani, A. Adachi, T. Sato and K.F. Kobayashi	331
Control of Microstructure by Laser Spot Heating T. Shibayanagi, M. Tsukamoto, N. Matsuda, Y. Soga, N. Abe and M. Naka	337
Resistance Welding by Inserting Wires between Joint Interfaces T. Terajima and T. Kuroda	343
