Preface

Multi-Fingered Haptic Interface Robot and its Application Systems

H. Kawasaki 1

Rotor Crack Detection Using Active Magnetic Bearings

J.T. Sawicki 9

Analysis of Robustness of Vibration Control System for a Magnetically Supported Shaft

A. Mystkowski and Z. Gosiewski 16

Uncertainty Modeling in Robust Control of Active Magnetic Suspension

A. Mystkowski and Z. Gosiewski 22

Fluoride Release from Composite Materials for Dental Fillings

J. Mystkowska 27

The Influence of Selected Powder Fillers on the Tribological Properties of Composite Materials for Dental Fillings

J. Mystkowska and J.R. Dąbrowski 33

Analytic Description of Impulse Response Signals

A. Kotowski 39

The Method of Complex Worthiness Assessment of an Engineering Object in the Process of its Use and Service

P. Lindstedt 45

Modeling of Magnetic Attraction Force of Electromagnetic Module in a Relative Base – Air-Gap – Absolute Base System

T. Huścio and K. Falkowski 53

Modeling of Beam as Control Plane for a Vibration Control System

Z. Gosiewski and A.P. Koszewnik 59

Control of Slewing Motion of a Crane Model Taking into Account Non-Linearities in Drive System

J. Janusz, J. Kłosiński and L. Majewski 65

Assessment of Dynamical Properties of Die Hammer MPM 10000 B Considering Deformations of Working Material

L. Majewski and A. Trąbka 71

Control of Operational Motions of a Mobile Crane under a Threat of Loss of Stability

J. Kłosiński and J. Janusz 77

Weak Interactions between Objects Used as New Diagnostic Signals in the Detection of Pipeline Leakages

P. Ostapkowicz 83

Test Stand for Analysis of Fatigue Crack Propagation under Bending with Torsion

G. Gasiak and G. Robak 90

Analysis of Timings in Networks that Use TCP/IP or UDP/IP Protocols for Communication with Industrial Controllers in Mechatronic Systems

K. Pucher and D. Polok 94

Constitutive Models of Vascular Tissue

K. Mirota 100

Application of Modern E-Learning Techniques in the Vocational Training in Automation and Robotics

Z. Pilat, M. Słowikowski and J. Zieliński 106

Wavelet Analysis of Barkhausen Noise in Reconstructing Distributions of Residual Stress

C. Kownacki 112

Diagnostics of Scoring in Gears

K. Mirota, J. Tomaszewski and J. Rysiński 118

Modeling of Magnetoelastic Materials for Force and Torque Sensors

R. Szewczyk, J. Salach and A. Bieńkowski 124

Modeling of Moment of Friction under Increasing Load Using Artificial Neural Networks

K. Gocman, B. Gienza and T. Kałdoński 130

Calculation Spectral Characteristics of Magnetic Field of the Linear Induction Motor at the Braking Modes B. Karaliūnas and E. Matkevicius	136
The Formation and Growth Behavior of Aluminium Boride Crystals in an Al–B Alloy R. Kayıkcı, O. Kurtulus and R. Gürbüz	140
A Model for Estimation of Mould Thermal Fatigue Life in Permanent Mould Casting R. Kayıkcı, M. Durat, E. Nart and I. Ozsert	145
Optimum Rapidity Ensuring and Power Resource Saving Two-Coordinate Positioning System G. Blažiūnas and V. Geleževičius	151
Method of Dynamic Parameters Measurement of High-Speed DAC's V. Kvedaras, R. Kvedaras and T. Ustinavičius	157
PBG Fiber Low Concentration Gas Sensor J. Pawłat, X.F. Li, T. Matsuo, T. Sugiyama and T. Ueda	163
The Operation of the Linear Induction Motor by Changing the Position of the Inductors between each other L. Radzevicius and E. Matkevicius	169
Mechatronics Approach for Desk-Top CNC Milling Machine Design R. Gürbüz	175
Control of a Symmetrical Dual-Drive Gantry System Using Energetic Macroscopic Representation X. Kestelyn, J. Gomand, A. Bouscayrol and P.J. Barre	181
Pendulum-Generator as New Energy Source G. Korouji, R. Hanitsch and B. Hübner	186
Enhancing the Accuracy of MRI-Compatible Robots with an Optical Tracking System P. Junttila, K. Nevala and P. Kroneld	191
Shape Control of a FRP Airfoil Structure Using SMA-Actuators and Optical Fiber Sensors P. Ruotsalainen, P. Kroneld, K. Nevala, T. Brander, T. Lindroos and M. Sippola	196
Control of Mobile Crane by Means of Fuzzy Logic Controller T. Pędrak and J. Kłosiński	202
Managing Changes in Product Configurations L. Burneika	208
Transition Test Patterns Generation for BIST Implemented in ASIC and FPGA V. Abraitis and Ž. Tamoševičius	214
Vibration Control of Oscillating System Based on Governing Visco-Elastic Characteristics of Absorber by Means of External Electric Signal V.A. Bilyk, E.V. Korobko, G.N. Reizina, E.A. Bashtovaya, E.B. Kaberdina and V.A. Kuzmin	220
Infrared Reflective Coatings for Window Glazing J. Mohelníková	226
Determination of Factors Affecting Safety Stress in Machine Design by Using Artificial Intelligence Technologies D. Karayel, S.S. Ozkan and F. Vatansever	232
Modeling of Trainer's Electric Drive Control L. Brazdeikis and D. Rėklaitienė	238
"Magnetoactivated" Elastomer: An Alternative to Electroactive Polymer Y. Razouk, E. Duhayon and B. Nogarede	244
Design of Dynamic Nonlinear Control Techniques for Flexible-Link Manipulators V. Gavriloiu, V. Yurkevich and K. Khorasani	250
Investigation of Alloy Elements Transfer in Arc Facing by High Carbon and Chromium Content Electrodes V. Varnauskas, A.V. Valiulis and V. Rudzinskas	257
The Characterization of WC-Co Based Materials Boronized within Molten Salt Bath S. Köksal	261
Structure and Properties Enhancement in High-Speed Steels upon Primary Solidification of a Melt A.S. Chaus	267
The Differential Passive Magnetic Bearing for High-Speed Flexible Rotor Z. Gosiewski and K. Falkowski	273

Examination of Selective Transfer Phenomenon	
A. Kotnarowski	279
Effect of Nanofillers on Wear Resistance of Polymer Coatings	
D. Kotnarowska	285
