

Table of Contents

I. Industrial Robots

- A Low-Cost Hexa Platform for Efficient Force Control Systems Using Industrial Manipulators**
R. Osypiuk and T. Kröger

1

- Hardware Structure of a Control Section of Manipulation Mechanism for Acoustical Measurement in Anechoic Chamber**

J. Mężyk, T. Kamisiński, A. Zbrowski and A. Flach

7

- Structure Synthesis and Mechanical Parameters Choice for a Manipulating Mechanism for Acoustical Measurements in Anechoic Chamber**

J. Felis, A. Zbrowski, T. Giesko and J. Mężyk

13

II. Microrobotics

- Novel Type of Hybrid 3-DOF Micromanipulator with Piezoelectric Actuators – Mechanical Construction and Simulations**

D. Prusak and T. Uhl

19

- Web-Based Synthesis of Robot Structures for Micro and Nano Manipulations**

D. Chakarov, K. Kostadinov, D. Gotseva and T. Tiankov

25

III. Mobile Robots

- Control Algorithm for Four-Wheeled Robot Motionfor Monit oring Problems**

M.P. Mukhina

31

- Control Algorithms for the Mobile Robot “MAX” on a Task of Line Following Provided by Intelligent Image Processing**

D. Kaliiukhovich, V. Golovko and A. Paczynski

35

- Control System for an All-Terrain Mobile Robot**

P. Ziemniak, D. Uciński and A. Paczynski

43

- Design of In-Pipe Modular Robotic Systems**

M.O. Tătar and D. Mândru

49

- GPS Based Navigation of an Autonomous Mobile Vehicle**

H. Loose, M. Zasepa, P. Pierzchala and R. Ritter

55

- Mechatronics Engineering on the Example of a Multipurpose Mobile Robot**

M. Stania and R. Stetter

61

- Selected Problems of Navigation of Educational Mobile Robot**

A. Grano, M. Dąbkowski, P. Niklas and G. Redlarski

67

- Swarm-Based Approach to Path Planning Using Honey-Bees Mating Algorithm and ART Neural Network**

P. Ćurković, B. Jerbić and T. Stipančić

74

- The Behaviour Based Area Coverage of Unknown Environment by Autonomous Mobile Robot Using Modified "The Way of the Ox" Algorithm**

M. Dąbkowski, A. Grano, P. Niklas and G. Redlarski

80

IV. Teleoperation, Telerobotics, Teleoperated Semi-Autonomous System

- Intelligent Live Environment Design with Assistive Robots for Vulnerable Persons**

V. Stoian, M. Nitulescu and C. Pana

86

- Localization of Mobile Robot Using Radio Waves**

J. Nowacki, M. Dąbkowski, P. Niklas and G. Redlarski

95

V. Sensors and Actuators in Mechatronics

- Agent-Component Design of Smart Appliances**

L. Ostaseviciute and E. Kazanavicius

101

Analysis of Polar Positioning System in Laser Device for Glass Engraving	107
R. Trochimczuk and M. Gawrysiak	
Case Study of Microelectrostatic Motor	113
V. Bagdonas and V. Ostasevicius	
Design of Observer for Direct Current Drive	119
A. Petrovas, R. Rinkeviciene and S. Lisauskas	
Field Determination and Calculation of Stiffness Parameters in an Active Magnetic Bearing (AMB)	125
B. Tomczuk and J. Zimon	
High-Precision Gas Sensor Based on Photonic Bandgap Fiber Cell	131
J. Pawłat, X.F. Li, T. Sugiyama, T. Matsuo, Y. Zimin and T. Ueda	
Integrated Diagnostics of the Rotating System with an Active Magnetic Bearing	137
M. Gizelska, D. Kozanecka and Z. Kozanecki	
Introductory Analysis of the Bearingless Induction Motor	143
Z. Gosiewski, K. Falkowski and M. Zokowski	
Model of Vector Controlled Induction Drive	149
R. Rinkeviciene and A. Petrovas	
Modelling of Magnetic Fields with the Finite Element Method in Machine Diagnostic Systems	155
J. Łagodziński	
The Pulse Power Amplifier for the Magnetic Bearing	161
S. Jarlrzykowski, M. Brański and K. Falkowski	
Three Phase AC-Line Converter for the Flywheel Energy Storage System	167
A. Penczek, A. Mondzik and T. Siostrzonek	
Tubular Linear Actuator as a Part of Mechatronic System	173
B. Tomczuk and A. Waindok	

VI. Control of Mechatronic Systems

A Fuzzy-Logic Based Tuning for a Velocity Controller of the DC Servo Drive	179
P. Dworak and K. Pietrusiewicz	
Automatic Gear Shift Unit	185
J. Jantos, K. Prażnowski and J. Mamala	
Comparison the Accuracy of the Extrapolation Methods of the Time Phase Coincidence in Synchronization of Power Generating Units	191
P. Niklas, A. Grano, M. Dąbkowski, G. Redlarski and M. Śliwiński	
Control Efficiency Analysis of Linear Oscillating Mechatronic Device	197
A. Senulis, E. Guseinovienė, V. Cirtautas, V. Jankūnas and L. Urmonienė	
Controller Design for a Rubbing Rotor	203
L. Ginzinger, R. Zander and H. Ulbrich	
Dependency of the Quality of the Active Vibration Damping on the Sensor and Actuator Location – Simulation and Experiment	215
J. Kovářová, M. Schlegel and J. Dupal	
Dependent versus Independent Variable Formulation for the Dynamics and Control of Cranes	221
W. Blajer and K. Kołodziejczyk	
Flight Simulator as a Tool for Flight Control System Synthesis and Handling Qualities Research	231
T. Rogalski, A. Tomczyk and G. Kopecki	
Fuzzy Logic Controller for Position Actuator SMA	237
J. Kwaśniewski and I. Dominik	
Human-Robot Interaction Controller Based on CMOS Stereo Vision and FPGA Chip	243
S.J. Huang and C.Y. Wu	
Hybrid Supervisory Control for Biomechatronic Systems for Non-Invasive Surgery	251
S. Chauhan, Swandito and G.G.L. Seet	
Identification of the Inertia of Masses Flowing Water through the Pipes in Water Power Plants	258
G. Redlarski, A. Grano, M. Dąbkowski, P. Niklas and M. Śliwiński	

LuGre Friction Model Estimation of a Precision Table and Sliding Mode Control Design	264
S.J. Huang, C.M. Chiu and M.C. Huang	
Mechatronic System Design Applied to Double Inverted Pendulum with Flywheel Actuator	272
L. Bláha and M. Schlegel	
Model-Based Control of SMA Actuators with a Recurrent Neural Network in the Shape Control of an Airfoil	278
J. Ahola, T. Makkonen, K. Nevala, T. Lindroos and P. Isto	
Multilevel Intelligent Control of Mechatronical Technological Systems	284
E.V. Remisov	
Permanent Magnet Chatter Absorber with Fuzzy Logic Control	290
B. Broel-Plater, S. Domek and A. Parus	
Simulation of Hydrodynamics Processes of Hydraulic Braking System of Vehicle	296
M. Bogdevicius, J. Janutienė and O. Vladimirov	
The Robust Control of Magnetic Suspension with Rapidly Changing of Rotor Speed	302
A. Mystkowski and Z. Gosiewski	

VII. Analysis of Vibration and Deformation

Diagnostics Modeling of Vertical Rotor Vibration	308
V. Barzdaitis, V. Žemaitis, R. Didžiokas and P. Mažeika	
Finite Element Modeling and Simulation of Squeezed-Film Effects in a Vibrating MEMS Structure	314
R. Dauksevicius, V. Ostasevicius and R. Gaidys	
Frequency Domain Identification of the Active Beam Model for the Vibration Control System	320
Z. Gosiewski and A.P. Koszewnik	
Identification of Discrete Mass-Stiffness Models for Dynamic Analysis of Rotors	326
A. Muszyńska and D.I.G. Jones	
Low-Cycle Fatigue Simulation and Life-Time Prediction of High Stressed Structures	333
J.M. Temis, K.K. Azmetov and V.M. Zuzina	
Multibody and Electromechanical Modelling in Dynamic Balancing of Mechanisms for Mechanical and Electromechanical Systems	339
K. Lipiński	
Random Vibrations of Constructions and their Damping	345
D. Gužas and A. Čiučelis	
Semi-Active Suspension Laboratory System	350
P. Gorczyca, K. Kołek, R. Rosół and A. Turnau	
Simulation of the Dynamic Behaviors of the C Axis Drive by the Turning Center	356
J. Křepela and V. Singule	
Some Problems of a Diagnosis of Turbine Engine Bearings Using FAM-C Method	362
A. Gębura and T. Tokarski	
Study of Free Vibration of Ladder Frames Reinforced with Plate	368
G. Aryassov and A. Petritshenko	
System Analysis of Automatic Balancing (Self-Balancing) Machine Rotors with Liquid Working Bodies	374
V. Royzman, A. Bubulis and I. Drach	
The Effect of Controlled Frequency and Amplitude of Vibration on Friction	380
J. Abdo and A. Al-Yhmadi	

VIII. Optimization, Optimal Design

A Computer Program Design for Optimization of a Cylindrical Traverse Grinding Operations	387
A.H. Marcinkevičius	
AMB Construction Optimization Tool	393
A. Piłat	
An FPGA Implementation of the Robust Controller for the Active Magnetic Bearing System	399
Z. Kulesza and Z. Gosiewski	

Design and Analysis of Elliptic Rotor Suspended in Active Magnetic Bearing	410
A. Piłat	
Energy Storage System	416
T. Siostrzonek and S. Piróg	
Modeling of the Hydraulic Machine Unit with Nonholonomic Constraints	421
S. Karpowicz and F. Siemieniako	
Optimal Design of Vibration Power Generator for Low Frequency	426
Z. Hadas, V. Singule and C. Ondruszek	
Optimal Synthesis Method for Invention of New Mechatronic Systems in Vibrotechnics	432
E. Lavendelis and J. Viba	
Selection of Coils Parameters in Magnetic Launchers	438
Z. Gosiewski and M. Kondratiuk	
Selection of a Constitutive Model Used for Prediction of Behaviour of Ring Material Expanded by Pulse Electromagnetic Field	444
R. Panowicz and J. Janiszewski	
Stability of Jeffcott Rotor Operating in Tilting 3-Pad Journal Bearings with Turbulent Oil Film	450
S. Strzelecki and S.M. Ghoneam	
Static Model of a Rail Launcher	456
Z. Gosiewski and P. Kłoskowski	
Synthesis of Vibrator with Air or Water Flow Excitation	462
J. Viba, L. Shtals, A. Vilkajs and E. Kovals	
The “Screwdriver” Technology of the Model Building for Simulating of the Processes in the Mechatronic Objects	468
O.V. Uzunov	
Use of Electromagnetic Impulse System for Transportation of Dry Materials and Solid Bodies	474
V. Mironov, J. Viba and L. Shtals	
Vehicle Electro-Mechanical Brake System: A Mechatronic Application	480
N. Akkus, F. Yücel and E. Toptas	

IX. Integrated Diagnostics

Fault Identifiability Problem – The Multi-Valued Diagnostic Model Approach	486
H. Borowczyk	
Improving the Efficiency of Diagnosing of Leaks from Liquid Transmission Pipelines by Using the New Diagnostic Information – The Signals of Weak Interactions between Objects	492
P. Ostapkowicz	
Possibilities of Assessment of the Control Potential of Aircraft Engines	498
P. Lindstedt	
Presentations in FAM-C And FDM-A Methods and Some Problems of a Signals Theory	504
A. Gębura and W. Markiewicz	

X. Failure Analysis

Energy Based Characterization of Fatigue Behaviour of Cyclically Unstable Materials	512
E. Macha, J. Slowik and R. Pawliczek	
Mobile Robot Diagnosis with Bayesian Filters	518
M. Zajac, D. Uciński and R. Stetter	
Operating Degradations of Air Turbine Scoops of Turbo-Engines	524
A. Szczepankowski, J. Szymczak and J. Spychała	
Turbine Engine Health/Maintenance Status Monitoring with Use of Phase-Discrete Method of Blade Vibration Monitoring	530
M. Witoś and R. Szczepanik	

XI. Tribology in Mechatronic Systems

Load Carrying Capacity of Microbearings with Parabolic Journal	542
K. Wierzcholski and A. Miszczak	

Methodological Aspects of Evaluating Tribological Properties of Ball Bearings M. Jałbrzykowski and J. Nachimowicz	548
Research of Tribological Properties of Mineral Motor Oil with Cholesteryl Stearate Additive V. Mokshin and V. Vekteris	552
Selective Transfer Phenomenon in Copper-Steel Tribological Systems A. Kotnarowski	558

XII. Analysis of Signals

A Comparative Study of Different Neighborhood Topologies in WTM Kohonen Self-Organizing Maps M. Kolasa, R. Długosz and J. Pauk	564
A Model-Less Method for Added Mass Identification G. Suwała and Ł. Jankowski	570
Analysis of Dynamic Method of Line Scales Detection A. Barakauskas, A. Kasparaitis, S. Kausinis and R. Lazdinės	576
Application of Optical Flow and Methods of Group Lee Representation in Problems of Detecting of Movements and Pattern Detection on the Images V.P. Makarychev	582
Data Mining in Analysis of Biomechanical Signals M. Derlatka and J. Pauk	588
Decomposition of Non-Stationary Signals Based on the Cochlea Function Principle D. Dusek	594
Human Gait Analysis and Classification Based on Neural Networks and Fuzzy Logic J. Pauk, M. Derlatka, R. Długosz and M. Kolasa	600
Parametric Description of Vibration Using the Autocorrelation Function A. Kotowski	606
Synthesis of a Sequential Model of Muscles of a Man during Drop Landing on a Hard Platform M.A. Książek, D. Ziemiański and L. Nosiadek	612
Vibration Data Analysis in Presence of Distorting Pulses O.S. Antropov, V.F. Borulko, V.M. Dolgov, O.O. Drobakhin and S.M. Vovk	621

XIII. Measurement Techniques

A Fiber-Optic Bending Sensor for the Vibration Monitoring of CNC Face-Milling Machine İ. Gücüyener and E. Emel	627
Contour Representation by Clustering Curvatures of the 3D Objects A. Lipnickas and V. Raudonis	633
Control of a Micro-Droplet for Laser-Induced Breakdown Spectroscopy Solution Measurement S. Ikezawa, M. Wakamatsu, J. Pawłat and T. Ueda	639
Development of Electromagnetic Ring Expansion Apparatus for High-Strain-Rate Test J. Janiszewski and W. Pichola	645
Electrical Measurements and Analyses with Data Acquisition Devices (DAS) of Heating and Cooling Capacities of the Intercity Coaches Ö. Yılmaz, R. Erçetin, T. Çetin Akıncı and S. Ersoy	651
Embedded Tensile Strength Test Machine FM1000 – An Upgrade of Measurement and Control J. Živčák, M. Petrík, R. Hudák, T. Tóth, D. Knezo and E. Kovalova	657
Experimental and Analytical Investigations of the Dynamic Analysis of Adhesively Bonded Joints for Composite Structures S.M. Ghoneam, A.A. Hamada and M.I. El-Elamy	663
Hardware and Software Integration of Mechatronic Systems for an Example Measurement Path for Temperature Sensors J. Świdler and M.P. Hetmańczyk	676
Line Scale Calibration in Non-Ideal Measurement Situation S. Kausinis, A. Kasparaitis, A. Barakauskas, R. Barauskas, A. Jakstas and A. Kilikevičius	682

Microtopography Model of Rough Surface	686
M. Kumermanis and J. Rudzitis	
Precision Measurement of the Carriage Vibrations at the Different Speeds	690
A. Kiliukevičius, V. Vekteris and A. Kasparaitis	
Radio Frequency Measurement and Control Network for a Cable Equipped with the Magnetorheological Damper	696
M. Rosół	
Real Time Measuring of the Pressure Drops against Changing the Fluid Velocity on the Critical Points of the Fluid System	702
R. Gürbüz	
Reverse Engineering Approach for Object with Free-Form Surfaces Using Standard Surface-Solid Parametric CAD System	706
A. Łukaszewicz and K. Miatliuk	
Rowing Force and its Simulation on Training Facility	712
V. Grigas, A. Domeika, A. Legha, D. Satkunskiene and R.T. Toločka	
Study of the Effect of Process Induced Uncertainties on the Performance of a Micro-Comb Resonator	716
I. Codreanu, A. Martowicz, A. Gallina, Ł. Pieczonka and T. Uhl	

XIV. Multifunctional and Smart Materials

Analysis of Time Response of Shape Memory Alloy Actuators Modular System	726
D. Mândru, I. Lungu, S. Noveanu and M.O. Tătar	
Mechanical Properties of G17CrMoV5 – 10 Cast Steel after Regenerative Heat Treatment	732
G. Golański	
Stability of a-C:N:H Layers Deposited by RF Plasma Enhanced CVD	738
S. Jonas, K. Kyzioł, J. Lis and K. Tkacz-Śmiech	
The Effect of High Temperature on the Degradation of Heat-Resistant and High-Temperature Alloys	744
J. Błachnio	

XV. Metallic Alloys

An Investigation on the Solid State Reduction of Chromite Concentrate	752
A. Atasoy and F.R. Sale	
Dynamic Chip Breaker Design for Nickel-Base, Inconel 718, Alloy with Coated Carbide Tools Using Negative Angle Tool Holder	758
Ş. Karabulut and A. Güllü	
Influence of Aluminium Content on Behaviour of Magnesium Cast Alloys in Bentonite Sand Mould	764
L.A. Dobrzański and T. Tański	
Investigation of Influence of Rhenium Addition on W-Ni-Fe-Re Heavy Alloys Properties	770
T. Majewski, J. Michałowski and J. Piętiszewski	

XVI. Biomaterials

Bone Ingrowth Processes on Porous Metalic Implants	776
J. Sidun and J.R. Dąbrowski	
Effect of TiN Coating on Functional Properties of Implant Titanium Alloy	782
M. Grądzka-Dahlke, A. Bukrym and E. Choińska	
Investigations of Mixed and Submandibular/Sublingual Saliva	788
E. Andrysewicz, J.R. Dąbrowski and G. Leonow	
The Problems of Exploitation Reliability Estimation of Dental Prosthetics Elements	794
M. Jałbrzykowski and E. Kovalova	

XVII. Functional Composites

Fluoride Release and Antibacterial Activity of Self-Made Composite Materials for Dental Fillings	801
J. Mystkowska, G. Marczuk-Kolada, K. Leszczyńska, J.R. Dąbrowski and J. Karaś	

Mechanical and Physicochemical Properties of Tetric EvoCeram® - Dental Composite Material	807
J. Mystkowska	
The Effect of the Ceramic Dispersion on the Nickel Matrix Composite Coating Properties after Plastic Working	813
T.C. Dyl, R. Skoblik and R. Starosta	
 XVIII. Adaptive Materials	
An Investigation of an Electromagnetic Induction Device for a Small-Scale MR Damper	819
B. Sapiński	
Influence of Ageing on Mechanical Properties of Epoxy Coatings	825
D. Kotnarowska and M. Wojtyniak	
Modeling of an Adaptive Beam with MR Fluid	831
B. Sapiński and J. Snamina	
Neural Network – Backstepping Control for Vibration Reduction in a Magnetorheological Suspension System	839
M. Zapateiro, N.S. Luo and H.R. Harimi	
Study on the RE₂O₃-Mo Secondary Electron Emitters	845
W. Liu, J.S. Wang, F. Gao, N. Li, H.Y. Li, M.L. Zhou and T.Y. Zuo	
Visible-Light Induced Photocatalytic Activity of Vanadium and Nitrogen Co-Doped SrTiO₃	851
J.S. Wang, H. Li, H.Y. Li, S. Yin and T. Sato	
Vitreous Enamel Coating on Steel Substrates	856
K. Hrabovská, J. Podjuklová, K. Barčová, L. Dobrovodská and K. Pelikánová	
 XIX. Piezoelectric Materials	
Active Control of a Beam for Generating Points of Zero Displacements and Zero Slopes	861
Q. Mao and S. Pietrzko	
Damping of Mechanical Vibrations Using Piezoelements, Including Influence of Connection Layer's Properties on the Dynamic Characteristic	869
A. Buchacz and M. Płaczek	
Feasibility Investigation of a Static Force Measurement with Longitudinal Piezoelectric Resonant Sensor	876
C. Viguier, C. Nadal and J.F. Rouchon	
Reduction of Structural Sound Radiation and Vibration Using Shunt Piezoelectric Materials	882
S. Pietrzko and Q. Mao	
 XX. Ceramics and Glasses	
Model Studies of Microstructure Changes in Sintering of Ceramics	890
S. Jonas, A. Koleżyński, J. Lis, P. Stoch and K. Tkacz-Śmiech	
Sinterability of Silicon Nitride Powder Produced by the CRN Process	896
A. Atasoy and M. Tümer	
Sintering of Y-SiAlON Ceramic	902
A. Atasoy and A. Ersoy	
 XXI. New Trends in Mechatronic and Material Science Education	
Role of the Machine Design Courses in the Mechatronic Faculty	908
M. Banaś and J. Stryczek	
Selection of PDM Information System	912
J. Maxa and V. Neděla	
 XXII. New Curricula Concerning Mechatronic Systems and Material Science	
A Model for “Work Integrated Learning” in Mechatronic Education	918
İ. Güçüyener, A. Kus and R. Arslan	

XXIII. Teaching Materials and Laboratory Facilities

Modelling of Solid Part Using Multibody Techniques in Parametric CAD Systems

A. Łukaszewicz

924

Virtual Simulation of Mechatronics Laboratory

T.R. Lubczyński and A. Baier

930

The Digital System of the Position Measurement

K. Dzierżek

936
