

Table of Contents

I. Industrial Robots

A Low-Cost Hexa Platform for Efficient Force Control Systems Using Industrial Manipulators

R. Osypiuk and T. Kröger 1

Hardware Structure of a Control Section of Manipulation Mechanism for Acoustical Measurement in Anechoic Chamber

J. Mężyk, T. Kamisiński, A. Zbrowski and A. Flach 7

Structure Synthesis and Mechanical Parameters Choice for a Manipulating Mechanism for Acoustical Measurements in Anechoic Chamber

J. Felis, A. Zbrowski, T. Giesko and J. Mężyk 13

II. Microrobotics

Novel Type of Hybrid 3-DOF Micromanipulator with Piezoelectric Actuators – Mechanical Construction and Simulations

D. Prusak and T. Uhl 19

Web-Based Synthesis of Robot Structures for Micro and Nano Manipulations

D. Chakarov, K. Kostadinov, D. Gotseva and T. Tiankov 25

III. Mobile Robots

Control Algorithm for Four-Wheeled Robot Motion for Monitoring Problems

M.P. Mukhina 31

Control Algorithms for the Mobile Robot “MAX” on a Task of Line Following Provided by Intelligent Image Processing

D. Kaliukhovich, V. Golovko and A. Paczynski 35

Control System for an All-Terrain Mobile Robot

P. Ziemniak, D. Uciński and A. Paczynski 43

Design of In-Pipe Modular Robotic Systems

M.O. Tătar and D. Măndru 49

GPS Based Navigation of an Autonomous Mobile Vehicle

H. Loose, M. Zasepa, P. Pierzchala and R. Ritter 55

Mechatronics Engineering on the Example of a Multipurpose Mobile Robot

M. Stania and R. Stetter 61

Selected Problems of Navigation of Educational Mobile Robot

A. Grono, M. Dąbkowski, P. Niklas and G. Redlarski 67

Swarm-Based Approach to Path Planning Using Honey-Bees Mating Algorithm and ART Neural Network

P. Čurković, B. Jerbić and T. Stipančić 74

The Behaviour Based Area Coverage of Unknown Environment by Autonomous Mobile Robot Using Modified "The Way of the Ox" Algorithm

M. Dąbkowski, A. Grono, P. Niklas and G. Redlarski 80

IV. Teleoperation, Telerobotics, Teleoperated Semi-Autonomous System

Intelligent Live Environment Design with Assistive Robots for Vulnerable Persons

V. Stoian, M. Nitulescu and C. Pana 86

Localization of Mobile Robot Using Radio Waves

J. Nowacki, M. Dąbkowski, P. Niklas and G. Redlarski 95

V. Sensors and Actuators in Mechatronics

Agent-Component Design of Smart Appliances

L. Ostaseviciute and E. Kazanavicius 101

Analysis of Polar Positioning System in Laser Device for Glass Engraving R. Trochimczuk and M. Gawrysiak	107
Case Study of Microelectrostatic Motor V. Bagdonas and V. Ostasevicius	113
Design of Observer for Direct Current Drive A. Petrovas, R. Rinkeviciene and S. Lisauskas	119
Field Determination and Calculation of Stiffness Parameters in an Active Magnetic Bearing (AMB) B. Tomczuk and J. Zimon	125
High-Precision Gas Sensor Based on Photonic Bandgap Fiber Cell J. Pawlat, X.F. Li, T. Sugiyama, T. Matsuo, Y. Zimin and T. Ueda	131
Integrated Diagnostics of the Rotating System with an Active Magnetic Bearing M. Gizelska, D. Kozanecka and Z. Kozanecki	137
Introductory Analysis of the Bearingless Induction Motor Z. Gosiewski, K. Falkowski and M. Zokowski	143
Model of Vector Controlled Induction Drive R. Rinkeviciene and A. Petrovas	149
Modelling of Magnetic Fields with the Finite Element Method in Machine Diagnostic Systems J. Łagodziński	155
The Pulse Power Amplifier for the Magnetic Bearing S. Jalbrzykowski, M. Brański and K. Falkowski	161
Three Phase AC-Line Converter for the Flywheel Energy Storage System A. Penczek, A. Mondzik and T. Siostrzonek	167
Tubular Linear Actuator as a Part of Mechatronic System B. Tomczuk and A. Waindok	173

VI. Control of Mechatronic Systems

A Fuzzy-Logic Based Tuning for a Velocity Controller of the DC Servo Drive P. Dworak and K. Pietrusewicz	179
Automatic Gear Shift Unit J. Jantos, K. Prażnowski and J. Mamala	185
Comparison the Accuracy of the Extrapolation Methods of the Time Phase Coincidence in Synchronization of Power Generating Units P. Niklas, A. Grono, M. Dąbkowski, G. Redlarski and M. Śliwiński	191
Control Efficiency Analysis of Linear Oscillating Mechatronic Device A. Senulis, E. Guseinovienė, V. Cirtautas, V. Jankūnas and L. Urmonienė	197
Controller Design for a Rubbing Rotor L. Ginzinger, R. Zander and H. Ulbrich	203
Dependency of the Quality of the Active Vibration Damping on the Sensor and Actuator Location – Simulation and Experiment J. Kovářová, M. Schlegel and J. Dupal	215
Dependent versus Independent Variable Formulation for the Dynamics and Control of Cranes W. Blajer and K. Kołodziejczyk	221
Flight Simulator as a Tool for Flight Control System Synthesis and Handling Qualities Research T. Rogalski, A. Tomczyk and G. Kopecki	231
Fuzzy Logic Controller for Position Actuator SMA J. Kwaśniewski and I. Dominik	237
Human-Robot Interaction Controller Based on CMOS Stereo Vision and FPGA Chip S.J. Huang and C.Y. Wu	243
Hybrid Supervisory Control for Biomechatronic Systems for Non-Invasive Surgery S. Chauhan, Swandito and G.G.L. Seet	251
Identification of the Inertia of Masses Flowing Water through the Pipes in Water Power Plants G. Redlarski, A. Grono, M. Dąbkowski, P. Niklas and M. Śliwiński	258

LuGre Friction Model Estimation of a Precision Table and Sliding Mode Control Design S.J. Huang, C.M. Chiu and M.C. Huang	264
Mechatronic System Design Applied to Double Inverted Pendulum with Flywheel Actuator L. Bláha and M. Schlegel	272
Model-Based Control of SMA Actuators with a Recurrent Neural Network in the Shape Control of an Airfoil J. Ahola, T. Makkonen, K. Nevala, T. Lindroos and P. Isto	278
Multilevel Intelligent Control of Mechatronical Technological Systems E.V. Remisov	284
Permanent Magnet Chatter Absorber with Fuzzy Logic Control B. Broel-Plater, S. Domek and A. Parus	290
Simulation of Hydrodynamics Processes of Hydraulic Braking System of Vehicle M. Bogdevicius, J. Janutėnienė and O. Vladimirov	296
The Robust Control of Magnetic Suspension with Rapidly Changing of Rotor Speed A. Mystkowski and Z. Gosiewski	302

VII. Analysis of Vibration and Deformation

Diagnostics Modeling of Vertical Rotor Vibration V. Barzdaitis, V. Žemaitis, R. Didžiokas and P. Mažeika	308
Finite Element Modeling and Simulation of Squeezed-Film Effects in a Vibrating MEMS Structure R. Dauksevicius, V. Ostasevicius and R. Gaidys	314
Frequency Domain Identification of the Active Beam Model for the Vibration Control System Z. Gosiewski and A.P. Koszewnik	320
Identification of Discrete Mass-Stiffness Models for Dynamic Analysis of Rotors A. Muszyńska and D.I.G. Jones	326
Low-Cycle Fatigue Simulation and Life-Time Prediction of High Stressed Structures J.M. Temis, K.K. Azmetov and V.M. Zuzina	333
Multibody and Electromechanical Modelling in Dynamic Balancing of Mechanisms for Mechanical and Electromechanical Systems K. Lipiński	339
Random Vibrations of Constructions and their Damping D. Gužas and A. Čiučelis	345
Semi-Active Suspension Laboratory System P. Gorczyca, K. Kołek, R. Rosół and A. Turnau	350
Simulation of the Dynamic Behaviors of the C Axis Drive by the Turning Center J. Křepela and V. Singule	356
Some Problems of a Diagnosis of Turbine Engine Bearings Using FAM-C Method A. Gębura and T. Tokarski	362
Study of Free Vibration of Ladder Frames Reinforced with Plate G. Aryassov and A. Petritshenko	368
System Analysis of Automatic Balancing (Self-Balancing) Machine Rotors with Liquid Working Bodies V. Royzman, A. Bubulis and I. Drach	374
The Effect of Controlled Frequency and Amplitude of Vibration on Friction J. Abdo and A. Al-Yhmedi	380

VIII. Optimization, Optimal Design

A Computer Program Design for Optimization of a Cylindrical Traverse Grinding Operations A.H. Marcinkevičius	387
AMB Construction Optimization Tool A. Piłat	393
An FPGA Implementation of the Robust Controller for the Active Magnetic Bearing System Z. Kulesza and Z. Gosiewski	399

Design and Analysis of Elliptic Rotor Suspended in Active Magnetic Bearing A. Piłat	410
Energy Storage System T. Siostrzonek and S. Piróg	416
Modeling of the Hydraulic Machine Unit with Nonholonomic Constraints S. Karpowicz and F. Siemieniako	421
Optimal Design of Vibration Power Generator for Low Frequency Z. Hadas, V. Singule and C. Ondrusek	426
Optimal Synthesis Method for Invention of New Mechatronic Systems in Vibrotechnics E. Lavendelis and J. Viba	432
Selection of Coils Parameters in Magnetic Launchers Z. Gosiewski and M. Kondratiuk	438
Selection of a Constitutive Model Used for Prediction of Behaviour of Ring Material Expanded by Pulse Electromagnetic Field R. Panowicz and J. Janiszewski	444
Stability of Jeffcott Rotor Operating in Tilting 3-Pad Journal Bearings with Turbulent Oil Film S. Strzelecki and S.M. Ghoneam	450
Static Model of a Rail Launcher Z. Gosiewski and P. Kłoskowski	456
Synthesis of Vibrator with Air or Water Flow Excitation J. Viba, L. Shtals, A. Vilkajs and E. Kovals	462
The “Screwdriver” Technology of the Model Building for Simulating of the Processes in the Mechatronic Objects O.V. Uzunov	468
Use of Electromagnetic Impulse System for Transportation of Dry Materials and Solid Bodies V. Mironov, J. Viba and L. Shtals	474
Vehicle Electro-Mechanical Brake System: A Mechatronic Application N. Akkus, F. Yücel and E. Toptas	480

IX. Integrated Diagnostics

Fault Identifiability Problem – The Multi-Valued Diagnostic Model Approach H. Borowczyk	486
Improving the Efficiency of Diagnosing of Leaks from Liquid Transmission Pipelines by Using the New Diagnostic Information – The Signals of Weak Interactions between Objects P. Ostapkowicz	492
Possibilities of Assessment of the Control Potential of Aircraft Engines P. Lindstedt	498
Presentations in FAM-C And FDM-A Methods and Some Problems of a Signals Theory A. Gębura and W. Markiewicz	504

X. Failure Analysis

Energy Based Characterization of Fatigue Behaviour of Cyclically Unstable Materials E. Macha, J. Slowik and R. Pawliczek	512
Mobile Robot Diagnosis with Bayesian Filters M. Zając, D. Uciński and R. Stetter	518
Operating Degradations of Air Turbine Scoops of Turbo-Engines A. Szczepankowski, J. Szymczak and J. Spychała	524
Turbine Engine Health/Maintenance Status Monitoring with Use of Phase-Discrete Method of Blade Vibration Monitoring M. Witoś and R. Szczepanik	530

XI. Tribology in Mechatronic Systems

Load Carrying Capacity of Microbearings with Parabolic Journal K. Wierzcholski and A. Miszczak	542
--	-----

Methodological Aspects of Evaluating Tribological Properties of Ball Bearings M. Jałbrzykowski and J. Nachimowicz	548
Research of Tribological Properties of Mineral Motor Oil with Cholesteryl Stearate Additive V. Mokshin and V. Vekteris	552
Selective Transfer Phenomenon in Copper-Steel Tribological Systems A. Kotnarowski	558

XII. Analysis of Signals

A Comparative Study of Different Neighborhood Topologies in WTM Kohonen Self-Organizing Maps M. Kolasa, R. Długosz and J. Pauk	564
A Model-Less Method for Added Mass Identification G. Suwała and Ł. Jankowski	570
Analysis of Dynamic Method of Line Scales Detection A. Barakauskas, A. Kasparaitis, S. Kausinis and R. Lazdinas	576
Application of Optical Flow and Methods of Group Lee Representation in Problems of Detecting of Movements and Pattern Detection on the Images V.P. Makarychev	582
Data Mining in Analysis of Biomechanical Signals M. Derlatka and J. Pauk	588
Decomposition of Non-Stationary Signals Based on the Cochlea Function Principle D. Dusek	594
Human Gait Analysis and Classification Based on Neural Networks and Fuzzy Logic J. Pauk, M. Derlatka, R. Długosz and M. Kolasa	600
Parametric Description of Vibration Using the Autocorrelation Function A. Kotowski	606
Synthesis of a Sequential Model of Muscles of a Man during Drop Landing on a Hard Platform M.A. Książek, D. Ziemiański and L. Nosiadek	612
Vibration Data Analysis in Presence of Distorting Pulses O.S. Antropov, V.F. Borulko, V.M. Dolgov, O.O. Drobakhin and S.M. Vovk	621

XIII. Measurement Techniques

A Fiber-Optic Bending Sensor for the Vibration Monitoring of CNC Face-Milling Machine İ. Gücüyener and E. Emel	627
Contour Representation by Clustering Curvatures of the 3D Objects A. Lipnickas and V. Raudonis	633
Control of a Micro-Droplet for Laser-Induced Breakdown Spectroscopy Solution Measurement S. Ikezawa, M. Wakamatsu, J. Pawłat and T. Ueda	639
Development of Electromagnetic Ring Expansion Apparatus for High-Strain-Rate Test J. Janiszewski and W. Pichola	645
Electrical Measurements and Analyses with Data Acquisition Devices (DAS) of Heating and Cooling Capacities of the Intercity Coaches Ö. Yılmaz, R. Erçetin, T. Çetin Akıncı and S. Ersoy	651
Embedded Tensile Strenght Test Machine FM1000 – An Upgrade of Measurement and Control J. Živčák, M. Petřík, R. Hudák, T. Tóth, D. Knezo and E. Kovalova	657
Experimental and Analytical Investigations of the Dynamic Analysis of Adhesively Bonded Joints for Composite Structures S.M. Ghoneam, A.A. Hamada and M.I. El-Elamy	663
Hardware and Software Integration of Mechatronic Systems for an Example Measurement Path for Temperature Sensors J. Świder and M.P. Hetmańczyk	676
Line Scale Calibration in Non-Ideal Measurement Situation S. Kausinis, A. Kasparaitis, A. Barakauskas, R. Barauskas, A. Jakstas and A. Kilikevičius	682

Microtopography Model of Rough Surface M. Kumermanis and J. Rudzitis	686
Precision Measurement of the Carriage Vibrations at the Different Speeds A. Kilikevičius, V. Vekteris and A. Kasparaitis	690
Radio Frequency Measurement and Control Network for a Cable Equipped with the Magnetorheological Damper M. Rosół	696
Real Time Measuring of the Pressure Drops against Changing the Fluid Velocity on the Critical Points of the Fluid System R. Gürbüz	702
Reverse Engineering Approach for Object with Free-Form Surfaces Using Standard Surface-Solid Parametric CAD System A. Łukaszewicz and K. Miatliuk	706
Rowing Force and its Simulation on Training Facility V. Grigas, A. Domeika, A. Legha, D. Satkunskiene and R.T. Toločka	712
Study of the Effect of Process Induced Uncertainties on the Performance of a Micro-Comb Resonator I. Codreanu, A. Martowicz, A. Gallina, Ł. Pieczonka and T. Uhl	716
XIV. Multifunctional and Smart Materials	
Analysis of Time Response of Shape Memory Alloy Actuators Modular System D. Mândru, I. Lungu, S. Noveanu and M.O. Tătar	726
Mechanical Properties of G17CrMoV5 – 10 Cast Steel after Regenerative Heat Treatment G. Golański	732
Stability of a-C:N:H Layers Deposited by RF Plasma Enhanced CVD S. Jonas, K. Kyzioł, J. Lis and K. Tkacz-Śmiech	738
The Effect of High Temperature on the Degradation of Heat-Resistant and High-Temperature Alloys J. Błachnio	744
XV. Metallic Alloys	
An Investigation on the Solid State Reduction of Chromite Concentrate A. Atasoy and F.R. Sale	752
Dynamic Chip Breaker Design for Nickel-Base, Inconel 718, Alloy with Coated Carbide Tools Using Negative Angle Tool Holder Ş. Karabulut and A. Güllü	758
Influence of Aluminium Content on Behaviour of Magnesium Cast Alloys in Bentonite Sand Mould L.A. Dobrzański and T. Tański	764
Investigation of Influence of Rhenium Addition on W-Ni-Fe-Re Heavy Alloys Properties T. Majewski, J. Michałowski and J. Piętaszewski	770
XVI. Biomaterials	
Bone Ingrowth Processes on Porous Metallic Implants J. Sidun and J.R. Dąbrowski	776
Effect of TiN Coating on Functional Properties of Implant Titanium Alloy M. Grądzka-Dahlke, A. Bukrym and E. Choińska	782
Investigations of Mixed and Submandibular/Sublingual Saliva E. Andrysewicz, J.R. Dąbrowski and G. Leonow	788
The Problems of Exploitation Reliability Estimation of Dental Prosthetics Elements M. Jałbrzykowski and E. Kovalova	794
XVII. Functional Composites	
Fluoride Release and Antibacterial Activity of Self-Made Composite Materials for Dental Fillings J. Mystkowska, G. Marczuk-Kolada, K. Leszczyńska, J.R. Dąbrowski and J. Karaś	801

Mechanical and Physicochemical Properties of Tetric EvoCeram® - Dental Composite Material	
J. Mystkowska	807
The Effect of the Ceramic Dispersion on the Nickel Matrix Composite Coating Properties after Plastic Working	
T.C. Dyl, R. Skoblik and R. Starosta	813
 XVIII. Adaptive Materials	
An Investigation of an Electromagnetic Induction Device for a Small-Scale MR Damper	
B. Sapiński	819
Influence of Ageing on Mechanical Properties of Epoxy Coatings	
D. Kotnarowska and M. Wojtyniak	825
Modeling of an Adaptive Beam with MR Fluid	
B. Sapiński and J. Snamina	831
Neural Network – Backstepping Control for Vibration Reduction in a Magnetorheological Suspension System	
M. Zapateiro, N.S. Luo and H.R. Harimi	839
Study on the RE₂O₃-Mo Secondary Electron Emitters	
W. Liu, J.S. Wang, F. Gao, N. Li, H.Y. Li, M.L. Zhou and T.Y. Zuo	845
Visible-Light Induced Photocatalytic Activity of Vanadium and Nitrogen Co-Doped SrTiO₃	
J.S. Wang, H. Li, H.Y. Li, S. Yin and T. Sato	851
Vitreous Enamel Coating on Steel Substrates	
K. Hrabovská, J. Podjuklová, K. Barčová, L. Dobrovodská and K. Pelikánová	856
 XIX. Piezoelectric Materials	
Active Control of a Beam for Generating Points of Zero Displacements and Zero Slopes	
Q. Mao and S. Pietrzko	861
Damping of Mechanical Vibrations Using Piezoelements, Including Influence of Connection Layer's Properties on the Dynamic Characteristic	
A. Buchacz and M. Płaczek	869
Feasibility Investigation of a Static Force Measurement with Longitudinal Piezoelectric Resonant Sensor	
C. Viguiet, C. Nadal and J.F. Rouchon	876
Reduction of Structural Sound Radiation and Vibration Using Shunt Piezoelectric Materials	
S. Pietrzko and Q. Mao	882
 XX. Ceramics and Glasses	
Model Studies of Microstructure Changes in Sintering of Ceramics	
S. Jonas, A. Koleżyński, J. Lis, P. Stoch and K. Tkacz-Śmiech	890
Sinterability of Silicon Nitride Powder Produced by the CRN Process	
A. Atasoy and M. Tümer	896
Sintering of Y-SiALON Ceramic	
A. Atasoy and A. Ersoy	902
 XXI. New Trends in Mechatronic and Material Science Education	
Role of the Machine Design Courses in the Mechatronic Faculty	
M. Banaś and J. Stryczek	908
Selection of PDM Information System	
J. Maxa and V. Neděla	912
 XXII. New Curricula Concerning Mechatronic Systems and Material Science	
A Model for “Work Integrated Learning” in Mechatronic Education	
İ. Gücüyener, A. Kus and R. Arslan	918

XXIII. Teaching Materials and Laboratory Facilities

Modelling of Solid Part Using Multibody Techniques in Parametric CAD Systems

A. Łukaszewicz

924

Virtual Simulation of Mechatronics Laboratory

T.R. Lubczyński and A. Baier

930

The Digital System of the Position Measurement

K. Dzierżek

936
