

Table of Contents

Preface

I. Materials

Solar Control Glass

H. Altan and J. Mohelníková 1

The Mechanism of Defects Formation in Silicon Substrates

A. Bogorosh, S. Voronov, N. Višniakov, D. Ščekaturovienė and A. Bubulis 7

The Simulation Spreading Process of Steel Tubes Hollow

T.C. Dyl 13

Effect of the Unit Pressure on the Selection Parameters of Intermetallic Coatings NiAl and Ni₃Al after Plastic Working

T.C. Dyl, R. Starosta and R. Skoblik 19

Assessments of Shrinkage Degree in Bioceramic Sinters HA+ZrO₂

A. Dudek and C. Kolan 25

Structure and Properties of Bioceramics Layers Used for Implant Coatings

A. Dudek and R. Włodarczyk 31

Stress Corrosion Cracking of 5083 and 7020 Aluminium Alloys Jointed by Friction Stir Welding

K. Dudzik and M. Czechowski 37

Tensor Interpolation of Tribological Wear in Ionitriding of 316L Steel

T. Frączek, M. Olejnik, M. Knapieński and G. Biernat 43

Microstructure State and Heat Treatment Influence on Barkhausen Noise Parameters and Residual Stress Measurements

T. Garstka 50

Influence of Ageing Process on Structure and Mechanical Properties of the T24 Steel

G. Golański 56

Cyclic Fracture Analysis of Semi-Natural Cast Iron Plate with Metallurgical Defects Layer

M. Gutasukas, J. Bacevičius and M.K. Leonavičius 61

Investigation of Copper Fragmentation Property

J. Janiszewski and R. Panowicz 66

Effects of Vibration Energy Input on Stress Concentration in Weld and Heat-Affected Zone of S355J2 Steel

A. Jurčius, A.V. Valiulis and O. Černašėjus 73

Asymmetric Process of Plate Rolling Analysis

A. Kawalek, H. Dyja and M. Knapieński 79

Analysis of the Plasticity of High-Carbon Alloy Steel in the Conditions of Hot Plastic Working

M. Knapieński, M. Kwapisz and A. Kawalek 85

Effect of Erosive Particle Velocity on the Intensity of Polymeric Coating Wear

D. Kotnarowska 91

Selective Transfer Phenomenon in Friction Couples Lubricated with Base Oils

A. Kotnarowski 97

Effect of PWHT on the Mechanical Properties of P5 Steel Welded Joints

V. Kumšlytis, A.V. Valiulis and O. Černašėjus 104

High Temperature Corrosion of Evaporator Tubes with Thermal Sprayed Coatings

J. Łabanowski and J. Ćwiek 110

Properties of Duplex Stainless Steel Surface Layers after Burnishing Process

J. Łabanowski and A. Ossowska 118

Investigations of Production Processes of W-Re-Ni and W-Re-Ni-Fe Heavy Metals

T. Majewski 124

Modification of W and Re Powders by Plasma Technique

T. Majewski 130

Development of Finite Element Model of Reorientation of Cementite Lamellae in Pearlite Colonies in Wire Drawing Process for Wires Made from High Carbon Steel Z. Muskalski and A. Milenin	136
Mechanical and Physicochemical Properties of Some Originally Made Composite Materials for Dental Fillings J. Mystkowska, G. Rokicki, J. Sidun and J.R. Dąbrowski	142
Surface Activity and Fluid Sorption of Titanium Alloys Soaked in SBF Solution J. Mystkowska, P. Deptuła, S. Bakier and J. Sidun	147
Steel Strips Flattening in Ball Rolling Mill J. Przondziono and J. Szymszał	153
Polymer-Surface Modification with $a\text{-C:N:H}$ Layers Plasma Chemically Deposited in RF CVD and MW CVD Systems K. Przetakiewicz, K. Tkacz-Śmiech, P. Boszkowicz and S. Jonas	159
The Characteristic of Surface Layers on Austenitic Stainless Steel after Glow-Discharge Nitriding Process A. Sitko, M. Szkodo and M. Gazda	165
The Effect of Fabrication Method of Cobalt Base Clad Layer on Air Oxidation H. Smolenska	169
Cobalt Base Clad Layer Resistance on the Corrosion under Low Sulfur Pressure H. Smolenska	173
The Influence of Plastic Strain on the Corrosive Properties of Plasma Sprayed Intermetallic NiAl and Ni₃Al Coatings R. Starosta	177
The High Cyclic Failure Analysis of Welded Joints of CT Specimens R. Stonkus and M.K. Leonavičius	183
Influence of Cavitation Intensity on the Relative Cavitation Resistance of Laser Processed C45 Carbon Steel M. Szkodo	189
Cavitation Erosion Resistance of Austenitic Microstructure Created by Laser Beam M. Szkodo	195
Assessment of FSW Welds Made of Aluminum Alloy AW7075-T651 M. Szkodo, J. Adamowski and A. Sitko	201
Magnetic Properties of Co₂O_n (n = 1-9, 12) Nanoparticles J. Tamulienė, R. Vaisnoras, G. Badenes and M.L. Balevicius	207
Advanced Materials Research and Technologies Development: Lithuanian Experience A.V. Valiulis and J. Škamat	210
The Influence of Strain Rate and Strain Intensity on Retained Austenite Content in Structure of Steel with TRIP Effect S. Wiewiórowska	216
Analysis of Rolling Process for Alloy on the Base of Silver BAg7 S. Wiewiórowska, Z. Muskalski and M. Suliga	221
Determination of Temperature Range Enabling the Plastic Deformation Process of CP302 Solder S. Wiewiórowska, Z. Muskalski and M. Suliga	226
Properties and Application of Sintered Stainless Steel as Interconnectors in Fuel Cell R. Włodarczyk and A. Dudek	231

II. Engineering Technologies

Finishing of Ceramics in a Single-Disk Lapping Machine Configuration A. Barylski and M. Deja	237
Optimal Design for the Environment of the Means Transportation: A Case Study of Reuse and Recycling Materials N. Chamier-Gliszczyński	244
Generation of Optimal Process Plan Alternatives for Manufacturing Mechanical Components M. Deja and M. Siemiatkowski	250
The Operator Protective Structures Testing for Mining Machines D. Derlukiewicz, J. Karliński and A. Iluk	256

Modeling and Simulation of Tool Cycle in Manufacturing Cell M. Dobrzynski	262
Surface Roughness Model for Components Created by Stereolithography Method S. Dzionk	268
Design Process Innovation of Mechanical Objects with the Use of Design for Six Sigma Methodology S. Koziółek, D. Derlukiewicz and M. Ptak	274
Critical to Quality Factors of Engineering Design Process of Armoured Vehicles S. Koziółek, E. Rusiński and K. Jamroziak	280
Diagnostic Models of the States of Developing Fault for Working Parts of the Excavator M. Kowalczyk, J. Czmochocki and D. Derlukiewicz	285
The SMA Wires Application in the Braille Monitor J. Kwaśniewski and I. Dominik	290
The Effect of the Normalizing Rolling of S355J2G3 Steel Round Bars on the Selected Mechanical Properties of Finished Product K.B. Laber and H. Dyja	294
Estimation of the Influence of Burnishing Parameters on X5CrNi18-10 Steel W. Labuda and R. Starosta	300
Cavitation Wearing of the SUPERSTON Alloy after Laser Treatment at Cryogenic Conditions B. Majkowska and W. Serbiński	306
New Roll Pass Design to the Bar Rolling Process Using Longitudinal Slitting Passes S. Mróz	310
Sensing of Carbon Dioxide and Hydrocarbons Using Photonic Bandgap Fiber J. Pawłat, X.F. Li, T. Sugiyama, T. Matsuo, Y. Zimin and T. Ueda	316
Analysis of the Fatigue Fractures in the Eccentric Press Shaft E. Rusiński, P. Harnatkiewicz, G. Przybyłek and P. Moczko	321
Structural Modifications of Excavator's Bucket Wheel by the Use of Numerical Methods E. Rusiński, P. Moczko and P. Kaczyński	330
Multicomponent Layers for Aluminium Alloys Surface Consolidation W. Serbiński	336
Application of Syntactic Pattern Recognition Approach in Design and Optimisation of Group Machining Systems M. Siemiatkowski	342
Analysis of Asymmetrical Rolling Process of Multilayer Plates R. Skoblik, D. Rydz and G. Stradomski	348
Identification of Internal Stresses in Bolted Flanged Joints T. Smolnicki, J. Karliński and D. Derlukiewicz	353
Determination of Centre of Gravity of Machines with the Rail Undercarriage T. Smolnicki and M. Stańco	359
Slitting Criterion for Various Slitting Roll Geometry in MSR Rolling Process A. Stefanik, P. Szota, S. Mróz and H. Dyja	365
The Influence of the Value of Single Draft on Mechanical-Technological Properties of High Carbon Steel Wires M. Suliga	371
Theoretical and Experimental Analysis of Drawing of Square Wire and Square Twisted Wire M. Suliga, S. Mróz and P. Szota	377
Numerical Modelling of the Microstructure during Rolling of Flat Bars P. Szota, A. Stefanik and H. Dyja	382
Analysis of Microslips and Friction in the Riveted Joints E. Szymczyk, J. Jachimowicz, A. Derewonko and G. Slawinski	388
Influence of Material Model on Tensile Loaded Joint E. Szymczyk and G. Slawinski	394
FEM Modeling of Failure of a Foam Single Cell W. Szymczyk and D. Miedzińska	400
Electrochemical Behaviour of Stainless Steel Wire for Urology W. Walke and J. Przonczono	404

Education

The Course of Microcontrollers Oriented to Practical Skills

A. Baskys 410

Continuing Perfection of Industrial Engineering and Management Knowledge after Master Studies

B. Jančiauskas and E. Toločka 414

Mechatronics Engineering Programs at German Universities of Applied Sciences

H. Loose 419

Intelligent Agent Find its Way in the Drawing

A. Sokas 425
