

# Table of Contents

## Preface

<b>Microstructural Characterization of Thermal Barrier Coatings Deposited by APS and LPPS Thin Film Methods</b>	
M. Góral, M. Pytel, P. Sosnowy, S. Kotowski and M. Drajewicz	1
<b>The Influence of e-Beam Irradiation on the Morphology and Functional Properties of UHMWPE</b>	
J. Maszybrocka, A. Barylski, J. Cybo and P. Czaja	6
<b>The Influence of Plastic Deformation on Structure of Highly Crosslinked UHMWPE Intended for Endoprosthesis Cups</b>	
J. Maszybrocka, J. Cybo, J. Cwajna, A. Barylski and P. Czaja	13
<b>Changes in the Molecular Structure of UHMW Polyethylene under the Influence of Thermal and Radiation Modification, as Well as Time</b>	
J. Maszybrocka, P. Czaja, J. Cybo, J. Michniowski and A. Barylski	19
<b>The Effect of B and Microalloying Elements (V, Ti, Nb) Additions on the Austenite Grain Growth of Low Alloy Steel</b>	
H. Adrian, M. Pelczar, A. Adrian and J. Augustyn-Pieniążek	25
<b>Comparison of Mechanical Properties of Mn-Cr-Mo Steels Sintered in Different Conditions</b>	
M. Sulowski and P. Matusiewicz	33
<b>Application of Convex Hull Algorithm for Defect Detection in Selected Biological Materials</b>	
R. Petryniak	41
<b>Changes in Microstructure of GX12CrMoVNbn9-1 Cast Steel after Low Cycle Fatigue</b>	
G. Golański, C. Kolan and J. Kępa	47
<b>The Effect of Austenitizing Temperature on Prior Austenite Grain Size in Martensitic Cast Steel</b>	
G. Golański, C. Kolan and J. Kupczyk	53
<b>The Influence of Turbine Blade Geometry and Process Parameters on the Structure of Zr Modified Aluminide Coatings Deposited by CVD Method on the ZS6K Nickel Superalloy</b>	
M. Góral, M. Pytel, R. Filip and J. Sieniawski	58
<b>Quantitative Characterization of Shrinkage and Gas Pores in Turbine Blades Made of MAR M247 and IN 713C Superalloys</b>	
S. Roskosz	64
<b>Quantitative Microstructural Analysis of Thermal Barrier Coatings Deposited on Inconel 625</b>	
G. Galant, J. Dulęba, S. Toczek, B. Dubiel and A. Czyska-Filemonowicz	70
<b>Intermetallic Phases Formation in Hot Dip Galvanizing Process</b>	
D. Kopyciński and E. Guzik	77
<b>Modelling of Grain Microstructure of IN-713C Castings</b>	
D. Széliga, K. Kubiak, A.A. Burbelko, R. Cygan and W. Ziaja	83
<b>The 3D Imaging and Metrology of CMSX-4 Superalloy Microstructure Using FIB-SEM Tomography Method</b>	
A. Kruk, B. Dubiel and A. Czyska-Filemonowicz	89
<b>Influence of Coatings Deposition Parameters on Microstructure of Aluminide Coatings Deposited by CVD Method on Ni-Superalloys</b>	
A. Nowotnik, M. Góral, M. Pytel and K. Dychtoń	95
<b>Stochastic Nature of the Casting Solidification Displayed by Micro-Modelling and Cellular Automata Method</b>	
A.A. Burbelko, D. Gurgul, W. Kapturkiewicz, J. Poczałek and M. Wróbel	101
<b>Stereological Characterization of TiC Carbides in Bottom Skull after Melting of Ti-6Al-4V-0,5C Alloy in Vacuum Induction Furnace</b>	
A. Szkliniarz and G. Jarczyk	107
<b>Quantitative Characterization of Microstructure of Ti-47Al-2W-0.5Si Alloy after Melting in Vacuum Induction Furnace</b>	
W. Szkliniarz and A. Szkliniarz	113
<b>Comparison of the Investigations of Photonic Crystals Using SEM and Optical Techniques</b>	
A. Starczewska, J. Szala, M. Kępińska, M. Nowak, K. Mistewicz and M. Sozańska	119

<b>Influence of the Pouring Temperature on the Castability and Microstructure of Elektron 21 and QE22 Magnesium Casting Alloys</b>	125
B. Dybowski, R. Jarosz and A. Kiełbus	
<b>Metrology and Morphology of <math>\gamma'</math> and <math>\gamma''</math> Nanoparticles in Inconel 718 Measured by FIB-SEM Tomography</b>	131
K. Kulawik, B. Dubiel and A. Czyrska-Filemonowicz	
<b>Detection of Intermetallic Compounds in a Mg-5Al-3Ca-0.7Sr-0.2Mn Magnesium Alloy</b>	137
T. Rzychoń, J. Szala and T. Kukielka	
<b>Stereological and Statistical Evaluation of Grain Size in Experimental Ni-Based and Conventional Supercoarse Sintered Carbides</b>	143
J. Richter and M. Maliński	
<b>The Procedure for Quantitative Analysis of Welded Joints in QE22 Alloy</b>	149
J. Adamiec, M. Młodzieniak and A. Kiełbus	
<b>Preparation and Characterization of Al-Si<sub>3</sub>N<sub>4</sub> Composite Particles</b>	155
D. Michalik, N. Valle, J. Guillot, T. Pawlik, M. Sopicka-Lizer, A. Witkowska and J. Myalski	
<b>The Smooth Bootstrap Approach to the Distribution of a Shape in the Ferritic Stainless Steel AISI 434L Powders</b>	162
J. Pietraszek and A. Gądek-Moszczak	
<b>Transformations of Phases in Titanium Alloy after High Temperature Hydrogen Treatment</b>	168
M. Sozańska	
<b>Thermal Gradients Behaviour during the C-E Transition within Solidifying Massive Roll</b>	174
W. Wołczyński, W. Wajda and E. Guzik	
<b>Effect of Material and Technological Conditions on Quality of Metal Matrix Composite Castings</b>	180
K. Gawdzińska, D. Nagolska and L. Wojnar	
<b>Description of 3D Microstructure of the Composites with Polypropylene (PP) Matrix and Tuf Particles Fillers</b>	186
A. Gądek-Moszczak and S. Żmudka	
<b>The Influence of Various Etchants on the Quantitative Analysis of Microstructure of Mg-Nd Alloy</b>	192
M. Stopryra and A. Kiełbus	
<b>Advanced Statistical Refinement of Surface Layer's Discretization in the Case of Electro-Spark Deposited Carbide-Ceramic Coatings Modified by a Laser Beam</b>	198
J. Pietraszek, N. Radek and K. Bartkowiak	
<b>On <math>\gamma</math>-<math>\gamma'</math> Eutectic Quantitative Evaluation in the as-Cast CMSX-4 Nickel-Based Superalloy</b>	203
A. Szcztok	
<b>Effect of Modification of Rare Earth Elements on the Morphology of Silicon Precipitates in the ZnAl22Cu3Si Alloy</b>	209
A. Tomaszewska, R. Michalik and H. Woźnica	
<b>The Quantitative Assessment of the Fracture Profile of Magnesium Alloy QE22 Welded Joint</b>	215
J. Adamiec	
<b>Effect of Cooling Rate on the Porosity of the ZnAl22Cu3 Alloy</b>	221
R. Michalik, H. Woźnica and A. Tomaszewska	
<b>An Application of Computer Tomography for Structure Characterization of Metallic-Ceramic Composite Foam</b>	226
J. Grabian, K. Gawdzińska, L. Wojnar and W. Przetakiewicz	
<b>Model of Microstructure Development in Hot Deformed Magnesium Alloy AZ31 Type</b>	232
D. Kuc and E. Hadasik	
<b>Analysis of Intermetallic Phases in 2024 Aluminium Alloy</b>	238
G. Mrówka-Nowotnik and J. Sieniawski	
<b>Effect of Modification of Rare Earth Elements on the Morphology of Silicon Precipitates in the ZnAl40Cu3Si Alloy</b>	244
R. Michalik, A. Tomaszewska and H. Woźnica	
<b>Effect of Processing Conditions on Microstructure of SiC-TiB<sub>2</sub> Composite</b>	250
G. Górný, L. Stobierski, P. Rutkowski and M. Rączka
