

Table of Contents

I. Robotics: Industrial Robots, Microrobotics

Conception of Arm of Medical Robot Dedicated to Application of Minimally Invasive Surgery R. Trochimeczuk	3
Delta Robot Design L. Březina, M. Holub, L. Cintula and J. Kovar	9
Mathematical Model of the Servo Drive with Friction Wheels. Simulations and Real Object Examination Results L. Fraczak	15
Mechatronic Design of a Parallel Robot for Milling M. Petko and G. Karpiel	21
Mechatronic System for the Production of Highly Secured Documents T. Samborski and A. Zbrowski	27
Redundantly Actuated 3RRR Parallel Planar Manipulator - Numerical Analyses of its Dynamics Sensitivity on Modifications of its Platforms Inertia Parameters K. Lipiński	33
Remote Advanced Supervision and Diagnostics of Robotized Welding Cell Z. Pilat, J. Zieliński and M. Słowikowski	39
Robot Control System for Stereotactic Surgery M. Sibiela, W. Rączka, J. Konieczny, M. Moskała and M. Krupa	45
Solution for Inverse Kinematics of 5 DOF Serial Link MCM Machine P. Kozioł, K. Kukliński, A. Wolniakowski and K. Miatliuk	53
The Simulator for Teaching how to Drive a Car for People with Disabilities A. Dymarek, T. Dzitkowski, K. Herbuś, G. Kost and P. Ociepka	59

II. Mobile Robots

Analysis of the Kinematics of an Eight-Wheeled Mobile Platform M. Stania	67
Behavior Based Complete Coverage Task of Unknown Area by an Autonomous Mobile Robot SCORPION with Static Obstacles in Environment M. Dąbkowski, P. Skrzek and G. Redlarski	73
Concept of Locomotion Mobile Undercarriage Structure Control for the Path Tracking L. Miková, F. Trebuňa and M. Kelemen	79
Fuel Cells for Autonomous Underwater Vehicles G. Grzechka and A. Polak	84
HILS for the Design of Three-Wheeled Mobile Platform Motion Surveillance System with a Use of Energy Performance Index K.J. Kaliński and C. Buchholz	90
Mechatronics Systems of Autonomous Transport Vehicle M. Stania	96
Mobile Sensor Motion Planning for Identification of a Contamination Source Using Iterative Dynamic Programming P. Ziemniak	102
Neural Network Based Reactive Navigation for Mobile Robot in Dynamic Environment J. Krejsa, S. Věchet and T. Ripel	108
Path Planning with the Use of Artificial Ant Colony Algorithm S. Věchet and T. Ripel	114
Pneumatic Robot for Monitoring Hazardous Environments of Coal Mines L. Kasprzyczak, S. Trenczek and M. Cader	120

Polymer Fuel Cells in Underwater Platforms G. Grzeczka	126
Structures of the Omnidirectional Robots with Swedish Wheels M.O. Tătar, C. Cirebea and D. Măndru	132
Using River Formation Dynamics Algorithm in Mobile Robot Navigation G. Redlarski, A. Pałkowski and M. Dąbkowski	138
Vision Analysis of a Biomimetic Water Vehicle Propeller A. Sioma and W. Lepiarz	144

III. Unmanned Aerial Vehicles

3D Attitude Estimation in Indoor Environments with a Complementary Filter for the Special Orthogonal Group SO(3) M. Kmiecik and K. Sibilski	153
A Stereovision System for Real Time Obstacle Avoidance by Unmanned Aerial Vehicle J. Cieśluk and Z. Gosiewski	159
Algorithms of Measurement System for a Micro UAV G. Kopecki, A. Tomczyk and P. Rzucidło	165
Application of Unfalsified Control Theory in Controlling MAV A. Wolniakowski and A. Mystkowski	171
Autonomous Flight in the Canyons of Streets on the Basis of Information Derived from the Vision System C. Kownacki and M. Bogdan	176
Base Station for Monitoring of Unmanned Aerial Vehicle Flight M. Słowik and Z. Gosiewski	182
Development of a Model for the Intake Channel within a MRCA Turbine Engine in Order to Analyze Intake Vortex Phenomena A. Kozakiewicz	188
Flight Loads of Mini UAV A. Majka	194
Hybrid Electroactive Wings Morphing for Aeronautic Applications M. Chinaud, J. Scheller, J.F. Rouchon, E. Duhayon and M. Braza	200
Modeling, Simulation and Control of Microelectromechanical Flying Insect K. Sibilski and A. Żyluk	206
Modelling of Dynamic and Control of Six-Rotor Autonomous Unmanned Aerial Vehicle D. Ołdziej and Z. Gosiewski	220
Optimization of Lift Force of Mini Quadrotor Helicopter by Changing of Gap Size between Rotors D. Aleksandrov and I. Penkov	226
Preliminary UAV Autopilot Integration and In-Flight Testing L. Ambroziak and Z. Gosiewski	232
Simulation Method of UAV Avionics System Designing K. Wojtowicz, W. Sobieraj and B. Brzozowski	238
Testing Some Alpha-Models of Turbulence on Wing Profiles M.A. Moreno, B. González, V. Enríquez, F.A. Déniz, R. Aguasca and G. Winter	243
The Analysis of the Influence of the Design Parameters on the Performance Characteristics of a Mini UAV A. Majka	248
UAV Autonomous Formation Flight Experiment with Virtual Leader Control Structure Z. Gosiewski and L. Ambroziak	254
UAV Avionics System Software Development Using Simulation Method B. Brzozowski, W. Sobieraj and K. Wojtowicz	260
Unmanned Air Vehicle Research Simulator - Prototyping and Testing of Control and Navigation Systems P. Rzucidło	266

IV. Teleoperation, Telerobotics, Teleoperated Semi-Autonomous Systems

Telemanipulator Control with Varying Camera Position

L. Podsędkowski, P. Wróblewski and M. Zawierucha

275

V. Sensors and Actuators in Mechatronics

Characteristics of an Experimental MSMA-Based Actuator

S. Flaga, I. Oprzędkiewicz and B. Sapiński

283

Cleaning System for Automated Optical Inspection of Heads of Bearing Rollers

A. Zbrowski

289

Controlled Conditioning System for the Electromagnetic Generator Supporting an MR Damper: Prototyping and Testing

M. Rosół, B. Sapiński and M. Knapik

295

Determination of Energy Parameters of Impact Cylinders

A. Zbrowski and W. Józwik

301

Elastic Interdigital Transducers for Lamb Wave Generations

M. Mańka, A. Martowicz, M. Rosiek and T. Uhl

307

Haptic Devices Based on Planar Stepping Motors Introductory Concept

T. Huścio and W. Kołodziejczyk

313

Homogeneous Flow of Hydraulic Fluid Retaining Gap

L. Ułanowicz

318

Investigation of Multifunctional Actuators on an Air-Cushion

K. Vaitasius, D. Pauliukaitis and E. Kibirkštis

324

Investigation of Oscillations of the Piezoelectric Actuator with Two-Directional Polarization

R. Lučinskis, D. Mažeika and R. Bansevicius

328

Laboratory Stand of an Electromagnetic Multi-Coil Launcher for Micro Aerial Vehicles

M. Kondratiuk and Z. Gosiewski

334

Magnetic Field and Circuit Parameters in an Electromagnetic Generator Supporting a Rotary MR Damper

B. Sapiński

340

Magnetic Thrust Bearing for the ORC High – Speed Microturbine

Z. Kozanecki and J. Łagodziński

348

Mathematical Analysis and Investigation Results of the Bearingless Electric Motor with Permanent Magnets

M. Henzel

354

Measurement of Human Locomotion: Evaluation of Low-Cost KINECT and SHIMMER Sensors

H. Loose and K. Orłowski

360

Mechatronic System for Impact Tests for Aero Structures

A. Zbrowski and A. Majcher

366

Modelling of the Planar Aerostatic Two-Coordinate Relative Bases

T. Huścio and F. Siemieniako

372

New Method of Measurements of Magnetic Characteristics in Two Perpendicular Axis of Amorphous Ribbon

P. Frydrych, R. Szewczyk, J. Salach and K. Trzcinka

378

Numerical and Experimental Testing of Bearingless Induction Motor

Z. Gosiewski, M. Henzel, K. Falkowski and M. Żokowski

382

Possibilities of Application of Amorphous $\text{Fe}_{77}\text{Cr}_2\text{B}_{16}\text{Si}_5$ Alloys in Different States of Thermal Relaxation as Magnetic Tensile Force Sensors

J. Salach, R. Szewczyk, A. Bieńkowski and D. Jackiewicz

388

Rubber Structural Coupon Behaviour Study under Pressure Impulse

P. Baranowski, J. Malachowski, Ł. Mazurkiewicz and K. Damaziak

394

Second-Order Model of the Radial Passive Magnetic Bearing with Halbach's Array

K. Falkowski

400

Simulation Model of an Electromagnetic Multi-Coil Launcher for Micro Aerial Vehicles M. Kondratiuk and Z. Gosiewski	406
The Temperature Influence on the Linear Actuator Static Parameters A. Waindok and B. Tomczuk	412

VI. Control of Mechatronic Systems

Load Control in Upper Limb Exercising R. Maskvytis, V. Eidukynas, I. Tiknevičienė and R.T. Toločka	421
Active Synthesis of Discrete Systems as a Tool for Reduction Vibration A. Dymarek and T. Dzitkowski	427
Active Vibration Control Method for Space Mechanical Structure with Piezostacks A.P. Koszewnik	433
Balance Platform Model Parameter Identification A. Nawrocka and A. Kot	439
Cam_Gate System in Product Quality Control, Optimal Selection of Inspecting-Sorting Automatic Machines K. Łasiński	445
Commissioning and Control of the AMB Supported 3.5 kW Laboratory Gas Blower Prototype R.P. Jastrzębski, A. Smirnov, K. Hynynen, J. Nerg, J. Sopanen, T. Lindh, J. Heikkinen and O. Pyrhönen	451
Control Driven Advances in Smart Rotating Machinery J.T. Sawicki	457
Control System of a Manipulation Mechanism for Acoustical Measurement in Anechoic Chamber J. Mężyk, A. Flach and A. Zbrowski	467
Diversity of Servo-Constraint Problems for Underactuated Mechanical Systems: A Case Study Illustration W. Blajer, R. Seifried and K. Kołodziejczyk	473
Energy Dissipation of Synchronized Switch Damping with Piezoceramics Using Negative Capacitance M. Neubauer, X. Han and J. Wallaschek	483
Energy Parameter Control System of Strength Machine for Material Tests under Cyclic Bending and Torsion L. Kasprzyczak, E. Macha and Z. Marciniak	489
Force Controllers for AMB Systems with Position and Current Feedback R.P. Jastrzębski, A. Smirnov and O. Pyrhönen	495
Genetic Fuzzy Approach for Designing a Gain Scheduling Anti-Sway Crane Control System J. Smoczek	501
Hardware in the Loop Test Rig for Development of Control Algorithms for Electric Vehicles F. Quantmeyer and X.B. Liu-Henke	507
Influence of Bias Current Value on Properties of Active Magnetic Bearing B. Tomczuk, D. Wajnert and J. Zimon	513
Mathematical Models of Control Systems of Angular Speed of Steam Turbines for Diagnostic Tests of Automatic and Mechatronic Devices G. Redlarski, J. Piechocki and M. Dąbkowski	519
Model Predictive Control for Lateral Position of Endless Metal Belts S. Grosswindhager, K. Schulmeister and M. Kozek	525
Modeling of a Battery Electric Vehicle (BEV) for Efficient Model-Based Design R. Buchta and X.B. Liu-Henke	533
Modelling of Ship's Heeling and Rolling for the Purpose of Gantry Control Improvement in the Course of Cargo Handling Operations in Sea Ports P. Krata, J. Szpytko and A. Weintrit	539
Monitoring and Diagnostics of the Rotating System with an Active Magnetic Bearing M. Gizelska, D. Kozanecka and Z. Kozanecki	547

Multi-Objective Optimization of the Electromagnetic Actuator Control S. Pecolt and T. Krzyżyński	553
Non-Collision Path Planning of a Payload in Crane Operating Space J. Smoczek, J. Szpytko and P. Hyla	559
Novel Concepts and Criteria for Design Optimization of Controlled Mechanical Systems P. Kiriazov	565
Robust Optimal Control of MAV Based on Linear-Time Varying Decoupled Model Dynamics A. Mystkowski	571
Speed/Position Sensorless Control of Two-Phase Induction Motor Drive System Using Virtual Injection Method B. Dobrucki, S. Kascak and M. Prazenica	577
Synthesis of New Mechatronic Systems by Inverse Algorithm J. Viba, S. Cifanskis and I. Tipans	583
The Anti-Sway Crane Control System with Using Dynamic Vision System J. Smoczek, J. Szpytko and P. Hyla	589
The Concept of an Interactive Device for Children's Lower Limbs Rehabilitation I. Chuchnowska and A. Sękala	594
The Control System for a Vibration Exciter J. Konieczny, M. Sibiela and W. Rączka	600
Using CompactRIO to Build a Virtual Driver of Hybrid Wheeled Vehicle G. Kost and A. Nierychlok	606

VII. Analysis of Vibration and Deformation

A Method for Shaping the Dynamic Characteristics of Vibration Isolation Systems I. Maciejewski	615
A Simplified Model of 3-D Pipe System Conveying Flowing Liquid C. Orlikowski and R. Hein	621
Development and Validation of Numerical Model for Predicting Electromagnetic Expansion of Composite Rings J. Janiszewski and R. Panowicz	627
Dynamic Characteristics of a Piezoelectric Transducer with Structural Damping M. Płaczek	633
Harmonic Analysis of Self-Excited Acoustical System for Stress Changes Measurement in Compressed Steel Structural Section J. Kwaśniewski, I. Dominik, K. Lalik and R. Szymański	639
Investigation of Bodies Vibrations with Elastomeric Elements I. Tipans, M. Eiduks, J. Viba, M. Grishchenko and V. Grzibovska	645
Investigation of Dynamic Processes in Ball Bearings with Defects M. Bogdevičius and V. Skrickij	651
Mechanical Subsystem as Implementation of Active Reduction of Vibration K. Białas	657
Modeling of a Nonlinear Vibration-Based Energy Harvesting System as a Duffing Oscillator H. Westermann, M. Neubauer and J. Wallaschek	663
Modelling of Geared Multi-Rotor System C. Orlikowski and R. Hein	669
Optimal Design of System of Cross-Beams G. Aryasov and S. Zhigailov	675
The Detection of Nut Driver's Optimal Working Regimes Taking into Account Power Consumption and Assembly Time during Fixed Threaded Joints Assembly I. Grinevich and N. Mozga	681
The Optimal Spindle Speed Map for Reduction of Chatter Vibration during Milling of Bow Thruster Blade K.J. Kaliński, M.R. Mazur and M.A. Galewski	686
The Parametric Optimization of Structure Mass of Swept Wing in Compliance to Stiffness and Strength Boundary Conditions S. Kachel	692
