

# Table of Contents

## Preface

## I. Microstructural Characterisation

<b>Effect of Carbon Addition on the Microstructure and Properties of Unalloyed Titanium</b> A. Szkliniarz	3
<b>Structure of Aluminium Matrix Composite with Ceramic Preform Obtained by Centrifugal Infiltration Process</b> A.J. Dolata	7
<b>Plasticity and Microstructure of Magnesium - Lithium Alloys</b> D. Kuc, E. Hadasik, J. Mizera and T. Mikuszewski	11
<b>TEM and X-Ray Examinations of Intermetallic Phases and Carbides Precipitation in an Fe-Ni Superalloy during Prolonged Ageing</b> K.J. Ducki, J. Mendala and L. Wojtynek	15
<b>Effect of Solution Treatment on the Microstructure of Ti-C Alloys</b> A. Szkliniarz and W. Szkliniarz	21
<b>Scanning Transmission Electron Microscopy Studies of the Microstructure of High Chromium Steel after Long Time Exposure</b> K.B. Rodak and A. Hernas	25
<b>Effect of Boron Addition on the Microstructure of Ti-47Al-2W-0.5Si Alloy</b> W. Szkliniarz and A. Szkliniarz	29

## II. Advanced Thermal, Mechanical and Chemical Processing

<b>Influence of Heat Treatment on the Hardness of ZnAl22Cu3 Alloy</b> R. Michalik and A. Tomaszewska	35
<b>Dissolution of Carbide Isolates in Acids Using Microwave Technique</b> A. Wyciślik and J. Richter	39
<b>The Correlation between the Surface Geometry of Tested Materials and the Shape of Lubricant Drop</b> A.J. Dolata and J. Wieczorek	45
<b>Influence of Forming on the Properties of Alloy Based on the Matrix of FeAl Intermetallic Phase</b> J. Cebulski, K. Basa and D. Pasek	49
<b>Production Methods of Thin, Narrow and Profiled Steel Strips</b> J. Herian and K. Aniołek	53
<b>Physical and Mechanical Properties of Composites with Aluminum Alloy Matrix Designed for Metal Forming</b> J. Myalski, J. Wieczorek and A. Plachta	59
<b>Influence of Deformation Parameters on the Structure in Selected Intermetallic from Al-Fe Diagram</b> M. Jabłońska, D. Kuc and I. Bednarczyk	63
<b>Estimation of Flow Stress of Zinc-Titanium Strip during Reverse Rolling</b> M. Spyra, M. Tkocz and E. Hadasik	67
<b>Characteristics of the Structure of Welded Joints in Sanicro 25 Steel</b> P. Jamrozik and M. Sozańska	71
<b>Influence of Copper Addition on Structure and Hardness of the ZnAl40Cu3 Alloy after Heat Treatment</b> R. Michalik and A. Tomaszewska	75
<b>The Repair Welding Technology of Casts Magnesium Alloy QE22</b> R. Kocurek and J. Adamiec	81
<b>High Manganese TWIP Steel - Technological Plasticity and Selected Properties</b> M. Jabłońska, G. Niewielski and R. Kawalla	87

<b>The Potential and Application Areas of Forging Aided by Shear Stress</b> M. Tkocz, Z. Cyganek and F. Grosman	91
<b>Welding of Steel with High Manganese and Aluminum Content</b> S. Lalik and G. Niewielski	95

### III. Surface Engineering and Corrosion Resistance

<b>The Structure of Coatings Obtained in the Zn-31Al-3Mg Bath on High-Silicon Steel</b> H. Kania	101
<b>Liquid Metal Embrittlement of Steel with a Coating Obtained by Batch Hot Dip Method in a Zn + 2% Sn Bath</b> J. Mendala and P. Liberski	107
<b>Influence of the Ion Nitriding Process on the Electrochemical Properties of X39Cr13 Steel Used for Surgical Instruments</b> M. Basiaga and J. Przondziono	111
<b>Synergistic Influence of the Addition of Al, Ni and Pb to a Zinc Bath upon Growth Kinetics and Structure of Coatings</b> H. Kania and P. Liberski	115
<b>Investigation of the Initial Stage of Hot Dip Zinc Coatings on Iron Alloys with Various Silicon Contents</b> P. Liberski, A. Tatarek and J. Mendala	121
<b>Kinetics of Growth and Structure of Coatings Obtained on Sandelin Steels in the High-Temperature Galvanizing Process</b> H. Kania	127
<b>Influence of Si and REE on the Corrosion Resistance of ZnAl40Cu3 Alloy</b> R. Michalik	133
<b>Kinetics of Corrosion Processes of Alloy on the Intermetallic Phase Matrix FeAl in High Temperature in Air Atmosphere</b> J. Cebulski and S. Lalik	137
<b>Influence of the Type of Medical Sterilisation on Electrochemical Properties of Passive Layer Created on X10CrNi 18-8 Steel</b> J. Przondziono and W. Walke	141
<b>The Structure and Growth Kinetics of Zinc Coatings on Link Chains Produced of the 23MnNiCrMo5-2 Steel</b> H. Kania and P. Liberski	145
<b>Influence of Corrosion in "Acid Rain" on the Structure of Surface Layer of the ZnAl22Cu3 Alloy</b> R. Michalik	151
<b>Gas Corrosion of Chromium-Manganese Steel in Atmospheres with Low Oxygen Partial Pressure</b> R. Przeliorz and J. Piątkowski	157
<b>Resistance to Electrochemical Corrosion under Conditions of Sterilisation of Guide Wires Used in Endourological Treatment</b> J. Przondziono and W. Walke	163
<b>Corrosion Resistance of Zn-31AlMg Coatings Obtained by Batch Hot Dip Method</b> H. Kania and M. Bierońska	167

### IV. Materials and Environment

<b>Classification and Assessment of Environmental Aspects of Converter and Electric Steel Plants</b> B. Gajdzik, A. Wycislik and K. Janiszewski	175
<b>Evaluation of Refractory Lining of the Blast Furnace Hearth and Bottom in Five Years of its Operation on the Basis of the Isotherms Shapes</b> G. Kopeć and B. Machulec	179
<b>Effects of Raw Material Contaminants on the Ferrosilicon Melting Process in the Submerged Arc Furnace</b> B. Machulec and W. Bialik	183

<b>Technological Effects of Metallurgical Industry Restructuring in Poland</b> B. Gajdzik and K. Janiszewski	187
<b>Influence of the Steel Scrap Classes on the Liquid Steel Output Melt in Electric Arc Furnace</b> K. Janiszewski, L. Socha and K. Gryc	191
<b>Utilization of Metallurgical Waste in Non-Metallurgical Industry</b> T. Lis, K. Nowacki and T. Małysa	195
<b>Evaluation of the Applicability of Sanicro 25 Steel in Supercritical Boilers</b> P. Jamrozik and M. Sozańska	201
<b>The Influence of Slenderness Ratios of Multi-Hole Ceramic Filters from <math>S_F - 1.67</math> to <math>S_F - 8.36</math> of Filter Surface on Efficiency of Liquid Steel Refining from Non-Metallic Phase</b> K. Janiszewski, B. Gajdzik and A. Wyciślik	205

## **V. Advanced Materials for Transport Industry**

<b>Non-Metallic Inclusions in Castings Made of Nickel-Base Superalloys</b> B. Chmiela and S. Roskosz	211
<b>Metallurgical Quality of Feed Ingots and Castings Made from Nickel and Cobalt Superalloys</b> F. Binczyk, J. Cwajna, P. Gradoń, M. Sozańska and M. Cieśla	215
<b>Effect of Cooling Rate and Modification on the Structure of Cast AlSi17 Alloy</b> J. Piątkowski and T. Matuła	221
<b>X-Ray Analysis of the Precipitation Process in an Fe-Ni Superalloy</b> L. Pająk, K.J. Ducki and L. Wojtynek	225
<b>The Effect of Heat Treatment on Creep Resistance of Castings from the Modified Superalloy MAR-247</b> M. Cieśla, F. Binczyk and M. Mańka	229
<b>Nucleation and Growth of Primary Silicon Crystals in AlSi Alloy after Modification with CuP and Overheating to a Temperature of 920°C</b> J. Piątkowski	237
<b>Application of Incremental Metal Forming for Production of Aircraft Integral Panels</b> M. Tkocz and F. Grosman	243
<b>Analysis of Cracking Process in Conditions of High-Temperature Creep of Castings Form the Modified Superalloy IN-713C</b> M. Cieśla, F. Binczyk and M. Mańka	247
<b>Porosity in Turbine Blades Cast into New Shell Moulds Made of SiC Based Ceramics</b> S. Roskosz	255
<b>Research on Mechanical Properties of Thin Sheets Blanks Made of Creep-Resisting Nickel Superalloys</b> M. Hyrcza-Michalska	259
<b>Analysis of the Cracking Processes of Jointing Components Used in Turbine Valve Chest</b> M. Cieśla and K. Mutwil	263
