Preface

Lamellar Eutectic Growth Patterns.A Survey of Recent Observations in the CBr₄-C₂Cl₆ System	
G. Faivre, C. Guthmann and J. Mergy	1
Dendritic Melting in a Crystal Volume	
A.V. Gorbunov	15
On the Theory of Lamellar Eutectic Growth	
B. Caroli, C. Caroli, K. Kassner and C. Misbah	29
Microscopic Simulation of a Wavefront Propagating into an Unstable State:Internal Fluctuation Effects	
A. Lemarchand, H. Lemarchand and M. Mareschal	49
Liquid-Vapor Coexistence in Binary Mixtures:Atomistic Simulations and One-Fluid Approximations	
E. Salomons and M. Mareschal	65
Morphological Instabilities in Bilayers Incorporating Polycrystalline Silicon	
S. Nygren and F.M. d'Hearle	81
Elastically-Induced Precipitate Shape Transitions in Coherent Solids	
W.C. Johnson and P.W. Voorhees	87
Phases Equilibrium and Diffusion in Solids with Plate-Like Geometry	
F.C. Larché and W.C. Johnson	105
Peculiarities of Intermediate Phase Nucleation in the Process of Chemical Diffusion	
A. Gusak and K.P. Gurov	117
Radiation-Induced Amorphization in Intermetallic Compounds	
C. Jaouen	123
Microscopic Simulation Approach to Amorphization by Chemical Disorder	
C. Massobrio and V. Rosato	147
Latent Track in Magnetic Insulators:Electronic Stopping Power Threshold and Damage Morphology	
M. Toulemonde and F. Studer	161
Stability of Driven Compounds:Stochastic and Deterministic Descriptions	
P. Bellon, F. Soisson, G. Martin and F. Haider	169
Radiation-Induced Microstructural Pattern Formation	
C. Abromeit and H. Trinkaus	181
Self-Organization of Defect Structures under High-Temperature Irradiation-A Theory of Void Lattices	
P. Hähner and W. Frank	203
Self-Organization of Defect Structures under Low-Temperature Irradiation-A Theory of Stacking-Fault-Tetrahedron Lattices	
M. Zaiser, W. Frank and A. Seeger	221
Some Problems in the Physics of Void Lattices	
A.I. Ryazanov	237
Mechanical Attrition of Intermetallic Compounds	
H. Bakker, L.M. Di and D.M.R. Lo Cascio	253
Influence of Milling Conditions on the Formation of Metastable Phases: The Crystal to Amorphous Transition	
Y. Chen, R. Le Hazif and G. Martin	271
On the Instability of Dislocation Microstructures during Plastic Deformation	
A. Luft	285
Mesoscopic Obersvations Related to Twinning Instabilities in Alpha Cu-Al Crystals	
J. Vergnol, F. Tranchant, A. Hampel and H. Neuhäuser	303
The Flow Law of Mild Steel under Monotonic or Complex Strain Path	
E.F. Rauch	317
Plastic Instabilities in AlLi Alloys	
Y. Bréchet, F. Louchet and P. Gomiero	335

Some Physical Effects at Unstable Localized Shear and Fracture of Amorphous Alloys Ribbons	347
V.Z. Bengus	
On the Gradient Approach to Deformation Patterning and Fracture	355
E.C. Aifantis	
A Model of Formation of Dipolar Dislocation Structures	369
J. Kratochvil and M. Saxlová	
Coherent Propagative Structures in Plastic Deformation: A Theory of Lüders Bands in Polycrystals	385
P. Hähner and L.P. Kubin	
The Propagation of the Portevin-Le Chatelier Deformation Bands	403
V. Jeanclaude, C. Fressengeas and L.P. Kubin	
Dislocation Dynamics and Chaos	417
G. Ananthakrishna	
Non-Linear Dynamics of Shear Crack Interaction with Dislocations	429
N.N. Ghoniem	
A Simulation of Dislocation Patterning Derived from Cellular Automata	445
H.W. Hesselbarth and E. Steck	
Dislocation Microstructures and Plastic Flow: A 3D Simulation	455
L.P. Kubin, G. Canova, M. Condat, B. Devincre, V. Pontikis and Y. Bréchet	
Numerical Simulations of Shear Bands in Idealized Granular Materials	473
J.P. Bardet and J. Proubet	
Fractal Description of Fractures	483
C.W. Lung	
Flux Pinning in Type II Superconductors Viewed as a Plasticity Problem	493
Y. Bréchet, B. Doucot, H. Jensen and A. Brass
