

Table of Contents

Editor Note

Neutron Spectrometry and Dosimetry Using CR-39 Detectors

S.P. Tripathy 1

Cosmic Radiation Detection by Solid State Nuclear Track Detector Technique

J. Pálfalvi and L. Sajó-Bohus 16

SSNTD Techniques in Radon Surveys for Hydrocarbon Exploration and Occurrence of Natural Gas Seeps

D. Palacios, L. Sajó-Bohus and E.M. Yoshimura 55

Radon Research in Poland: A Review

T.A. Przylibski 90

Advances in Measurement of Indoor ^{222}Rn and ^{220}Rn Gas Concentrations Using Solid State Nuclear Track Detectors

B.K. Sahoo and B.K. Sapra 116

A Preliminary Study of the Radon and Thoron Concentration Distribution inside a Cellar Using Nuclear Track Detectors (NTDs)

G. Espinosa, J.I. Golzarri and A. Chavarria 127

Emerging Trends in ^{222}Rn and ^{220}Rn Decay Products Detection

R. Mishra, B.K. Sapra and Y.S. Mayya 134

A Comparison of Preliminary Results of Indoor Radon Behaviour between one Occupied and one Unoccupied Dwelling in Madrid, Spain

J. García-Tobar, L.F. Mazadiego and L.S. Quindós-Ponceta 140

Indoor Activity of Short-Lived Radon Progeny as Critical Parameter in Dose Assessment

M. Yuness, A. Mohamed, M. Abd El-Hady, M. Moustafa and H. Nazmy 151

Optically Stimulated Luminescence Dosimetry: An Introduction

W.G. West and K.J. Kearfott 161

Heavy Ion Range Measurements in SSNTD Materials: A Review

P.K. Diwan and H.S. Virk 174

Energy Loss for Swift Heavy Ions in Different Elemental Absorbers: A Different Approach for Effective Charge Parameterization

B. Rani, K. Sharma, Neetu, Anupam, S. Kumar and H.S. Virk 196
