

# Table of Contents

## Preface, Committees and Reviewers

## Chapter 1: Progressive Technologies in Production of Powdered and Particulate Materials

<b>Influence of Opoka Additive on Composite Cement Hydration</b>	
I. Barauskas, R. Kaminskas, A. Stanaitis and I. Vilkaite	3
<b>The Influence of Temperature and Nature of CaO Component on the Formation of <math>\alpha</math>-C<sub>2</sub>SH</b>	
R. Gendvilas and R. Siauciuinas	12
<b>Hiding Power of Aluminum Metal Pigments Development in the Ball Mill Grinding Process</b>	
T. Svérák, P. Bulejko, K. Sikorova, P. Kejik, O. Kristof and M. Raudenský	19
<b>The Synthesis of <math>\alpha</math>-C<sub>2</sub>S Hydrate Substituted with Al<sup>3+</sup> Ions in Mixture with CaO/SiO<sub>2</sub> = 1.75</b>	
K. Baltakys, T. Dambrauskas and A. Eisinas	26
<b>General Comment on Particle Size Analysis</b>	
K. Jesenák, M. Kadlecíková and J. Breza	34
<b>Analysis of Mixing of Particulate Material by a Single Blade</b>	
P. Peciar, M. Peciar and R. Fekete	40
<b>Research of Relations between Thermodynamic Quantities of Building Materials in Connection with Heat Dissipation</b>	
M. Kušnerová, J. Valíček, V. Václavík, M. Harničárová and L. Gola	48

## Chapter 2: Recycling of Powdered and Solid Wastes

<b>Bio-Corrosion Resistance of Concretes Containing Antimicrobial Ground Granulated Blastfurnace Slag BIOLANOVA and Novel Hybrid H-CEMENT</b>	
J. Strigáč, P. Martauz, A. Eštovková, N. Števulová and A. Luptáková	57
<b>Surface Analysis of Plastic Materials PET by XPS Method</b>	
M. Kanuchova, L. Kozáková and I. Brezani	65
<b>Influence of High Dosage of Specific C&amp;DW Micro-Fillers on the Fluidity of Concrete</b>	
A. Sicakova, K. Urban and M. Draganovska	71
<b>Steel Slag as a Substitute for Natural Aggregate in the Production of Concrete</b>	
V. Václavík, T. Dvorský, V. Šimíček, M. Ondová, J. Valíček, M. Kušnerová and L. Gola	77
<b>The Ability of Slag-Portland Cement Composites to Withstand Aggressive Environment</b>	
M. Kovalcikova, A. Eštovková, A. Luptáková and J. Strigac	88
<b>Alkali Activation of Blast Furnace Slag by Various Types of Activators</b>	
P. Mec, J. Boháčová, J. Koňárik and P. Závřský	94
<b>Utilization of Crushed Glass Waste in Concrete Samples Prepared with Coal Fly Ash</b>	
J. Junak	102
<b>Fly Ash Incorporation into the Concrete Composites in Order to Improve their Environmental Performance</b>	
V. Ondrejka Harbulakova, A. Eštovková, A. Luptáková and P. Purcz	108
<b>Studies on Concrete Incorporating Copper Slag as a Fine Aggregate</b>	
E. Terpakova	114
<b>Agglomeration Technologies of Processing Powder Wastes</b>	
M. Peciar, R. Fekete and P. Peciar	121
<b>Development of Fly-Ash Based Hydraulic Backfilling Technology for the Final Closure of Underground Mines</b>	
J. Faitli, J. Böhm, G. Mucsi, I. Gombkötő and R. Weisz	130
<b>Mechanical Properties of Mortars Prepared by Alkali Activated Fly Ash Coming from Different Production Batches</b>	
M. Špak and P. Raschman	140
<b>Characterization of Cellulosic Fibres Properties for their Using in Composites</b>	
V. Hospodarova, E. Singovszka and N. Števulová	146

<b>Role of Key Factors of Particulate Components in Biocomposites</b> N. Števulová, J. Cigasova and I. Schwarzova	153
<b>The Change of Swelling of Pulp Fibres under Recycling</b> A. Geffert, J. Geffertova, N. Števulová and B. Seman	161

## Chapter 3: Atmospheric and Indoor Particulate Matter

<b>Chemical Compositon of PM<sub>10</sub>, PM<sub>2,5</sub>, PM<sub>1</sub> and Influence of Meteorological Conditions on them in Zilina Self-Governing Region, Slovakia</b> D. Ďurčanská and D. Jandačka	171
<b>Measuring of Outdoor and Indoor Particulate Matter Concentrations in Village of Jasov</b> S. Vilčeková, J. Kubinova and E. Kridlova Burdova	182
<b>Atmospheric Deposition of Solid Particles in the Area of Kosice</b> J. Hančuľák, T. Kurbel, E. Fedorová, J. Briančin, O. Šestinová, L. Findoráková and T. Špaldon	188
<b>Particulate Matters Propagation by the Surface Winning</b> K. Lukáčová, M. Badida, M. Moravec and P. Liptai	197

## Chapter 4: Environmental Aspects of Processing and Using of Raw and Bulk Materials

<b>Removal of Cu(II) Ions from Aqueous Solutions by Adsorption onto Natural Bentonites</b> Z. Melichová and M. Handzušová	205
<b>Environmental Assessment of the Concrete Based on Blast Furnace Slag</b> M. Ondová and V. Vaclavík	213
<b>Activated Zeolite and Magnesite as Potential Reactive Materials for Passive Acidic Groundwater Treatment Technology</b> A. Fedoročková, G. Sučík and P. Raschman	221
<b>Elimination of Heavy Metals from the Material of Sludge Bed Slovinky</b> E. Kozáková, M. Zeleňák, T. Bakalár and F. Zeleňák	228
<b>Study of Precipitates from Mine Water after Defrosting and Oxidation</b> M. Balintova, S. Demcak, M. Holub and M. Hurakova	234
<b>The Effect of Sediment Grain Size on Heavy Metal Content in Different Depth in Water Reservoir Ruzin, Slovakia</b> E. Singovszka, N. Junakova and M. Balintova	240
<b>Determination the Availability of Chromium from Powdered Cement Composites Containing Blast Furnace Slag</b> J. Oravec and A. Eštoková	246
<b>Hybrid Sorption and Microfiltration Characteristics of Zeolite</b> Š. Sabo, T. Bakalár, M. Búgel and H. Pavolová	252
