

Table of Contents

Preface

Sintering from Prehistoric Times to the Present

W.D. Kingery 1

Phase Diagrams - Key to Advanced Ceramics Development

K.G. Nickel and G. Petzow 11

Study of Sintering Processes by Positron Annihilation

W. Schatt 23

On the Sintering of Spherical Cu-Powder in Close Packed Compact

I.H. Moon, Y.M. Choi, K.M. Lee and M.J. Suk 29

Study of D_O-Effects on Subsequent Densification Behavior in Spinel and Alumina Ceramics

H. Palmour, M. Geho, R.L. Russell and T.M. Hare 37

Basis for Construction of Simple Sintering Field Diagrams

S. Gowri, J.A. Lund and A.C.D. Chaklader 45

The Effects of Bimodal Particle Size Distribution on Sintering of Powder Injection Molded Compacts

R.M. German and M. Bulger 55

Effects of Trapped Gases on Ceramic-Filled-Glass Composite Densification

K.G. Ewsuk 63

Microstructural Evolution in Liquid Phase Sintering

R.M. German 73

Densification of Ceramic Bodies Containing Controlled Porosity

E.B. Slamovich and F.F. Lange 89

High Green Strength Compacted Powder

A.P. Bromley, F.L. Riley, G.P. Dransfield and T.A. Egerton 97

Wetting of Iron on Sintered TiB₂

V. Ghetta, N. Gayraud and N. Eustathopoulos 105

Adhesion between Fe-Ni Particles

M.D. Bentzon and A.R. Thölén 115

Solid State Reaction Kinetics for the Calcium Zirconate Synthesis

G. Oprea 125

Behavior of Stacking Faults in β-SiC - Mechanism of Annihilation and Additive Effects -

W.S. Seo, C.H. Pai, K. Koumoto and H. Yanagida 133

Microhomogeneity and Sintering of W-Cu Composite Powders Produced by Hydrogen Reduction

J.S. Lee and T.H. Kim 143

Influence of Dislocation Density on Microhardness of Cold Sintered Molybdenum

R. Agatonovic, V. Blank, I. Gridnjeva, A. Radakovic, V. Mikijelj, J. Solpan and M.M. Ristić 151

Magnetically Induced Texturing during the Sintering of Strontium Hexaferrite

H.W. King, E.A. Payzant, J.B. Wallace, S.W. Smith and D.F. Arnold 157

Powder Metallurgy and Nanocrystals

L.I. Trusov, V.I. Novikov and V.N. Lapovok 165

Preparation of Ultrafine Metallic Particles by Hydrogen Reduction of Chloride Vapors

H. Ishikawa, S. Watabiki, S. Takajo and K. Otsuka 175

Sintering Characteristics of Iron Ultrafine Powders

Y. Sakka, T. Uchikoshi and S. Ohno 179

Reduction of Surface Layer Oxides on Synthesized Ultra-Fine Fe-Ni Particles

M.D. Bentzon, S. Linderoth, A.S. Pedersen and M.B. Madsen 187

The Use of Self-Propagating Combustion Reactions for the Preparation and Consolidation of Metallic and Ceramic Powders

Z.A. Munir 197

Theoretical and Experimental Analysis of Ignition of a Gasless SHS Process

Z.Y. Fu, R.Z. Yuan and W.M. Wang 209

Combustion Synthesis of TiC-Al₂O₃-Al Composites	217
A. Petric, P.T.W. Lee and H.C. Yi	
Synthesis of Ti-Al Intermetallic Compounds by Combustion Synthesis	225
H.C. Yi, A. Petric and J.J. Moore	
Combustion Synthesis of the YBa₂Cu₃O_{7-x} Superconductor	233
J.-. Lebrat and A. Varma	
Sintering and Grain Growth of a Synthetic Forsterite	241
Y. Han, K. Hirota and R.C. Bradt	
The Densification and Microstructure of Calcium Titanate	251
H. Pickup	
The Effect of Additives on the Sintering of Tin Oxide	259
J.A. Varela, D. Gouvêa, E. Longo, N. Dolet, M. Onillon and J.P. Bonnet	
Interfacial Segregation of Mg and Ca and its Effect on Microstructural Evolution during Sintering of Alumina	269
S.S. Kim and S. Baik	
Sintering Behaviour of Ceramic Nuclear Fuel Pellets Prepared from Sol Gel Microspheres	277
C. Ganguly	
The Influence of Fe₂O₃ on Stabilization and Sintering of MgO Stabilized Zirconia	285
C.A. Paksoy, J.A. Varela, E. Longo and O.J. Whittemore	
Reaction-Bonding of ZrO₂-Containing Al₂O₃	293
S. Wu and N. Claussen	
Preparation and Sintering of Fine Al₂O₃-Y₂O₃-ZrO₂ Powders by Hydrothermal Precipitation Method	301
K. Hishinuma, T. Kumaki, Z. Nakai, T. Akiba and S. Somiya	
Influence of Additives on Sintering Processing and Properties of High Performance Piezoelectric Ceramics	309
Z. Gui, H. Hu, L. Li and X. Zhang	
Characteristics and Sintering Behaviour of Barium Titanate Powders Obtained by Various Synthetic Routes	317
C.H. Page, C.H. Thombare, V. Varadarajan, S.A. Borkar and A.K. Chatterjee	
Effect of Cooling Conditions and Annealing on Properties of Ferroelectric Relaxor Ceramics	327
Z. Gui, L. Li and X. Zhang	
Sintering of PbNb₂O₆ with Dopants	335
J.E. Chong, A.C.D. Chaklader and E. Prasad	
Dielectric Dispersion in PMN Ceramics	343
R.P. Tandon	
Properties of Lead Titanate Based Ceramic-Polymer Composite for Hydrophone Applications	349
R.P. Tandon	
Phase Transformations of (Bi,Pb)-Sr-Ca-Cu-O Superconductors made by Sol-Gel	355
K. Ma and A.C. Pierre	
O₂-Hipping Effects on Stability of YBa₂Cu₄O₈ Superconductor with AgO and ZnO	363
Y. Sawai, K. Ishizaki, M. Takata and Y. Narukawa	
Sensorlike Effect of YBa₂Cu₃O_y	371
P. Kostic, T. Srećković, M. Kovacevic, L.S. Lukić, V. Mikijelj and M.M. Ristić	
Effect of Sintering Temperature on Superconducting Properties of YBa₂(Cu_{1-x}Mn_x)₃O_y	379
I. Dhingra, R.B. Tripathi, G.K. Padam, S.C. Kashyap and B.K. Das	
Effect of Liquid Phase Sintering on YBCO System	387
S. Saha, R.B. Tripathi and B.K. Das	
Optimization of Processing Parameters for Consolidation of Silicon Nitride by Means of HIP-Dilatometry	393
R. Oberacker, A. Kühne and F. Thümmler	
Effect of Additive Oxide Amount on Gas Pressure Sintering of Silicon Nitride	403
N. Hirosaki, Y. Akimune, T. Ogasawara and A. Okada	
Selection of Sintering Aid for Silicon Nitride for Improvement of Thermomechanical Properties	411
J. Mukerji	

Densification and Mechanical Properties of Pressureless Sintered Beta-SiC with Al₂O₃ and TiO₂ Additions	421
M.D. Vlajić and V.D. Krstić	
Al₂O₃-SiC Composites Using Alumino-Silicate (Natural and Synthetic) Precursor Materials	429
A.C.D. Chaklader, S.D. Gupta, E.C.Y. Lin and B. Gutowski	
Effects of Sintering Aids on Hot Pressing of BN-AlN Composites	437
T. Kanai, K. Tanemoto and H. Kubo	
TEM Analysis of the Dissolution-Reprecipitation α to β Phase Transformation in Y-Si-Al-O-N Ceramics	445
P.A. Walls and M. Ueki	
Comparisons in the Liquid Phase Sintering Behaviour of Different High Speed Steels with Copper Phosphorus Addition	453
J.D. Bolton and H.O. Baah	
Supersolidus Sintering of High Speed Steels - Comparison of Sintering Theory with Experimental Observations	463
C.S. Wright	
Mechanical Properties of PM-Hiped M2 High Speed Steel (HSS)	471
N.C. Kothari	
Liquid Phase Sintering of TiC or TiN Enriched T15 Grade High Speed Steels and their Mechanical Properties	479
G.S. Upadhyaya and P.K. Kar	
Unforeseen Reaction on Sintering of Cemented Carbides	495
K. Thorsen	
Application of Pressure Sinter or HIP in Cemented Carbide Processing	507
M.S. Greenfield, B. North and W.R. Pfouts	
Fabrication of SiC/Mg Composites by Hot-Pressing and Extrusion	515
G. Huard, R. Angers and M.R. Krishnadev	
Sintered Iron-Particulate/Fiber Composites	523
S.K. Mukherjee, B. Cotterell and Y.W. Mai	
Sintering Behavior of a Reactive Sintered Ternary Boride Base Cermet	531
M. Komai, Y. Yamasaki and K. Takagi	
Influence of Sintering Conditions on Structure and Properties of TiN-Base Cermets	539
P. Kisly, O.N. Kaidash and M.A. Kuzenkova	
Thermodynamic Guidelines for the Liquid Phase Sintering of TiB₂ Cermets	543
L. Ottavi, J.M. Chaix, C.H. Allibert and H. Pastor	
Grain Growth of TiC and Ti(C,N) Base Cermets during Liquid Phase Sintering	551
H. Matsubara, S. Shin and T. Sakuma	
Preparation and Application of Metal-Coated Silicon Carbide Particles by Chemical Plating Technique	559
J. Hojo, T. Kuga and A. Kato	
Sintered Wear-Resistant Fe-Basis Alloys with Increased Hard Phase Content	565
B. Märtner and E. Friedrich	
Sintering and HIP of Ternary B2 Ni-Aluminides	573
W.A. Kaysser, R. Laag, J.C. Murray and G. Petzow	
High Nitrogen Steels and Nitrides Obtained by Mechanical Alloying	581
J. Focet and A. Mastorakis	
Microstructure of TiC- and ZrC-Dispersion-Strengthened Coppers Prepared by Application of Mechanical Alloying	589
T. Takahashi	
Improvement of Forging Ability in the Ni-Activatedly Sintered W-Powder Compact by Ni-Removal and Cooling Rate Control	597
I.H. Moon, H.J. Kim, K.Y. Kim, K.M. Lee, S.C. Yoo and J. Choi	
Modelling of Electrical Characteristics of BaTiO₃-Ceramics	603
V. Mitic, Z.S. Nikolić, M.M. Ristić and D.C. Stefanovic	
Effect of Silica Fume and Clays of Particular Mineral Composition on Clinker and its Phases	611
L. Fisang, B. Zivanovic and J. Ranogajec	

Novel Solid State Powder Processing for Amorphous Soft Magnetic Materials	
H. Kimura, S. Kobayashi and K. Toda	619
Rolling Contact Fatigue of Engineering Ceramics	
S. Asada, K. Hashimoto, Y.S. Sato, K. Fukuda and M. Ueki	627
Microstructure Control by Cold Working-Annealing in the Alumina Thin Wiring	
X.M. Chen, J. Kihara and T. Aizawa	635
