

Table of Contents

Preface

Sintering from Prehistoric Times to the Present

W.D. Kingery 1

Phase Diagrams - Key to Advanced Ceramics Development

K.G. Nickel and G. Petzow 11

Study of Sintering Processes by Positron Annihilation

W. Schatt 23

On the Sintering of Spherical Cu-Powder in Close Packed Compact

I.H. Moon, Y.M. Choi, K.M. Lee and M.J. Suk 29

Study of D_O-Effects on Subsequent Densification Behavior in Spinel and Alumina Ceramics

H. Palmour, M. Geho, R.L. Russell and T.M. Hare 37

Basis for Construction of Simple Sintering Field Diagrams

S. Gowri, J.A. Lund and A.C.D. Chaklader 45

The Effects of Bimodal Particle Size Distribution on Sintering of Powder Injection Molded Compacts

R.M. German and M. Bulger 55

Effects of Trapped Gases on Ceramic-Filled-Glass Composite Densification

K.G. Ewsuk 63

Microstructural Evolution in Liquid Phase Sintering

R.M. German 73

Densification of Ceramic Bodies Containing Controlled Porosity

E.B. Slamovich and F.F. Lange 89

High Green Strength Compacted Powder

A.P. Bromley, F.L. Riley, G.P. Dransfield and T.A. Egerton 97

Wetting of Iron on Sintered TiB₂

V. Ghetta, N. Gayraud and N. Eustathopoulos 105

Adhesion between Fe-Ni Particles

M.D. Bentzon and A.R. Thölén 115

Solid State Reaction Kinetics for the Calcium Zirconate Synthesis

G. Oprea 125

Behavior of Stacking Faults in β -SiC - Mechanism of Annihilation and Additive Effects -

W.S. Seo, C.H. Pai, K. Koumoto and H. Yanagida 133

Microhomogeneity and Sintering of W-Cu Composite Powders Produced by Hydrogen Reduction

J.S. Lee and T.H. Kim 143

Influence of Dislocation Density on Microhardness of Cold Sintered Molybdenum

R. Agatonovic, V. Blank, I. Gridnjeva, A. Radakovic, V. Mikijelj, J. Solpan and M.M. Ristić 151

Magnetically Induced Texturing during the Sintering of Strontium Hexaferrite

H.W. King, E.A. Payzant, J.B. Wallace, S.W. Smith and D.F. Arnold 157

Powder Metallurgy and Nanocrystals

L.I. Trusov, V.I. Novikov and V.N. Lapovok 165

Preparation of Ultrafine Metallic Particles by Hydrogen Reduction of Chloride Vapors

H. Ishikawa, S. Watabiki, S. Takajo and K. Otsuka 175

Sintering Characteristics of Iron Ultrafine Powders

Y. Sakka, T. Uchikoshi and S. Ohno 179

Reduction of Surface Layer Oxides on Synthesized Ultra-Fine Fe-Ni Particles

M.D. Bentzon, S. Linderöth, A.S. Pedersen and M.B. Madsen 187

The Use of Self-Propagating Combustion Reactions for the Preparation and Consolidation of Metallic and Ceramic Powders

Z.A. Munir 197

Theoretical and Experimental Analysis of Ignition of a Gasless SHS Process

Z.Y. Fu, R.Z. Yuan and W.M. Wang 209

Combustion Synthesis of TiC-Al₂O₃-Al Composites A. Petric, P.T.W. Lee and H.C. Yi	217
Synthesis of Ti-Al Intermetallic Compounds by Combustion Synthesis H.C. Yi, A. Petric and J.J. Moore	225
Combustion Synthesis of the YBa₂Cu₃O_{7-x} Superconductor J.-. Lebrat and A. Varma	233
Sintering and Grain Growth of a Synthetic Forsterite Y. Han, K. Hirota and R.C. Bradt	241
The Densification and Microstructure of Calcium Titanate H. Pickup	251
The Effect of Additives on the Sintering of Tin Oxide J.A. Varela, D. Gouvêa, E. Longo, N. Dolet, M. Onillon and J.P. Bonnet	259
Interfacial Segregation of Mg and Ca and its Effect on Microstructural Evolution during Sintering of Alumina S.S. Kim and S. Baik	269
Sintering Behaviour of Ceramic Nuclear Fuel Pellets Prepared from Sol Gel Microspheres C. Ganguly	277
The Influence of Fe₂O₃ on Stabilization and Sintering of MgO Stabilized Zirconia C.A. Paksocimas, J.A. Varela, E. Longo and O.J. Whittemore	285
Reaction-Bonding of ZrO₂-Containing Al₂O₃ S. Wu and N. Claussen	293
Preparation and Sintering of Fine Al₂O₃-Y₂O₃-ZrO₂ Powders by Hydrothermal Precipitation Method K. Hishinuma, T. Kumaki, Z. Nakai, T. Akiba and S. Somiya	301
Influence of Additives on Sintering Processing and Properties of High Performance Piezoelectric Ceramics Z. Gui, H. Hu, L. Li and X. Zhang	309
Characteristics and Sintering Behaviour of Barium Titanate Powders Obtained by Various Synthetic Routes C.H. Page, C.H. Thombare, V. Varadarajan, S.A. Borkar and A.K. Chatterjee	317
Effect of Cooling Conditions and Annealing on Properties of Ferroelectric Relaxor Ceramics Z. Gui, L. Li and X. Zhang	327
Sintering of PbNb₂O₆ with Dopants J.E. Chong, A.C.D. Chaklader and E. Prasad	335
Dielectric Dispersion in PMN Ceramics R.P. Tandon	343
Properties of Lead Titanate Based Ceramic-Polymer Composite for Hydrophone Applications R.P. Tandon	349
Phase Transformations of (Bi,Pb)-Sr-Ca-Cu-O Superconductors made by Sol-Gel K. Ma and A.C. Pierre	355
O₂-Hipping Effects on Stability of YBa₂Cu₄O₈ Superconductor with AgO and ZnO Y. Sawai, K. Ishizaki, M. Takata and Y. Narukawa	363
Sensorlike Effect of YBa₂Cu₃O_y P. Kostic, T. Srećković, M. Kovacevic, L.S. Lukić, V. Mikijelj and M.M. Ristić	371
Effect of Sintering Temperature on Superconducting Properties of YBa₂(Cu_{1-x}Mn_x)₃O_y I. Dhingra, R.B. Tripathi, G.K. Padam, S.C. Kashyap and B.K. Das	379
Effect of Liquid Phase Sintering on YBCO System S. Saha, R.B. Tripathi and B.K. Das	387
Optimization of Processing Parameters for Consolidation of Silicon Nitride by Means of HIP-Dilatometry R. Oberacker, A. Kühne and F. Thümmeler	393
Effect of Additive Oxide Amount on Gas Pressure Sintering of Silicon Nitride N. Hirotsaki, Y. Akimune, T. Ogasawara and A. Okada	403
Selection of Sintering Aid for Silicon Nitride for Improvement of Thermomechanical Properties J. Mukerji	411

Densification and Mechanical Properties of Pressureless Sintered Beta-SiC with Al₂O₃ and TiO₂ Additions	
M.D. Vlajić and V.D. Krstić	421
Al₂O₃-SiC Composites Using Alumino-Silicate (Natural and Synthetic) Precursor Materials	
A.C.D. Chaklader, S.D. Gupta, E.C.Y. Lin and B. Gutowski	429
Effects of Sintering Aids on Hot Pressing of BN-AlN Composites	
T. Kanai, K. Tanemoto and H. Kubo	437
TEM Analysis of the Dissolution-Reprecipitation α to β Phase Transformation in Y-Si-Al-O-N Ceramics	
P.A. Walls and M. Ueki	445
Comparisons in the Liquid Phase Sintering Behaviour of Different High Speed Steels with Copper Phosphorus Addition	
J.D. Bolton and H.O. Baah	453
Supersolidus Sintering of High Speed Steels - Comparison of Sintering Theory with Experimental Observations	
C.S. Wright	463
Mechanical Properties of PM-Hipred M2 High Speed Steel (HSS)	
N.C. Kothari	471
Liquid Phase Sintering of TiC or TiN Enriched T15 Grade High Speed Steels and their Mechanical Properties	
G.S. Upadhyaya and P.K. Kar	479
Unforeseen Reaction on Sintering of Cemented Carbides	
K. Thorsen	495
Application of Pressure Sinter or HIP in Cemented Carbide Processing	
M.S. Greenfield, B. North and W.R. Pfouts	507
Fabrication of SiC/Mg Composites by Hot-Pressing and Extrusion	
G. Huard, R. Angers and M.R. Krishnadev	515
Sintered Iron-Particulate/Fiber Composites	
S.K. Mukherjee, B. Cotterell and Y.W. Mai	523
Sintering Behavior of a Reactive Sintered Ternary Boride Base Cermet	
M. Komai, Y. Yamasaki and K. Takagi	531
Influence of Sintering Conditions on Structure and Properties of TiN-Base Cermets	
P. Kisly, O.N. Kaidash and M.A. Kuzenkova	539
Thermodynamic Guidelines for the Liquid Phase Sintering of TiB₂ Cermets	
L. Ottavi, J.M. Chaix, C.H. Allibert and H. Pastor	543
Grain Growth of TiC and Ti(C,N) Base Cermets during Liquid Phase Sintering	
H. Matsubara, S. Shin and T. Sakuma	551
Preparation and Application of Metal-Coated Silicon Carbide Particles by Chemical Plating Technique	
J. Hojo, T. Kuga and A. Kato	559
Sintered Wear-Resistant Fe-Basis Alloys with Increased Hard Phase Content	
B. Märtner and E. Friedrich	565
Sintering and HIP of Ternary B₂ Ni-Aluminides	
W.A. Kaysser, R. Laag, J.C. Murray and G. Petzow	573
High Nitrogen Steels and Nitrides Obtained by Mechanical Alloying	
J. Foct and A. Mastorakis	581
Microstructure of TiC- and ZrC-Dispersion-Strengthened Coppers Prepared by Application of Mechanical Alloying	
T. Takahashi	589
Improvement of Forging Ability in the Ni-Activatedly Sintered W-Powder Compact by Ni-Removal and Cooling Rate Control	
I.H. Moon, H.J. Kim, K.Y. Kim, K.M. Lee, S.C. Yoo and J. Choi	597
Modelling of Electrical Characteristics of BaTiO₃-Ceramics	
V. Mitic, Z.S. Nikolić, M.M. Ristić and D.C. Stefanovic	603
Effect of Silica Fume and Clays of Particular Mineral Composition on Clinker and its Phases	
L. Fisang, B. Zivanovic and J. Ranogajec	611

Novel Solid State Powder Processing for Amorphous Soft Magnetic Materials H. Kimura, S. Kobayashi and K. Toda	619
Rolling Contact Fatigue of Engineering Ceramics S. Asada, K. Hashimoto, Y.S. Sato, K. Fukuda and M. Ueki	627
Microstructure Control by Cold Working-Annealing in the Alumina Thin Wiring X.M. Chen, J. Kihara and T. Aizawa	635
