

Preface

The 23rd International Conference Concrete Days 2016 was held in Litomyšl, Czech Republic from November 30 to December 1, 2016. The conference was organised by Czech Concrete Society in Prague.

More than 300 people participate in the conference. The participants were from the Czech Republic, Austria, Brazil, Croatia, Germany, Italy, South Korea, Poland, Slovakia, Serbia and Switzerland.

Selected scientific papers are published in this scientific international journal.

The papers introduce recent research results in area of modern concretes and concrete structures, discussed issues of modelling and design of concrete structures, bridges and buildings, properties of concretes and also the significant structural projects and realizations.

The conference organizers would like to thank all speakers, session chairpersons, invited speakers and participants for making this conference successful.
