

Table of Contents

Preface

Chapter 1: Synthesis and Characterization of Nanomaterials: Morphological and Structural Properties

Synthesizing Alkaline Earth Metal Hydroxides Nanoparticles through an Innovative, Single-Step and Eco-Friendly Method

G. Taglieri, V. Daniele and L. Macera

3

Morpho-Structural and Chemical Composition Properties of PVP-Capped ZnO Nanoparticles Synthesized via a Simple-Polyol Method

G. Flores-Carrasco, J.R. Mora, R. Ramírez, C. Bueno, S. Alcántara-Iniesta, B.S. Soto and M.E. Rabanal

15

Synthesis and Characterization of Multi-Angular Branched ZnO Microstructures and Peculiar Nanopushpins Obtained by Thermal Treatment from Compacted ZnS Powder

J.R. Mora, G. Flores-Carrasco, M. Pacio, T.G. Díaz-Rodríguez and H. Juárez

23

Chapter 2: Synthesis of Nanomaterials: Evaluation of Electrical and Optical Properties

Growth Mechanism and Optical Properties of Nano and Microstructures of ZnO Obtained by Thermal Oxidation of Zinc Powders at Atmospheric Pressure

C. Bueno, A. Pacio, E. Osorio, J.A. Alvarado, D. Maestre, A. Cremades, J.A. García, G. Flores-Carrasco and H. Juárez

33

Photoluminescence of Hybrid Structure Base in ZnO@SiO₂ Core-Shell Nanoparticles inside Porous Silicon

X. Leon, E. Osorio, R. Pérez-Cuapio, C. Bueno, M. Pacio, A. Cortés and H. Juárez

40

WO₃:Mo and WO₃:Ti Thin Films Deposited by Spray Pyrolysis: The Influence of Metallic Concentration on Physical Properties: An Electron Microscopy and Atomic Force Study

D.R. Acosta, F. Hernández, A. López-Suárez and C. Magaña

49

Structural, Morphological, Optical, and Electrical Characterization of Fluorine Doped Tin Oxide (FTO) Thin Films Synthesized by PSP

R. Ramírez-Amador, G. Flores-Carrasco, S. Alcántara-Iniesta, J. Rodríguez González, O. García-Teniza, E. Mercado-Agular and A.B. Vásquez-Ortiz

64

Chapter 3: Applications of Nanomaterials in Treatments for Conservation, Restoration and Protecting of Cultural Heritage

New Advances in the Use of Multifunctional Nanomaterials in Conservation-Restoration of Artistic and Archaeological Heritage

A. Carvajal-Perez

75

Evaluation of Multi-Functional Silica-Based Nano-Products for Consolidating and Protecting Stone Material from Archaeological Sites

N. Perez-Ema and M. Alvarez de Buergo

95

Evaluation of Nanostructured Coatings for the Protection of Apuan Marble Stone

S. Germinario, F. Fernandez, G. Baldi, V. Dami and A. Cioni

105

Chapter 4: Application of Nanoparticles in Construction Materials

The Role of Nanoparticles on the Durability of Lime-Pozzolan Binding System

E.C. Tsardaka, E. Pavlidou and M. Stefanidou

119

Comparative Study of the Properties of Cement Pastes Modified with Nano-Silica and Nano-Alumina

E. Tsampali, E.C. Tsardaka, E. Pavlidou, K.M. Paraskevopoulos and M. Stefanidou

133

Enhancing Properties of Clay Mortars Using Nano-Additives

A. Karozou, E. Pavlidou and M. Stefanidou

145
