

Table of Contents

Preface

Optical and Electrical Investigation of Electrospun PAN/TiO₂, Bi₂O₃, SiO₂ Composite Thin Films

W. Matysiak 1

Electrospinning as a Versatile Method of Composite Thin Films Fabrication for Selected Applications

W. Matysiak, T. Tański and W. Smok 35

Study of Photovoltaic Devices with Hybrid Active Layer

P. Jarka, T. Tański, B. Hrapkiewicz, B. Hajduk, K. Bystroń, M. Krzesiński and W. Uchacz 51

The Pastes with Prototype Additive Deposited on Front Side Metallization Used in Photovoltaic Solar Cells

M. Musztyfaga-Staszuk 65

Polymeric Electrolyte Thin Film for Dye Sensitized Solar Cells Application

M.M. Szindler 73

Optical Thin Films of Metal Oxides Produced by the Sol-Gel Method for Photovoltaic Applications

M. Szindler 83

Application of PVD and ALD Methods for Surface Treatment of Al-Si-Cu Alloys

M. Staszuk 97

Various Applications of Multifunctional Thin Films with Specific Properties Deposited by the ALD Method

P. Boryło, M. Szindler and K. Lukaszewicz 111

Assessment of Tribological Properties of Low Friction Thin Layers Produced by Vacuum Methods

A. Paradecka, K. Lukaszewicz and J. Sendor 125

Comparison of the Structure of AlCrSiN Coating Produced by Planar and Rotating Arc Technology

J. Galeja and K. Lukaszewicz 141
