

Preface

The 2018 Asia Conference on Material and Manufacturing Technology (ACMMT 2018) was held in Beijing, China during September 14-16, 2018. It is indeed a great privilege for us to present the proceedings of ACMMT 2018, to the wide range of readers. We hope you will find it informative and useful.

The conference has attracted papers from many international researchers and scholars in this field with burgeoning applications touching upon various sectors. The aim of ACMMT 2018 was to provide a professional platform for discussing research issues, opportunities and challenges of Materials and Manufacturing Technology. With the support received and the enthusiasm witnessed truly exceeding our expectations and thanks to our efforts, we tried to spread the news about ACMMT 2018 to as many relevant researchers in the world as possible. Towards that we were blessed with an energetic team, the members of which worked side-by-side which resulted in optimization of coordination among all.

The response to the call-for-papers had been significant – both from China as well as overseas. Unfortunately, due to capacity constraints, we could only host a fraction of them. We would like to sincerely thank the various contributors, reviewers, organizing committee members for providing a platform for a great conference setting for engaging discussions among the participants.
