

## Preface

Fifth Asian School-Conference on Physics and Technology of Nanostructured Materials (ASCO-NANOMAT 2020) has been held under the auspices of the Institute of Automation and Control Processes of Far Eastern Branch of Russian Academy of Sciences and Far Eastern Federal University, in Vladivostok on July 30 - August 3, 2020. ASCO-NANOMAT 2020 was intended as a forum for senior and young scientists and technologists from Asian and European universities, academic institutes and industrial enterprises where they can present their latest findings

and develop new synergies in the field of Physics and Technology of Nanostructured Materials and related subjects.

Vladivostok is a Russian city in Far Eastern region, geographically close to Asian countries: China, Japan, Korea, India, Taiwan, Australia and others. Therefore, the first aim of this School-Conference is to stimulate multidisciplinary contacts and cooperation between scientists from Asia and Europe. Russia here acts as a bridge connecting two parts of the World. The second aim is to give to young scientists the opportunity to deliver their presentations on the international conference and encourage them by the award for the best oral or poster report. The third aim of this forum is to select new unpublished results of young scientists and publish them in the special issue of Solid State Phenomena (SSP).

All the aims have been achieved. The School-Conference was successful. 20 invited, 62 oral and 98 poster reports have been presented by the participants, including noted professors, young scientists and post graduate students from 10 Asian and European countries. The ASCO-Nanomat 2020 was a multidisciplinary school-conference, which has been held for the fourth time, and had six scientific sections:

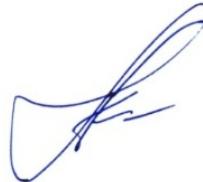

- Physics of nanostructures and interfaces, self-organization processes
- Physics of semiconducting nanostructures and heterostructures, including silicide, germanide and stannide heterostructures: experiment, calculations and technology
- 4th group material's alloy based on Si, Ge, Sn и Pb: formation, structure and properties
- Formation and properties of ferromagnetic and ferroelectric materials, sensors and spintronics
- Laser nanofabrication and laser technology for nanomaterials
- Nanostructured coverages, nanocomposites, functional hybrid materials: formation, structure and properties

The Publishing Committee and International Program Committee have selected 58 unpublished articles, which were recommended for publication in the SSP book as selected Proceedings. The one presented here is named "Physics and Technology of Nanostructured Materials V".

We, the Organizing Committee, are very pleased to publish selected articles of "ASCO-NANOMAT 2020" for scientists, researchers and students with interest in the physics and technology of nanostructured materials.

We would like to take this opportunity to thank all authors, Invited lectors and the Organizing Committee and International Program Committee members for their contributions to the conference.

## Chair of ASCO-NANOMAT – 2020

Professor Nikolay GALKIN (Institute of Automation and Control Processes FEB RAS and Far Eastern Federal University, Vladivostok, Russia)

### Honour Chairpersons

Academician, professor  
Yuri KULCHIN  
Vice-President Far Eastern Branch of RAS,  
Scientific director of Institute of Automation and  
Control Processes FEB RAS  
Vladivostok, Russia

Academician, professor  
Aleksandr SERGIENKO  
President Far Eastern Branch of RAS, Vice-  
president of RAS  
Vladivostok, Russia

### International Program Committee

Corr. Memb. RAS A.A. Saranin (Vladivostok, Russia) – chair

Academician MAS. E. Arushanov (Chisinau,  
Moldova)  
Prof. R.M. Bayazitov (Kazan', Russia)  
Prof. R.Z. Bakhtizin (Ufa, Russia)  
Prof. V.E. Borisenko (Minsk, Belarus)  
Academician Yu.A. Chaplygin (Moscow,
