

Preface

Brno University of Technology, Faculty of civil engineering, Department of building materials and Centre AdMaS organized already the 18th International Conference Silicate Binders 2019 that was held with international participation under the abbreviation ICBM 2019. The scientific and practical knowledges of civil engineering industrial binders and materials were presented on this conference. The most important topics on the conference were chemistry and technology of cement and inorganic binders, chemistry and technology of conventional and refractory concrete production. Special attention was paid to the use and behaviour of these mentioned binders in the various kind of building materials, like concrete, inorganic insulations and in solidified sludges.

The newest knowledge and progressive trends in the field of binders and cement based materials were presented on this conference.
