

Preface

This volume contains peer-reviewed papers presented at the 9th International Conference on Materials Science (ICMS2020) held at Ulaanbaatar, Mongolia, September 10-12, 2020. The conference was organized by the National University of Mongolia, Mongolian Physical Society, Institute of Physical Material Science, SB RAS, Russia, and Inner Mongolia Normal University, China.

The conference's main objective was to bring together scientists from around the world who are working in the field of materials science to exchange ideas, recent research advancements in this area and offer a platform for the initiation of future scientific cooperation between international scientists.

This edition focuses on studying the structure, properties, and applications of new materials and methods of materials characterization. All papers were reviewed by two or three members of the scientific board of the conference and by external reviewers.

We want to express our special thanks to sponsors of this conference, reviewers of papers, and conference participants for making this conference successful.

Finally, we would like to thank the Trans Tech Publishing Ltd Scientific Team for helping us publish this issue.
