Preface

Chapter 1: Binders Based on Cementitious Composites

A Numerical Approach to Multiscale Simulation of Cement Paste Strength M. Hlobil and K. Sotiriadis	3
Effect of Waste Glass on Portland Cement Hydration Process E. Serelis and V. Vaitkevicius	9
The Influence of Chrysotile Nanofibers Dispersion on the Physical and Mechanical Properties of the Cement Matrix G.I. Yakovlev, R. Drochytka, V. Grakhov, Z.S. Saidova, I.S. Polyanskikh and I. Pudov	21
Prediction of Sulfate Attack Products in Portland-Limestone Cements: The Effect of Cation Type and Concentration K. Sotiriadis and M. Hlobil	28
New Possibilities of Determining the Resistance of Cement Composite to Abrasion by Fast Flowing Water O. Pikna, M. Ťažký and R. Hela	34
Characterization of Carbonatation Rate of Alkali-Activated Blast Furnace Slag in Various Environments R. Dvořák, P. Hrubý and L. Topolář	40
The Effect of Opal-Containing Rocks on the Properties of Lightweight Oil-Well Cement F.L. Kapustin, N.N. Bashkatov and R. Hela	47
Influence of the Chemical Composition of Bauxite on Mineral Formation and Properties of Sulfoaluminate-Ferrite Cement A.A. Ponomarenko, F.L. Kapustin, E. Makarova and E.S. Gerasimova	53
Scale Bridging in Computational Modelling of Quasi-Brittle Fracture of Cementitious Composites J. Vala, V. Kozák and M. Jedlička	59
Use of Spongilites as Pozzolan Additives in Cement Mortars M. Vyšvařil, P. Bayer and T. Žižlavský	65
Monitoring of the Effect of Grinding Raw Material Mixture and Soaking on the Formation of Monoclinic Phases of Alite S. Ravaszová and K. Dvořák	71

Chapter 2: Binders Based on Lime and Gypsum

The Influence of Phosphogypsum Microstructure on the Main Properties of Press-Formed Samples I.V. Fornes, D. Vaičiukynienė, V. Doroševs and D. Nizevičienė	79
Mechanical Properties of Reproduced Historic Mosaic Mortar P. Bauerová, P. Reiterman, M. Kracík Štorkánová and M. Keppert	86
Properties Affecting the Reactivity of Lime D. Sklenářová, K. Dvořák and D. Dolák	92
Decomposition of Crystalline Limestones during the Burning Process D. Sklenářová, K. Dvořák and D. Dolák	98
Gypsum Compositions Modified with Metallurgical Wastes G.I. Yakovlev, A. Gordina, N. Ruzina, I.S. Polyanskikh, I. Pudov, A. Shaybadullina, V. Khozin and V. Černý	104

Chapter 3: Progressive Materials and Technologies in Construction

Design of High-Strength Concrete for Ready-Mixed Concrete Production M. Ťažký and K. Křížová	113
--	-----

Directed Regulation and Localization of Electrical Properties for Composite Construction Materials	
A.N. Gumenyuk, I.S. Polyanskikh, I. Pudov, P.E. Shevchenko, N.V. Kuzmina and G.I. Yakovlev	119
The Influence of Shrinkage-Reducing Additives on Volume Changes and Mechanical Parameters of a Concrete Composite	
M. Meruňka, L. Ťažká and R. Hela	125
Degradation of Materials Based on Alkali-Activated Blast-Furnace Slag after Exposure to Aggressive Environments	
I. Plšková, P. Hrubý, L. Topolář and M. Matysík	131
Metakaolin Addition to Improve Geopolymerization Process and Properties of Waste Clay-Based Materials	
C. Sgarlata, A. Formia, F. Ferrari, F. Piccolo and C. Leonelli	137
Influence of Nitrate Species ANO_3 and $\text{ANO}_3 \cdot n\text{H}_2\text{O}$ on Physico-Mechanical Properties of the Aluminosilicate Adhesives for Wood and Wooden Structures	
S.G. Guzii, I. Bazhelka, V. Romaniuk and S.D. Lapovska	143
Cement-Bonded Sub-Base Layers of Walkable and Running Structures for Rainwater Management	
M. Ťažký, R. Hela and M. Hubertová	150
Study of High Strength Concretes with Variability of Composition Designs	
K. Křížová, M. Ťažký, M. Meruňka and O. Pikna	156
Study on Permeability of Concrete Fortifications from WW2 Based on Mercury Intrusion Porosimetry	
J. Zatloukalová, J. Pazderka, P. Lukáš and P. Reiterman	162
Possibilities of Using Pumice Aggregates into Thermal Insulation Lining of Industrial Chimneys	
M. Pešata, L. Procházka and J. Boháčová	168
Thermal and Thermomechanical Properties of Refractory Forsterite-Spinel Ceramics	
M. Nguyen and R. Sokolař	174
Influence of Fly Ash on Corrosion Resistance of Refractory Forsterite-Spinel Ceramics	
M. Nguyen and R. Sokolař	181
Analysis of Alkali Oxides Influence on the Microstructure of Refractory Grog	
L. Nevřivová and D. Zemánek	188
Analysis of the Effect of Crystallization Additives on the Resistance of Self-Compacting Concrete Exposed to Aggressive Gases	
Á. Dufka, T. Žlebek and T. Melichar	194
The New Chemically Resistant Material for the Invert Grouting Optimized by Secondary Raw Material	
P. Figala, R. Drochytka and V. Černý	200
Thermo-Mechanical Behavior of Fire Protection Boards	
U. Diederichs, S. Jäntsich and D. Sklenářová	209
