

Table of Contents

Preface

Chapter 1: Progress in Semiconductor Technologies

Past, Present, and Future of Semiconductor Cleaning Technology	
T. Hattori	3
Nanosheet-Based Transistor Architectures for Advanced CMOS Scaling: Wet Etch and Gas Phase Etch Challenges in Confined Spaces	
H. Mertens	8
On Gas-Phase Selective Dry Etching in 3D Inflections	
N. Ingle	14

Chapter 2: Selective Etching of SiGe Alloy Semiconductors

SiGe Selective Etching to Enable Bottom and Middle Dielectric Isolations for Advanced Gate-All-Around FET Architecture	
H. Kawarazaki, T. Nakano, T. Ishizu, T. Tanaka, W. Liu, J. Chen, T. Kawashima, A.P. Wu, F. Sebaai, J.G. Lai, O. Yusuke and E. Altamirano-Sanchez	23
Selectivity Tuning by Peroxide Concentration for the Selective Etching of SiGe20 to Si and SiGe40 to SiGe20	
F.J. Lopez Villanueva, F. Sebaai, E. Altamirano-Sanchez and A. Klipp	29
Investigation of Selective Wet Etching of SiGe Substrates for High-Performance Device Manufacturing	
D.G. Kim, G. Vereecke, P. Puttarame Gowda, K. Wostyn, T.G. Kim, J.G. Park and E. Altamirano-Sanchez	34
Highly Selective Etching of SiGe to Si for GAAFET	
S.H. Lee, W.J. Lee and S.W. Lim	40

Chapter 3: Surface Chemistry of Group IV Semiconductors

Atomic Level Chemical and Structural Properties of Silicon Surface and Initial Stages of Oxidation	
P. Laukkanen	49
Effects of Ultrahigh Vacuum Treatments on Wet Chemically Cleaned Si Surfaces	
Z.J. Rad, M. Miettinen, M. Punkkinen, P. Laukkanen, K. Kokko, V. Vähänissi and H. Savin	57
Silicon and Germanium Corrosion by Fluorinated Chemistry in Presence of Wafer Charging	
P. Garnier and C. de Buttet	63
Study on Alternative Dipole Material Wet Clean by pH Controlled Functional Water	
Y. Tanaka, N. Gan, Y. Ogawa, H. Iino, R.J. Chang, S. Homkar, G. Alessio Verni, M. Givens, J.G. Lai, A. Pacco, S. Brus, H. Arimura, Y. Oniki, E. Altamirano-Sanchez, F. Holsteeyns and N. Horiguchi	69
Reaction Mechanism Analysis of Si Selective Etching for Gate-All-Around Transistors by Molecular Simulations	
D. Yuhara, K. Ikeda, M. Mikami, K. Shiratori, H. Shirae, L.J. An and T. Kasai	74

Chapter 4: Surface Chemistry of Compound Semiconductors

Surface Characterization - Gallium Nitride Depth Profiling with LEIS	
S. Natemeyer, P. Fischer, R. Fischer and M. Valtiner	83
Effect of Post-Etch Wet Cleaning on GaAs Surfaces	
T. Hirano, S. Saito, Y. Hagimoto and H. Iwamoto	91

Chapter 5: Pattern Collapse in Semiconductor Device Manufacturing

Pattern Collapse Simulation in CMOS Image Sensors Devices P. Garnier, C. Sart, E. Prevost, J. Dubois and B. Vianne	99
Observation of Capillary Condensation and Pattern Bending Phenomena in Si Nanopillars Using <i>In Situ</i> TEM Z. Aabdin, X.M. Xu, F.Y. Leong, F. Holsteyns and U. Mirsaidov	105
Improvement of F fingering-Induced Pattern Collapse by Adjusting Chemical Mixing Procedure J.W. Choi, S.J. Choi and J.S. Choi	111
Modeling of Capillary Pattern Collapse on Sub-5nm Pillars Using Molecular Dynamics D.W. Bassett, D. Aryal and A. Rotondaro	117
Insights into FinFET Structure Collapse: A Reactive Force Field-Based Molecular Dynamics Investigation R. Seki, N. Fujiwara, M. Sato, Y. Okuno and M. Kubo	123

Chapter 6: Etching of Dielectrics

Silicon Nitride Selective Functionalization with Aqueous Cellulose K. Mochida	131
Selective Si₃N₄ Etching for 3D NAND Integration by Using Low Concentration of H₃PO₄ T.G. Park, J.W. Han and S.W. Lim	137
Investigation of Oxide Regrowth in the Selective Si₃N₄ Etching Process for 3D NAND Fabrication by Using Finite Element Modeling Simulation T.H. Kim, Y.S. Lee, J.W. Han and S.W. Lim	143
Methods for Uniform Wet Etching in Narrow Trenches and Vias S. Kumari, S. Hu and P. D'elia	149

Chapter 7: Assessment and Control of Contaminations in Technological Fluids and Air

Application of Hydrosol to Aerosol Based Metrology to Predict Wafer Defects from Process Chemical Contamination D. Oberreit, G. Van Schooneveld, A. Altun, M. Walker and H. Mizusugi	157
Nanoparticle Analyzing Technique Review and Sub-10 nm Nanoparticle Sizing Methods Comparison S.W. Liu	164
On-Line Metal Concentration Measurement at an Ultra-Trace Level in DIW by Solid Phase Extraction Method Coupled with ICP-MS K. Tsutano, A. Tezuka, A. Tsuda and T. Ichinose	170
Real Time AMC Monitoring with Novel Chemical Ionization Mass Spectrometry at Single-Digit pptv Concentrations P. González-Aguirre, A. Wild, L. Degaches, E. Amade, C. Frege and F. Lopez-Hilfiker	176
Monitoring of Trace Molecular Impurities in Clean-Room Air K. Kenis, P. Mertens, E. Altamirano-Sanchez, J. Van Ongeval and M. De Vita	183
Investigation of Effects of Sulfuric Acid in Single Wafer Cleaning Process Using Isopropyl Alcohol S.J. Oh, S.N. Song, J.Y. Jeon, S.Y. Lee and T.S. Kim	189

Chapter 8: Contaminations on Wafer Surfaces

Direct Analysis of Si, SiC and GaN Wafers by LA-GED-MSAG-ICP-MS K. Suzuki, T. Ichinose and K. Kawabata	197
------------------------------------------------------------------------------------------------------------------	-----

Chemical Identification of Sub-20 nm Defects and Sub-Monolayer Residues with Nano IR PiFM

D. Nowak, P. O'Reilly, S. Park and T. Albrecht	204
Development of Intentional Contamination in Iron by Bath for Silicon Wafers and Evaluation of VPD-Bulk and LPD-Bulk for Metallic Contaminants Analyses by ICPMS	
V. Yim, D. Truffier-Boutry, A. Mukhtarov and A. Galtayries	210
Defect Mapping and Densification in Self-Assembled Monolayers of Octadecyltrichlorosilane on SiO₂	
Y. Miyamoto, Y. Yoshida, T. Utsunomiya, S. Kunieda, Y. Ueda, M. Sanada and H. Sugimura	216
Fine Edge and Bevel Film Cut Accuracy by a Novel and High Precision Wafer Centering System	
F.P. Chen, W. Zhang, F.J. Jia, K.X. Wu, W.J. Wang, X.Y. Zhang, D.H. Wang, J. Wang, J. Wang, H. Han, S.A. Henry and S.N. Jia	222

Chapter 9: Modelling of Wet Etching and Cleaning Processes

Fluid Simulation over a Rotating Disk: Momentum and Mass Transfer across the Wafer Boundary

N. Belmiloud, M. Sato and Y. Okuno	231
------------------------------------	-----

Etch Profile Prediction Model Using Convolutional Neural Network

M. Tokuyama and K. Shinohara	236
------------------------------	-----

ESD Prevention Technology for Two-Fluid Pure Water Spray Cleaning with Controlled Electrostatic Charge

Y. Seike, H. Suzuki, Y. Ichino and T. Mori	244
--------------------------------------------	-----

Chapter 10: Particle Removal

Parametric Studies on Particle Removal and Erosion in Nozzle Injection Megasonic Cleaning

T. Ishibashi, H. Matsuo, K. Watanabe, R. Sakota, H. Usui and K. Ando	253
----------------------------------------------------------------------	-----

Optimal Injection Distance in Ultrasonic Water Flow Cleaning

K. Ando, R. Sakota, H. Usui, T. Ishibashi, H. Matsuo and K. Watanabe	258
----------------------------------------------------------------------	-----

Design of "Soft" Cleaning Processes for Emerging Substrates via Stimuli Responsive Chemistry

K.A. Cahue, J.L. Powell, A.T. Caridi, R.J. Gentile, P.M. Smith and J.J. Keleher	263
---------------------------------------------------------------------------------	-----

Evaluation and Optimization of Particle Removal with a Resist Peeling Method

T. Mercadier, P. Garnier, V. Loup, R. Tiron, S. Zhang, A. Higuchi and N. Belmiloud	268
------------------------------------------------------------------------------------	-----

Pinpoint Particle Removal for EUV Pellicle Productivity Enhancement

T.G. Kim, H.G. Kang, G.R. Ha, J.H. Ahn, S.S. Lee and J.G. Park	275
----------------------------------------------------------------	-----

Electrostatic-Induced Particle Behavior Simulation Framework in Cleaning Process: Interaction between Solid-Liquid Interfaces

J.Y. Lee, J.K. Hwang, D.J. Shin and T.S. Kim	280
----------------------------------------------	-----

Chapter 11: Sustainability Aspects in Wet Processing

Sulfuric Acid Reduction in Post-Ash Cleans

Y. Escarabajal, L. Caron, P. Garnier, J. Ma, T. Mercadier and C. Richard	289
--------------------------------------------------------------------------	-----

Reduction of Process Chemicals and Energy Use in Single-Wafer Process Applications

J. Snow, C. Miller, R. Tanaka, J. Shibukawa, N. Hiroki, Y. Tetsuya, H. Masayuki, S. Nobuyuki and E. Toru	296
----------------------------------------------------------------------------------------------------------	-----

Eco-Friendly SPM Alternative Resist Stripping with High-Concentration O₃-Water Technology

T. Jizaimaru, T. Funakoshi, T. Sakai, H. Fujimoto and Y. Shirai	302
-----------------------------------------------------------------	-----

Chapter 12: Materials and Technologies for Interconnects

Slurry Activation for Enhanced Surface Redox Reactions in CMP	311
A. Philipossian, Y. Sampurno, F. Redeker, K.A. Cahue and J.J. Keleher	
New Quaternary Amines and Solvents for Photoresist Developing and Stripping Applications	318
H. Zhou, K. Zhang, A.Y. Yan, V. White, R. Maus and T. Griot	
Alkali Wet Chemicals for Ru with Advanced Semiconductor Technology Nodes	325
Y. Kikkawa, Y. Suzuki, K. Saito, H. Yarimizu, S. Kanamori, T. Sato and T. Nagashima	
Wet Cleaning of Ru Semi-Damascene 18 MP Structures	331
H.O. Güvenc, A. Klipp and Q.T. Le	
A Cleaning Method for Post-Etch Ruthenium Residue Removal Using UV and Liquid Chemical	335
T. Nakano, Q.T. Le, H. Kawarazaki, T. Tanaka and E. Altamirano-Sanchez	
Wet Cleaning/Etching of NiAl Thin Film	341
Q.T. Le, E. Gül Arslan, K. Fundu, J.P. Soulie and E. Altamirano-Sanchez	
Plasma Oxidation of Patterned Mo Nanowires for Precise and Uniform Dry Etching	346
I. Erofeev, M.M. Khan, Z. Aabdin, A.R. Chowdhuri, A. Pacco, H. Philipsen, F. Holsteins and U. Mirsaidov	
Controlled and Uniform Wet Etching of Molybdenum Nanowires	351
K.R. Deng, I. Erofeev, A.R. Chowdhuri, K. Saidov, Z. Aabdin, A. Pacco, H. Philipsen, F. Holsteins, H.V. Huynh and U. Mirsaidov	
Selective Removal of Various Resilient Ionic and Halides-Based Surface Contaminants by Wet Cleaning	356
M. Audouin, A. Passelande, P. Garnier, M. Neyens, M. Vandenbossche, L. Gabelle, V. Loup, L. Crochemore and J. Daviot
