

Table of Contents

Preface

Chapter 1: Green Building Materials

Use of Alternative Raw Materials for the Production of Fiber Cement Products M. Hoško, L. Bodnárová and O. Pikna	3
Research of a New Chemically Resistant Repair Mortar Modified with Secondary Raw Materials P. Figala, R. Drochytka and L. Mészárosová	9
The Influence of Organic Fibers on the Fire Resistance of Concrete J. Klobása and R. Hela	15
Reduction of Firing Temperature by Utilization of Secondary Materials for the Synthesis of Forsterite Ceramics M. Nguyen and R. Sokolař	21
Effect of Secondary Fillers in Polymeric Material for CIPP on Fresh Processability K.H. Jakubíková and R. Drochytka	27
Possibilities of Determining K-Value and Activity Index for Ground Granulated Blast Furnace Slag P. Šperling and R. Hela	33

Chapter 2: Silicate Materials

Resistivity Changes of Electrically Conductive Silicate Composites Loaded in Different Directions S. Baranek, V. Uher and V. Černý	41
The Effect of the Type of Gelling Agent on the Speed of Gelation of Sol-Gels J. Majerová, D. Sklenářová and L. Nevřivová	47
Verification of the Electrical Impedance Method for Measuring the Humidity of Silicate Material E. Hrabalkova, D. Powetz, D. Prusa and S. Stastník	53
The Effect of the Gelling Agent on the Gelation Rate and the Formed Sol-Gel Structure D. Sklenářová, J. Majerová, A. Kohutová and L. Nevřivová	61
Influence of Sintering Time with Constant Temperature on the Development of the Tricalcium Silicate Crystallinity A. Jančíků and K. Dvořák	67

Chapter 3: Anticorrosion Coatings

Synthesis of Silanated Coconut Oil-Based Waterborne Polyurethane Coating for Corrosion Protection D.J.E. Estrada, A. Tilendo, A.C. Alguno, A.A. Lubguban, G. Dumancas, A. Maputi, V. Enobio, R. Malaluan and A.A. Lubguban	77
Anti-Corrosion Properties of Polyaniline/Polyurethane Composite Coatings on Mild Steel Using Coconut-Based/PPG Blend Polyols M.T. Bonilla, A.G. Ruda, D.J.E. Estrada, K.S.M. Ubás, A.A.B. Mutia, A.A. Lubguban, R.Y. Capangpangan, J.P. Labis, A.C. Tilendo, N.L.B. Sayson and A.C. Alguno	89
Development and Characterization of Epoxy/Banana Pseudo-Stem Nanocellulose (BPNC) Composites as Anti-Corrosion Coatings on Mild Steel K.S.M. Ubás, J.C. Grumo, A.G. Ruda, M.T. Bonilla, A.A.B. Mutia, J.P. Labis, N.L.B. Sayson and A.C. Alguno	103
