## Preface

## Chapter 1: Polymers and Composites

|                                                                                                                                                                                                                                                                      |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Bio-Coating of Poly(Lactic Acid) on Thermoplastic Starch for Disposable Cutlery</b><br>R. Padungkomaet, S. Thananthong, R. Yeetsorn, N. Surathin and W. Prissanaroon-Ouajai                                                                                       | 3  |
| <b>Effect of Surfactant on Properties of Bio-Based Polyurethane Foams</b><br>P. Pongmuksuwan and W. Kitisatorn                                                                                                                                                       | 9  |
| <b>Pressure Distribution of Polyurethane Foam Based on Palm Oil Content</b><br>W. Kitisatorn                                                                                                                                                                         | 15 |
| <b>Poly(Vinylidene Fluoride-Co-Hexafluoropropylene)/Amethyst Composites: Preparation, Properties, and Potential for Sustainable Energy Materials</b><br>S. Khawkom, N. Sukhawipat, S. Glabsawat, T. Rompoche, J. Yuennan, N. Tohluebaji, P. Pasetto and T. Panyachan | 21 |
| <b>Effects of Copper-Modified Activated Carbon on Natural Rubber Composite for Dielectric Materials</b><br>T. Yingshataporn-A-Nan, N. Sukhawipat, P. Thusanaphoom, T. Lardsaluk, N. Moolchai, W. Jeungthanasirigool and N. Sosa                                      | 29 |

## Chapter 2: Magnetic Materials

|                                                                                                                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Effect of Varying Calcium Concentration on Dielectric Properties of Calcium Substituted Strontium M-Type Hexaferrites</b><br>S. Taimoor, N. Ali, S.S.A. Shah, Z. Habib, N. Mehboob and F.U. Rehman | 39 |
| <b>Effect of Temperature on Magnetic Characteristics of NdFeB Alloy</b><br>N. Bashir, A. Haider, K. Akram and A.N. Khan                                                                               | 47 |

## Chapter 3: Corrosion, Protective Coatings and Surface Treatment

|                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Fracture Failure Analysis of Compressor Valve Spring</b><br>X.W. Li, Y.C. Xin, X.L. Tan and C.Y. Du                                                                   | 57  |
| <b>EIS Method to Study the Corrosion Resistance of Three Arc Spraying Composite Coatings in 3.5% NaCl Solution</b><br>S.S. Li, H.Y. Zhao, Y.F. Lu, K. Wang and C.B. Lu   | 63  |
| <b>The Influence of Microstructure on Corrosion Resistance of B10 Copper Tube</b><br>L.M. Zhang and C. Li                                                                | 75  |
| <b>Effect of Trisodium Citrate on the Electro-Crystallization of Electrodeposited Ni-Cu-Mo Alloy Coatings</b><br>Z.W. Peng and C.Z. Peng                                 | 83  |
| <b>Simulation for the Influence of Energy-Shaping Laser on the Geometry of the Phase Change Zone during Laser Quenching of AISI 1045 Steel</b><br>D.W. Xia and S.Y. Wang | 93  |
| <b>The Impact of Surface Treatment Processes on the Fatigue Life of Fasteners</b><br>H. Xu, H.Y. Liang, H.S. Li, R. Ma, X.F. Liang and W. Gao                            | 101 |
