

Table of Contents

Preface

Chapter 1: Advanced Composite Materials

Programmable Shape Transformation of 4D Printed Fibre-Reinforced Composites E. Yildiz, B.C. Kim and R.S. Trask	3
Numerical Simulation-Based Design of Conductive Polymer Composites J.C. Shang, S.C. Yang, Y.G. Cao, Y.Y. Chen, B. Sun and J.Y. Lu	9
A Study on Maximum Friction Voltage and Half-Life of Composite Fiber Fabrics Containing Metal Oxide Particles T. Nakamura, T. Hayashi, M.R. Harada and H.T. Uchida	15

Chapter 2: Mechanics of Structural Materials

Multiscale Dispersity Analysis and Fatigue Life Prediction of Fiber-Reinforced Composites B.Y. Shi, J.X. Sun, R.H. Wang and L.Y. Sun	23
Modal Parameter Control and Forward Dynamic Design of Laminates J.X. Sun, L.Y. Sun, R.H. Wang and B.Y. Shi	31
Experimental Study on Model Fracture Toughness of Unidirectional Composite Laminates Using Digital Image Correlation (DIC) Technique Z.T. Li, W. Wang, T. Liu, T.H. Yue, W.M. Cui, Z.Y. Wang and X. Qu	41
The Influence of a Finite Element Mesh on the Reliability of the Results of Dynamic Processes of Armor Penetration of a Steel Plate by a Bullet S. Sidnei, I. Nozhko, V. Rotar and M. Grygorian	47
Exact Analytical Solution of the Problem of Elastic Bending of a Multilayer Circular Arch under the Action of a Normal Uniform Load S. Kovalchuk, O. Goryk, S. Yakhin and O. Brykun	59
Dependence of the Elastoplastic Properties of Compressed Concrete on its Strain Rate O. Romashko-Maistruk and V. Romashko	73
