

Table of Contents

Preface

Chapter 1: Synthesis and Processing

Development of Infusion Technology for Thermoplastic Composites with PMMA Matrix J. Zemanova, K. Zoulová, J. Krena, B. Cabrnach and M. Král	3
Initial Research on the Machinability of Biocomposite Materials Produced by the SCM Method M. Vana	9
Study of Rake Angle Variation with Focus on Tool Wear, Delamination, and Cutting Forces in Drilling of CFRP Materials T. Knappek	19
Manufacturing and Strength Evaluation of Composite Threads J. Zouhar, R. Kupcak, M. Vecerka and J. Viliš	27

Chapter 2: Testing and Analysis of Properties

The Influence of Strain Rate on Tensile Properties of Additive-Manufactured Wood-Based Polylactic Acid (PLA) (CR-Wood): an Experimental Investigation S. Gebrehiwot, H. Anukka and L. Espinosa-Leal	39
Process-Dependent Porosity and Mechanical Properties of Flax and Carbon–Flax Epoxy Laminates J. Zouhar, S. Kolomy, M. Slany and M. Petrik	47
Influence of Voids on Dimensional Accuracy and Stability in Bonded Metal–Composite Hybrid Joints R. Kupcak, J. Zouhar and R. Prikryl	57

Chapter 3: Industrial Application

Development of Composite Tank with Bonded Domes for Water Treatment Application Z. Padovec, R. Kottner, C. Novotný, K. Doubrava, M. Růžicka, R. Sedláček, D. Blaha, N. Schmidová and D. Vondráček	71
CAE Simulation of Thermodynamic Temperature Phenomena During Battery Cell Discharging a CAFICO Battery Box and Comparison with Experimental Measurements A. Potěšil, L. Ševčík, M. Mueller and L. Krčmář	83
Application of Composite Materials for Thermal Storage in the Heat Supply System in the Czech Republic M. Volf, E. Nezbedová and R. Kottner	91
