

# Table of Contents

## Preface

<b>Annihilation of Self-Interstitials by Dislocations in Silicon as Studied by Gold Diffusion</b> G. Mariani, B. Pichaud and E.B. Yakimov	3
<b>Formation of Electrical Activity of Dislocations in Si during Plastic Deformation</b> O.V. Kononchuk, V. Orlov, O.V. Feklisova and E.B. Yakimov	15
<b>Electronic and Electrical Properties of Polycrystalline Silicon: Effects of Grain Boundary Segregation</b> Y. Fujita, K. Kitakizaki and K. Masuda-Jindo	21
<b>Atomic Simulation Study of Gettering and Passivation in Polycrystalline Semiconductors</b> K. Masuda-Jindo and Y. Fujita	27
<b>The Switching Effects at Grain Boundaries Spontaneously Nucleating at the Crystallization Front of Shaped Silicon</b> A.K. Fedotov, A. Drozdovski and S. Shumski	33
<b>Microcharacterization of Polycrystalline Semiconductors by Scanning Electron Microscopy in Electron Beam Induced Current Mode</b> E.B. Yakimov	39
<b>Beam Injection Methods as Tools for Studying Extended Defects in Semiconductors: Characteristics and Capabilities</b> A. Castaldini and A. Cavallini	51
<b>Scanning Deep Level Transient Spectroscopy Measurements of Extended Defects in Silicon</b> K. Knobloch, M. Kittler, W. Seifert and V. Higgs	63
<b>Lifetime and Material Characteristics of Multicrystalline Silicon Measured with High Spatial Resolution</b> S.W. Glunz, C. Hebling and W. Warta	69
<b>On the Electrical Activity of Fe-Contaminated Silicon Bicrystals</b> A. Ihlal and R. Rizk	75
<b>Microdefects in Polycrystalline Silicon</b> M. Werner, E.R. Weber, S.A. McHugo and K.L. Chapman	81
<b>Investigations for the Detection of Microdefects in Cast Multicrystalline Silicon</b> E. Wolf, D. Klinger and S. Bergmann	87
<b>Dislocation-Related Absorption, Photoluminescence and Birefringence in Deformed n-ZnSe Crystals</b> Y.G. Shreter, Y.T. Rebane, O.V. Klyavin, P.S. Aplin, C.J. Axon, W.T. Young and J.W. Steeds	93
<b>Tight-Binding Total Energy Calculation for Fe, Co and Ni in Silicon</b> A. Hairie, F. Hairie, B. Lebouvier, J.M. Chen, E. Paumier and G. Nouet	99
<b>Polycrystalline Semiconductors: Structure-Property Relationships</b> D.A. Smith and C.S. Nichols	105
<b>Influence of a Preliminary Phosphorus Diffusion on the Evaluation of the Recombination Strength of Dislocations in Czochralski Silicon Wafers</b> I. Périchaud and J.J. Simon	117
<b>Reconstruction of the Recombination Centre Distribution in Dislocation Impurity Atmosphere in Si</b> I.E. Bondarenko, O.V. Kononchuk and V. Sirotkin	123
<b>Transmission Electron Microscopy Studies of Lattice-Mismatched Semiconductor Heterostructures Used for Integrated Optoelectronic Devices</b> G. Patriarche	131
<b>Electrical and Structural Properties of Solution Grown Silicon Layers on Polycrystalline Silicon Substrates</b> B. Steiner, G. Wagner, A. Voigt, W. Dorsch and H.P. Strunk	143
<b>Preparation of Low Temperature Polysilicon Films with SiH<sub>4</sub> and SiF<sub>4</sub> Gas Mixtures</b> H.S. Choi, K.H. Jang and M.K. Han	149
<b>Structural Studies of Annealing Effects on Semi-Insulating Polycrystalline Layers Obtained by Using Disilane</b> J.J. Pedroviejo, B. Garrido, J.R. Morante, E. Dehan and E. Scheid	155

<b>Growth of n-Type Microcrystalline Silicon at Different Plasma Excitation Frequencies</b> P. Hapke, M. Luysberg, R. Carius, M. Tzolov, F. Finger and H. Wagner	161
<b>On the Nanostructure of Hydrogenated Silicon</b> S.B. Aldabergenova, M. Albrecht, K. Tauasarov, D. Stenkamp, T.I. Taurbaev, B. Dietrich and H.P. Strunk	167
<b>Time Resolved Reflectivity Studies of Phase Transitions in Polycrystalline Si Induced by Excimer Laser Irradiation</b> I. Ulrych, M. Cerník, K.M.A. El-Kader, P. Prikryl, R. Cerný, Z. Chvoj and V. Cháb	173
<b>Characterization of Low Pressure Chemical Vapor Deposited Polysilicon Using Ellipsometry</b> L. Asinovsky, S. Fox, E. Karagiannis, M. Schroth and J.J. Sweeney	179
<b>Correlation between the Hydrogen Bonding Configurations in Amorphous Sputtered Silicon and the Crystallized Material Microstructure</b> L. Lusson, A. Lusson, A. Correia and D. Ballutaud	187
<b>Growth and Defect Formation in Thin Ge and Si<sub>0.8</sub>Ge<sub>0.2</sub> Layers Ion Beam Sputter Deposited on Si(001)</b> W. Dorsch, V. Demuth, H.P. Strunk, N. Mosleh, F. Meyer and C. Schwebel	193
<b>Microstructure Influence on the First Stage of the Oxidation Process in Polycrystalline SiGe Layers</b> J.C. Ferrer, J.J. Pedroviejo, B. Garrido, J.R. Morante and J. Calderer	199
<b>Surface Defect States of Crystallites in Sputtered Amorphous Silicon Films</b> Y. Nakano, J. Sakata and Y. Taga	205
<b>n-Type Polydrystalline Silicon for Luminescent Porous Silicon Films</b> F. Guyader, J.K. Jung, M. Guendouz, M. Sarret and P. Joubert	211
<b>Structural Characterization of Poly-SiC Grown on SiO<sub>2</sub>/Si by Metalorganic Chemical Vapor Deposition</b> J. Rodríguez-Viejo, J. Stoemenos, N. Clavaguera and M.T. Clavaguera-Mora	217
<b>Photoluminescence from Nanocrystalline Silicon-Amorphous Silica Composite Materials: Changing the Color and Decay Time</b> S. Veprek	225
<b>Nanocrystalline Silicon: From Disordered Insulator to Dirty Metal</b> M. Taguchi, Y. Tsutsumi, R.N. Bhatt and S. Wagner	237
<b>Optical, Electrical and Structural Studies of Microcrystallized Sputtered Silicon</b> R. Rizk, A. Achiq, R. Madelon, F. Gourbilleau and F. Cruge	243
<b>Structure and Optical Properties of Hydrogenated Silicon Films Prepared by Plasma Enhanced Chemical Vapour Deposition</b> A.A. Andreev, A.V. Andrianov, B.Y. Averboukh, R. Mavljanov, S.B. Aldabergenova, M. Albrecht and H.P. Strunk	249
<b>Growth of Polycrystalline Silicon Films at High Deposition Rate and Low Temperature by Hot Wire Chemical Vapour Deposition</b> A.R. Middya, J. Guillet, J.E. Bouree and J. Perrin	255
<b>Grain Boundaries and Grain Size Distributions in Nanocrystalline Diamond Films Derived from Fullerene Precursors</b> R. Csencsits, C.D. Zuiker, D.M. Gruen and A.R. Krauss	261
<b>Cathodoluminescence Microscopy of Square Facets in Chemial Vapour Deposited Diamond Films and its Use in Stress Determination</b> J.W. Steeds, N.C. Burton, A.R. Lang, D. Pickard, Y.G. Shreter and J.E. Butler	271
<b>Transformations in Si<sub>1-x</sub>Ge<sub>x</sub>:H Films on SiO<sub>2</sub> Substrates</b> F. Edelman, R. Weil, P. Werner, M. Reiche, E. Schroer, J. Heydenreich and W. Beyer	283
<b>Modelling of Specular Reflection Infrared Spectra of Oxide Films for Microstructural Analysis</b> D. Narducci and C. Romanelli	289
<b>Chemical Composition and Characterization of the Si/C Interface in Poly-Si Thin Films on Graphite Substrates</b> T. Reindl, T. Fuska, C. Walz, H. Cerva, R. Lemme, C. Weitzel, W. Kruehler, M. Pauli and J. Mueller	295
<b>Phase Transitions during the Deposition of Polycrystalline Iron Pyrite (FeS<sub>2</sub>) - Layers by Low-Pressure Metalorganic Chemical Vapor Deposition</b> B. Thomas, K. Diesner, T. Cibik and K. Ellmer	301

<b>Distribution of Defects in Polycrystalline Chalcopyrite Thin Films</b>	309
T. Walter, R. Herberholz and H.-. Schock	
<b>Noble Transparent Semiconductor: MgIn<sub>2</sub>O<sub>4</sub></b>	317
N. Ueda, H. Hosono and H. Kawazoe	
<b>Electronic Properties of Cu<sub>x</sub>S-ZnS Heterostructure in Zinc Sulphide Luminophors</b>	323
L.A. Kosyachenko, I.K. Vereshchagin and S.M. Kokin	
<b>Quantum Properties of Two-Dimensional Electron Gas in the Inversion Layer of InSb and (Hg<sub>1-x</sub>Cd<sub>x</sub>Te) Bicrystals</b>	329
W. Kraak, G. Nachtwei, N.Y. Minina and A.M. Savin	
<b>Growth and Electrical Properties of Reactively Sputtered WS<sub>x</sub> Thin Films</b>	335
M. Regula, C. Ballif and F. Lévy	
<b>Optical and Electrical Properties of Iron Disilicide with Different Degree of Structural Perfection</b>	341
W. Henrion, S. Brehme, I. Sieber, H. von Känel, Y. Tomm and H. Lange	
<b>Composition Dependent Optical Properties of Polycrystalline CuInSe<sub>2</sub> Thin Films</b>	347
R. Schäffler and H.-. Schock	
<b>Improvement of the Electrical Properties of WSe<sub>2</sub> Layers by Iodine Treatment</b>	353
H. Essaidi, J.C. Bernede, A. Khelil, J. Pouzet and M. Morsli	
<b>Electron Beam Induced Current Imaging of Silicon Oxide Damage Due to Reactive Ion Etching</b>	359
H. Kirk, Z.J. Radzimski, A. Romanowski and G.A. Rozgonyi	
<b>Monte Carlo Simulation of Charge Carriers' Trapping in Polycrystalline Semiconductors</b>	367
A. Mandowski and J. Swiatek	
<b>Electronic Properties of Defect Levels Investigated by Photocurrent Noise in Polycrystalline Cadmium Compounds</b>	373
A. Carbone and P. Mazzetti	
<b>Experimental Determination of Hall Factor for Hydrogenated In-Situ Phosphorus Doped Polysilicon Films</b>	379
F. Le Bihan, B. Fortin, H. Lhermite, O. Bonnaud and D. Briand	
<b>Carrier Transport at Silicon and Germanium Grain Boundaries Enriched by Impurities</b>	385
A.K. Fedotov, Y. Ilyashuk and S. Shumski	
<b>1/f Noise Transformation that Accompanies the Trimming of Polycrystalline Silicon Layers</b>	391
N.N. Tkachenko	
<b>Investigation of the Low-Frequency Electrical Noise in Grain Boundaries and Polycrystalline Silicon Films</b>	397
N.N. Tkachenko, G.P. Kolomoets and N.I. Stroiteleva	
<b>Selective Photoconductivity in n-Type CdMnTe:Ga</b>	403
B. Bieg, S. Kuzminski, A. Morawski and B. Pohoryles	
<b>Semiconducting Gas Sensors: Basic Science and Empirical Approaches</b>	409
K.D. Schierbaum	
<b>Influence of the Technological Parameters on the Mechanical Properties of Thick Epipolysilicon Layers for Micromechanical Sensors</b>	423
M.S. Benrakkad, J.M. Lopez-Villegas, J.R. Morante and M. Offenberg	
<b>Thickness Dependence of Coloration of Anodic Tungsten Oxide Films for Hydrogen Detection</b>	429
H. Tamura, Y. Hashimoto and K. Ito	
<b>Preparation, Micromorphology and Stability of Tin Dioxide Thin Films</b>	435
D. Narducci, G. Girardi and C. Piseri	
<b>Microstructural Study of Nanocrystalline Semiconducting SnO<sub>2</sub> Powders for Sensor Application</b>	441
A. Diéguez, A. Romano-Rodríguez, J.R. Morante, U. Weimar, M. Schweizer and W. Göpel	
<b>Growth and Post Growth Processes of Multicrystalline Silicon for Photovoltaic Use</b>	449
F. Ferrazza	
<b>Modern Technologies for Polycrystalline Silicon Solar Cells</b>	461
J. Nijs, S. Sivoththaman, J. Szlufcik, J. Poortmans and R.P. Mertens	
<b>Microstructure and Electrical Properties of some Multicrystalline Silicon Billets Continuously Cast in a Cold Crucible</b>	473
I. Péricaud, G. Dour, B. Pillin, F. Durand, D. Sarti and S. Martinuzzi	

<b>Polycrystalline Silicon Solar Cells: Improvements in Efficiency through Hydrogen Passivation</b>	
E.A. Katz, M. Koltun and L.E. Polyak	479
<b>About a Novel Gettering Procedure for Multicrystalline Silicon Samples</b>	
C. Savigni, M. Acciarri and S. Binetti	485
<b>Hydrogen Ion-Implantation Induced Gettering Effects in Polycrystalline Silicon</b>	
Z. Shi, F. Yun and A.W. Simonian	491
<b>Shunts in n+p-Junction Solar Cells Fabricated on Multicrystalline Cast Silicon</b>	
A. Voigt, C. Hässler, D. Karg, H.P. Strunk, G. Pensl and M. Schulz	497
<b>Characterization of Local Shunts in Multicrystalline Siicon Solar Cells by p-n Mesa Structures</b>	
D. Karg, C. Hässler, G. Pensl and M. Schulz	503
<b>Theory of Grain Boundary Effects upon Single Junction and Multijunction Polycrystalline Silicon Thin Film Solar Cells</b>	
M.A. Green	509
<b>Polycrystalline Silicon on Glass Substrates for Thin Film Solar Cells</b>	
R.B. Bergmann, G. Oswald, M. Albrecht and J. Werner	515
<b>Modelling of Thin Polycrystalline Silicon Solar Cells on Low Temperature Substrates</b>	
J. Dugas	521
<b>Electron-Beam Induced Current Profiles for Thin Film Heterojunction Analysis</b>	
R. Scheer	527
<b>Oxygen in Solution Grown CdS Films for Thin Film Solar Cells</b>	
A. Kylnner, A. Rockett and L. Stolt	533
<b>Relations between Texture and Electrical Parameters of Thin Polycrystalline Zinc Oxide Films</b>	
K. Ellmer, K. Diesner, R. Wendt and S. Fiechter	541
<b>Interface Charge Separation Processes in TiO<sub>2</sub>-Based Solar Cells</b>	
O.I. Shevaleevskii, L.L. Larina and E.M. Trukhan	547
<b>Structure Organization of Fullerene Layers for Photovoltaic Devices</b>	
L.L. Larina, O.I. Shevaleevskii and L.A. Chernozatonskii	553
<b>Compensation Doping of Polysilicon Films for Stable Integrated Circuit Resistors</b>	
M. Rydberg, U. Smith, A. Söderbärg and H. Hansson	561
<b>Physical Properties of Polysilicon Diodes Derived from a Smart Power Technology</b>	
I. Claverie, J. Oualid, J. Mille, O. Bonnaud and R. Jérison	567
<b>Realization of Power Polysilicon Diodes on Indium-Tin-Oxide Substrates for Holographic Commutation Matrix</b>	
D. Briand, M. Sarret, T. Mohammed-Brahim, S. Mottet and O. Bonnaud	573
<b>Manipulating the Electrical and Optical Properties of Polycrystalline ZnO Based Thin Films</b>	
V. Srikant and D.R. Clarke	579
<b>Analysis of Hot-Carrier Effects, 'Kink' Effect and Low Frequency Noise in Polycrystalline Silicon Thin-Film Transistors</b>	
G. Fortunato	585
<b>Thermal and Field-Induced Generation Mechanisms in Polysilicon Thin Film Transistors: A Comparison between n-Channel and p-Channel Devices</b>	
G. Tallarida, P. Migliorato, M. Quinn and C. Reita	597
<b>Thin Polycrystalline Silicon Films Annealed at 950°C: Structural and Electrical Properties and Application to Thin Film Transistors</b>	
A.C. Salaün, B. Fortin, T. Mohammed-Brahim, K. Kis-Sion, L. Haji and O. Bonnaud	603
<b>Deposition and Characterisation of Polycrystalline Silicon for Low Temperature Thin Film Transistor Fabrication</b>	
L.J. Quinn, B. Lee, P.T. Baine, S.J.N. Mitchell, B.M. Armstrong and H.S. Gamble	609
<b>Novel Polysilicon Thin Film Transistor with Buffer Oxide</b>	
B.H. Min, C.M. Park and M.K. Han	615
<b>Leakage Currents in Poly-Si Thin Film Transistors</b>	
S.D. Brotherton, J.R. Ayres and M.J. Trainor	621
