

Table of Contents

Preface

Structure of Intermetallic Compounds

P.F. de Châtel 1

Solid State Reactions

H. Schmalzried 13

Grain Boundary Diffusion and Solid State Reactions

P. Gas and J. Bernardini 37

Mircostructure Evolution and Interface Migration

Y. Bréchet 51

Nucleation and Spinodal Decomposition

L. Gránásy 67

Polytypic Transformations in SiC

P. Pirouz 107

Neutron Scattering: Application to Materials Science

F. Mezei 133

Structure Changes in Nanostructured Materials

N. Cowlam 145

Diffusion in Fe₃Al

Z. Tókei, J. Bernardini, G. Erdélyi, P. Gas and D.L. Beke 181

Optimum Nucleation

T. Unyi 183

Flow Aligning Homeotropic Nematic Liquid Crystals under Low Frequency Oscillatory Shear

T. Börzsönyi and Á. Buka 189

Determination of Young's Modulus from Depth Sensing Vickers Indentation Tests

J. Gubicza 195

Modeling of Misfit Dislocations of Nb/Al₂O₃ Interfaces

A. Lévy, G. Tichy and V. Vitek 201

Nanoparticle Formation during Laser Ablation

Z. Pászti, Z.E. Horváth, G. Pető, A. Karacs and L. Gucci 207

Texture Evolution in Stratified Al Thin Films

M. Adamik, I. Tomov and P.B. Barna 213

Structure Changes of Mechanically Alloyed AgCuCd and AgCuSn Eutectic Alloys

W. Maziarz 219

Investigation of Aluminium Induced Crystallisation of Amorphous Germanium by Auger Depth Profiling

I. Kovács, A. Sulyok, M. Menyhard and G.Z. Radnóczy 227

Investigations Regarding Structure and Optical Properties of HfO₂ Films

Z. Czigány, D. Mademann, P. Weissbrodt and E. Hacker 233

Investigation of Dislocation Cell Structure Formation by Computer Simulation

P. Balogh and I. Groma 239
