

# Table of Contents

## Preface Committees

### **Future Challenges for Cleaning in Advanced Microelectronics**

A. Bowling, B.K. Kirkpatrick, T. Hurd, L. Losey and P. Matz 1

### **Open Circuit Potential Analysis as a Fast Screening Method for the Quality of High-k Dielectric Layers**

M. Claes, T. Witters, G. Loriaux, S. Van Elshocht, A. Delabie, S. De Gendt, M. Heyns and H. Okorn-Schmidt 7

### **Wet Etch Enhancement of HfO<sub>2</sub> Films by Implant Processing**

J. Barnett, D.J. Riley, T.C. Messina, P. Lysaght and R. Carpio 11

### **Behaviour of High-k Dielectric Materials with Classical Cleaning Chemistries**

E. Bellandi, B. Crivelli and M. Alessandri 15

### **Introduction of High-k Materials into Wet Processing, Analysis and Behavior**

B. Onsia, D. Hellin, M. Claes, A. Maes, S. De Gendt and M. Heyns 19

### **Metallic Impurity Contamination from Tungsten Gate Cleaning**

G.M. Choi and T. Ohmi 23

### **Single Chemistry Cleaning Solutions for Advanced Wafer Cleaning**

R. Vos, M. Lux, S. Arnauts, K. Kenis, M. Maes, B. Onsia, J. Snow, F. Holsteens, G. Vereecke, P.W. Mertens, M. Heyns, O. Doll, A. Fester, B.O. Kolbesen, T. Hackett and M. Hoffman 27

### **Single Chemistry Cleaning with Complexing Agents (CAs): Determination of CA-Lifetimes by UV/VIS-Spectroscopy**

O. Doll and B.O. Kolbesen 33

### **Complexing Agents Employed in Single Chemistry Cleaning: Stability Studies Using HPLC**

S. Metzger and B.O. Kolbesen 37

### **Stability and Residue Studies of Complexing Agents in SC-1 Bath**

H. Saloniemi, S. Eränen, R.A. Ketola, J. Kokkonen, S. Lehto, K. Luomanperä, P. Vastamäki, H. Sirén and O. Anttila 41

### **Single Wafer Immersion Process Incorporating a Novel Megasonics Configuration with an Advanced IPA Vapor Condensation Dry**

J.J. Rosato, E.G. Baiya, J.A. Imonigie, M.R. Yalamanchili and E. Hansen 45

### **Metallic Contamination Removal Evaluation for Single Wafer Processing**

P. Boelen, S. Verhaverbeke, P. Garnier, D. Levy and H. Morinaga 49

### **Procedure to Evaluate Particle-Substrate Interaction during Immersion in Liquid**

W. Fyen, J. Vansteenbergen, K.D. Xu, R. Vos, P.W. Mertens and M. Heyns 53

### **Surfactant Selection for AM Clean in a Single Wafer Oasis Wet System**

J. Baker, C. Beaudry, H. Morinaga and S. Verhaverbeke 57

### **Investigating Post CMP Cleaning Processes for STI Ceria Slurries**

R. Small, P. Berar and B. Scott 63

### **Long-Term Effect of Transportation on Particle Concentrations in Various Process Chemicals**

S.I. Misat, G. De Vos and G. Huysmans 69

### **A New Industrial Etching & Drying Process for MEMS to Prevent Collapse of Microstructures**

O. Racourt, F. Arnaud d'Avitaya, E. Charlaix, T. Vareine and F. Tardif 73

### **In Situ Symflow™ Etching in an STG® Dryer**

K.K. Christenson, N.P. Lee, T.J. Wagener and S.L. Nelson 77

### **High Uniformity Wet Processing for Oxide Thinning and Polymer Cleaning Applications**

G. Wagner, K. Kinoshita, R. Sellmer and S. Fichtl 81

### **Wet Oxide Etching of Dual Gate Oxide for 0.13µm Technologies and Beyond: Interaction with Photoresist and Equipment**

S.Y.M. Chooi, S. Loong, C. Lim, Z. Ismail and T. Tjoa 85

### **A Novel Instrumentation for Contamination and Deposition Control on 300 mm Silicon Wafers Employing Synchrotron Radiation Based TXRF and EDXRF Analysis**

B. Beckhoff, R. Fliegauf, J. Weser and G. Ulm 89

<b>Relation between Surface Contamination of Metals and Defect Formation in Si during Oxidation of Bulk- and SOI-Wafers</b>	93
I. Rink, A. De Veirman and A.J. Janssen	
<b>Evaluation of Ultratrace Metallic Elements in Poly-SiGe Thin Films</b>	97
Y. Yamada, S. Kozuka, A. Shimazaki and M. Takenaka	
<b>Effect of Additives on the Removal Efficiency of Photoresist by Ozone/DI-Water Processes: Experimental Study</b>	101
H. Vankerckhoven, F. De Smedt, M. Claes, S. De Gendt, M. Heyns and C. Vinckier	
<b>Organic Contamination: Purge Gas Impact in Plastic Storage Boxes</b>	105
M. Veillerot, A. Danel, S. Marthon and F. Tardif	
<b>Formation of Time-Dependent Haze on Silicon Wafers</b>	109
N. Münter, B.O. Kolbesen, W. Storm and T. Müller	
<b>Compatibility of Supercritical CO<sub>2</sub>-Based Stripping with Porous Ultra Low-k Materials and Copper</b>	113
C. Millet, A. Danel, M. Ndour and F. Tardif	
<b>BEOL Post Ash Residue Removal Using DSP* Chemistry in an FSI Batch Spray Tool</b>	117
R. Vroom, G. Gogg and J. O'Dwyer	
<b>Backside Cleaning for Copper Removal</b>	121
C.T. Richard, F. Guyader and K. Barla	
<b>Evaluation of Organic Contamination on Si Wafers in Fab Environments</b>	125
J.S. Jeon, C. Wong, S. Ohsiek, H.S. Kim and B. Ogle	
<b>Selective Wet Etching of High-k Gate Dielectrics</b>	129
K.K. Christenson, B. Schwab, T.J. Wagener, B. Rosengren, D.J. Riley and J. Barnett	
<b>Investigation of Particle Removal from Silicon Surfaces by Means of Dry and Steam Laser Cleaning</b>	133
P. Leiderer, M. Mosbacher, J. Boneberg, C. Bartels, F. Lang, C.R.M. Afonso and D. Baeuerle	
<b>A Comprehensive Model for Cleaning Semiconductor Wafers</b>	135
G. Burdick, S. Eichenlaub, N. Berman and S. Beaudoin	
<b>Effect of Transient pH on Particle Deposition during Immersion Rinsing</b>	139
W. Fyen, K.D. Xu, R. Vos, G. Vereecke, P.W. Mertens and M. Heyns	
<b>Influence of Hardware and Chemistry on the Removal of Nano-Particles in a Megasonic Cleaning Tank</b>	143
G. Vereecke, M. Heyns, R. Vos, M. Schmidt, F. Holsteeyns, M. Baeyens, S. Gomme, J. Snow, P.W. Mertens, V. Coenen and T. Bauer	
<b>Influence of Frequency on the Removal Efficiency of Nano-Particles in a Megasonic Spray Cleaning Tool</b>	147
M. Schmidt, G. Vereecke, R. Vos, F. Holsteeyns, M. Baeyens and P.W. Mertens	
<b>A Theoretical and Experimental Study of Damage-Free BEOL Cleaning with Megasonic Agitation</b>	151
J.M. Lauerhaas, Y. Wu, M. Bran, B. Fraser, E. Brause and T. Nicolosi	
<b>Removal of Small (&lt;100-nm) Particles and Metal Contamination in Single-Wafer Cleaning Tool</b>	157
A. Eitoku, R. Vos, J. Snow, M. Sato, S. Hirae, K. Nakajima, M. Nonomura, M. Imai, P.W. Mertens and M. Heyns	
<b>Relation between Particle Density and Haze on a Wafer: a New Approach to Measuring Nano-Sized Particles</b>	161
K.D. Xu, R. Vos, G. Vereecke, M. Lux, W. Fyen, F. Holsteeyns, K. Kenis, P.W. Mertens, M. Heyns and C. Vinckier	
<b>TXRF Analysis of Low Z Elements and TXRF-NEXAFS Speciation of Organic Contaminants on Silicon Wafer Surfaces Excited by Monochromatized Undulator Radiation</b>	165
B. Beckhoff, R. Fliegauf, G. Ulm, J. Weser, G. Pepponi, C. Streli, P. Wobrauscheck, T. Ehmann, L. Fabry, S. Pahlke, B. Kanngießer and W. Malzer	
<b>Forced Vapour-Phase Decomposition (FVPD) in Combination with e.g. TXRF - a Method to Determine Contamination in Silicon</b>	171
I. Rink	
<b>On-Tool Real-Time Moisture Monitoring Provides Yield and Productivity Benefits</b>	175
R.P. Davis, R.B. Grant, L. Papens, N. Stouten, J. Van Hoeymissen and M. Heyns	

<b>Effect of Preparation-Induced Surface Morphology on the Stability of H-Terminated Si(111) and Si(100) Surfaces</b>	179
H. Angermann, W. Henrion, M. Rebien and A. Röseler	
<b>Thermal Evolution of (100) Silicon and Chemical Oxides as Seen by ATR Spectroscopy</b>	183
F. Tardif, A. Chabli, A. Danel, N. Rochat and M. Veillerot	
<b>Modelling the Growth of Chemical Oxide for Advanced Surface Preparation</b>	187
S. Petitdidier, N. Rochat, R. Rouchon and P. Besson	
<b>Wafer Surface Preparation Requirements for Next-Generation Devices</b>	191
I. Kashkoush, G. Chen and R. Novak	
<b>Cleaning of Si Surfaces by Lamp Illumination</b>	195
A. Danel, C.L. Tsai, K. Shanmugasundaram, F. Tardif, E. Kamieniecki and J. Ruzylo	
<b>Defect-Free Si Thinning by In Situ HCl Vapour Etching</b>	199
R. Loo, M. Caymax, O. Richard, P. Verheyen and N. Collaert	
<b>Advanced Cylindrical Capacitor Formation Using Gas-Phase Selective Etching</b>	203
R. Hanestad, B. Schwab, J.W. Butterbaugh, K.T. Lee, W.G. Shim, S.Y. Kim and Y.P. Han	
<b>Gas-Phase HF/Vapor Etching of Thermal Silicon Dioxide Films</b>	207
G. Montaño-Miranda and A.J. Muscat	
<b>Electrochemical Impedance Spectroscopic Characterization of Hydrophobic Coatings Deposited onto Pre-Oxidized Silicon</b>	211
A.M. Almanza-Workman, S. Raghavan, P. Deymier, S. Petrović, D.J. Monk and R. Roop	
<b>Can we Increase the Efficiency of Organic Contamination Removal by Ozone/DI-Water Processes by Using Additives?</b>	215
F. De Smedt, H. Vankerckhoven, S. De Gendt, M. Heyns and C. Vinckier	
<b>New Residue Removal Method Using Ozonated Water with Phosphoric Acid</b>	219
I. Oya, M. Miyamoto and M. Kuzumoto	
<b>Ozone-Gas Concentration Measurements for Photoresist Stripping</b>	223
D.M. Knotter, M. Marsman, P. Meeusen, G. Gogg and S. Nelson	
<b>Accelerated Removal of Photoresist for Semiconductor Production by an Increased-Pressure Ozone and Water Vapor Process</b>	227
G.W. Gale, T. Toshima, N. Shindo, T. Iino, S. Kitahara and K. Taguchi	
<b>Novel Photoresist Removal Using Atomic Hydrogen Generated by Heated Catalyzer</b>	231
T. Miki, A. Izumi and H. Matsumura	
<b>'Resist / Wet Etch' Couple for Dual Gate Oxide</b>	235
A. Beverina, I. Guilmeau, J.P. Carrere, N. Emonet, F. Guyader, V. Huard, S. Petitdidier and R. Velard	
<b>New Contact Cleaning in HF &amp; N<sub>2</sub>/H<sub>2</sub> Microwave Plasma</b>	239
Y.B. Kim, J.H. Kim, Y.M. Lee, G.G. Lee, J.Y. Kim, J.C. Ku and J.O. Ryu	
<b>Cleaning after Contact Etching of Multi-Film Stack and Cobalt Disilicide: An XPS Study</b>	243
S.Y.M. Chooi, C. Lim, W.J. Liu and P. Ee	
<b>Alternative Post-Etch Polymer Removal in a Single-Wafer Platform</b>	247
C. Dundas, R. Vroom, J. Ghekiere, P. Van Doorne, I. Rink, I. Sharp and S. Heffernan	
<b>Ammonium Nitrate Cleaning Process for Post Metal Photo-Resister Removing</b>	251
C. Lo and F.Y. Chen	
<b>Post Metal Etch Polymer Removal: A New CF<sub>4</sub>-Based Dry Plasma Process Sequence</b>	255
M.P. Pozzoli and S. Petroni	
<b>Influences of Cleaning Conditions and Elapse after Etch on Via Resistance in Multi-Level Cu Interconnects</b>	259
U.S. Hong, S.R. Hah, B.L. Park, C.G. Park, J.H. Oh, H.S. Son, J. Barnes, J.H. Chung and K.M. Park	
<b>Post-Etch Cleaning Chemistries Evaluation for Low k-Copper Integration</b>	263
L. Brousseau, O. Hinsinger, S. Favier and P. Besson	
<b>Resist Strip and Cu Diffusion Barrier Etch in Cu BEOL Integration Schemes in a Mattson Highlands™ Chamber</b>	267
G. Mannaert, M. Van Cauwenbergh, M. Schmidt, J. Van Aelst, D. Hendrickx, M. Stucchi, T. Conard, S. Vanhaelemeersch and W. Boullart	
<b>Corrosion Inhibitors for Copper in Hydroxylamine-Based Chemistries Used for CMP and Post-CMP Cleaning</b>	271
S. Tamilmani, W. Huang, S. Raghavan and R. Small	

<b>Tribological Characterization of Post-CMP Brush Scrubbing</b>	
A. Philipossian and L. Mustapha	275
<b>Defectivity Study of Cu Metallization Process by Dark- and Bright-Field Inspection</b>	
L. Carbonell, F. Holsteyns, Z. Tökei, L. O'Reilly, K. Maex and P.W. Mertens	281
<b>New Dry Tool after Cleaning of Low-k Dielectrics</b>	
S. Okuda, H. Sugimoto, A. Hashizume, H. Tsujikawa, M. Imai and G. Asai	287
<b>Supercritical Carbon Dioxide Processing of Porous Methylsilsesquioxane(PMSQ) Low-k Dielectric Films</b>	
H.J. Martinez, T. Jacobs, J. Wolf and L. Rothman	293
<b>Supercritical Carbon Dioxide Cleaning of Low-k Material</b>	
G. Asai, Y. Muraoka, K. Saito, I. Mizobata, T. Iwata, K. Masuda, K. Iijima, T. Yoshikawa and D. Peters	297
<b>Removal of Heavy Organics by Supercritical CO<sub>2</sub></b>	
A. Sehgal, M.R. Yalamanchili, C. Millet, A. Danel and F. Tardif	301
