

Table of Contents

Preface

Future Trends in Synergetics

H. Haken 3

Self-Formation of the Artificial Planar Systems. What is It?

S. Janušonis 11

Dynamically Multivalued Self-Organisation and Probabilistic Structure Formation Processes

A.P. Kirilyuk 21

From Self-Organization to Evolution of RNA Molecules: The Origin of Biological Information

P. Schuster 27

Active Brownian Motion – Self-Formation in Systems of Self-Propelled Particles

W. Ebeling 37

Artificial Chemistries – Towards Constructive Dynamical Systems

W. Banzhaf 43

Self-Formation Supported by Pattern Recognition

L. Telksnys 51

Intelligent Stock Trading Systems Using Fuzzy-Neural Networks and Evolutionary Programming Methods

R. Šimutis and S. Masteika 59

Evolution of Complex Systems and 1/f Noise: from Physics to Financial Markets

V. Gontis, B. Kaulakys, M. Alaburda and J. Ruseckas 65

Nondestructive Testing Method in Artificial Intelligence Real Time Systems

E. Kazanavicius, A. Mikuckas and I. Mikuckiene 71

Self-Formation, Development and Reproduction of the Artificial System

J. Ulbikas, L. Leonas, D. Ulbikienė and S. Janušonis 77

Self-Formation of the Spatial Planar Object. Topological Approach

S. Janušonis 85

A Synergetic Approach of Solar Cells

L. Fara and V. Bădescu 91

Self-Organized Corrugated Interface for Barrier Heterostructures to Solar Cells Application

N.L. Dmitruk, O.Y. Borkovskaya, O.I. Mayeva, I.B. Mamontova and T.V. Malyshev 97

Simulation of Self Formation in Solar Cell Technology

L. Leonas and S. Janušonis 103

Iterative Optimization of Spatial Solar Cell: Performance and Technology

J. Ulbikas, K. Požela and D. Ulbikienė 109

Solar Power Devices for Providing Power to Handheld Devices: Field of the Invention

A. Elazari 115

Technological Graph of Self-Forming Solar Cell

V. Janušonienė, E. Leonienė and L. Leonas 121

Pattern Formation in Reaction Diffusion Systems: A Moving Boundary Model

G. Varghese and J. George 125

Development of a Course on Photovoltaic Systems

V. Benda 133

Diagnostics of Recombination Rate Homogeneity in Structures of Large-Area Solar Cells

V. Benda 139

Studies of Porous Layer Formation in p-Si by Spectroscopic Ellipsometry

J. Sabataitytė, A. Rėza, I. Šimkienė, A. Matulis and G.J. Babonas 145

Formation and Characteristics of Thin Films of ZrO₂-8 mol % Y₂O₃ Solid Electrolytes

D. Milčius, L.L. Pranevičius, V. Širvinskaitė, T. Šalkus, A. Kežionis and A.F. Orliukas 153

Behavior of Hydrogen in Al, Mg and MgAl Plasma Saturated Films

D. Milčius, L.L. Pranevičius, J. Nomgaudytė and I. Barnackas 159

Self-Formation Processes in Studies of Surface Topography under Ion Irradiation L.L. Pranevičius, C. Templier and D. Mickevičius	165
Quantum Mechanical Design of Molecular Computers Elements Suitable for Self-Assembling to Quantum Computing Living Systems A. Tamulis, V. Tamulis and A. Ziriakovienė	173
Self Formation of Porous Silicon Structure: Primary Microscopic Mechanism of Pore Separation M.E. Kompan, A.E. Gorodetski and I.L. Tarasova	181
The Role of Processes on the Surface in Organization of Long Range Mass-Transport in the Bulk L.L. Pranevičius, D. Milčius, R. Knizikevičius, J. Nomgaudytė and B. Bobrovaitė	185
Self-Assembled TPPS₄ Nanostructures Revealed by Atomic Force Microscopy R. Augulis, V. Snitka and R. Rotomskis	191
Atomic Force Microscopy of Self-Assembled Nanostructures of TPPS₄ on SAM Substrates R. Augulis, R. Valiokas, B. Liedberg and R. Rotomskis	195
Cylindrical Aggregates of TDBC: Linear and Nonlinear Optical Properties Versus Morphology A. Pugžlys, P.R. Hania, C. Didraga, J. Knoester and K. Duppen	201
Reaction Dynamics and Applications in Patterning of Bisthiencylcyclopentene-Based Photochromic Switches P.R. Hania, A. Pugžlys, L.N. Lucas, J.J.D. de Jong, J. van Esch, B.L. Feringa and K. Duppen	207
Modelling Evolution of Nanostructures in Lateral Etching Processes R. Navickas and M. Romanov	215
The Polar Sulfonic Groups Influence on Structure of Self-Assembled Tetrapyrrolic Molecules V. Poderys, A. Selskis and R. Rotomskis	221
Theoretical Modeling of TPPS₄ J-Aggregates R. Augulis, J. Tamulienė, A. Tamulis and R. Rotomskis	225
Basic Self-Formation Processes in the Technologies of the Integrated Circuits R. Navickas and R. Kirvaitis	229
Modelling Geometry of Technological Masks in Lateral Etching Processes R. Navickas and R. Ciulada	235
Self-Formation of Properties of the Mechanical System in Machining A.J. Marcinkevičius	239
Self-Assembly of a Synthetic Opal Infiltrated with Liquid Crystal Like Photonic Crystal L. Rasteniene, S. Pajeda and R. Vaisnoras	245
Enhanced Luminescence of Europium in Porous Anodic Alumina Films N.V. Gaponenko, I.S. Molchan, A.A. Lutich and S.V. Gaponenko	251
Self-Formation of the Artificial Planar Systems. Theory and Application S. Janušonis and V. Janušonienė	259
Self-Formation Phenomenon in the Technological World. Development of Planar Technology S. Janušonis and V. Janušonienė	267
Differential Approach to the Plane Contour Evolution S. Janušonis and V. Janušonienė	278
Digital Approach to the Plane Figure Evolution S. Janušonis and V. Janušonienė	295
Topological Approach to the Object Evolution S. Janušonis and V. Janušonienė	312
Topological Approach to the Object Evolution. Topological Approach to the Object Evolution S. Janušonis and V. Janušonienė	337
Topological Approach to the Object Evolution. Evolution of Spatial Planar Object S. Janušonis and V. Janušonienė	377
Self-Formation, Development and Reproduction of the Artificial Planar Systems S. Janušonis and V. Janušonienė	391
Application of Self-Formation S. Janušonis and V. Janušonienė	444
