

Table of Contents

Preface

Chapter 1: Building Materials

Quaternary Ammonium and Pyridinium Salts as Modifiers of the Rheological Properties of Geopolymer Pastes P. Rovnaník and T. Žižlavský	3
Assessment of Concrete Compressive Strength by Destructive Testing: Influence of Strength Correction Factors and Size Effect A. Benidir	13
Development of User Friendly Geopolymer Mortar Using Wood Ash Lye as Alkaline Activator M.N. Isa and H. Awang	19
Experimental Investigation of Lightweight Mortars Based on Recycled Olive Kernel through Hygric and Mechanical Characterization N. Lo Presti, K. Abahri, G. Castellazzi, P. Mengoli and P. Stabellini	27
Mycelium B-Blocks: Reusable and Adaptable Biodegradable Material for Temporary Structures F.R. Winnerdy, D. Hermawan, A. Pramanik, J.V. Sanjaya, R. Fernando and E. Baron Mack	33
Closing the Loop of Circularity by Harnessing Additive Manufacturing to Reuse, Recycle and Reintroduce Marine Plastic Waste Back into the Built Environment L. Lopes, H. Daruari, M. Almeida, F. Gaspar and P. Mendonca	41
Assessment of Mechanical and Physical Properties of Natural Hydraulic Binders Produced from Marls N. Özer and S.A. Özgünler	47
Enhancing Corrosion Resistance in 2507 Super Duplex Stainless Steel: The Impact of Artificial Aging on Microstructure and Phase Stability B. Maamache, N. Ouali, B. Belkessa, M. Trari, R. Kouba and B. Cheniti	55

Chapter 2: Energy Efficiency Solutions

Role of Window-Integrated BIPV for Building Daylight Performance in Composite Climate S. Rehan	65
A Study on Sustainable Building Design by the Psychological Impact of LED Lighting A. Nozawa, K. Fukagawa, Y. Kurazumi and I. Uehara	73
Harnessing Radiant Energies: A Review of Current Technologies of Infrared Nanoantennas and its Future Role in Transforming Buildings into Self-Sustaining Power Cells F. Oliveira, M. Louro and A. Diogo	83
Enhancing Jet Fuel Production: Cutting Costs and CO₂ Emissions of Power-to-Liquid Technology G.P. Rangel, M.L. Fernandes, H.R. Matias and B. Neto	95

Chapter 3: Innovative Technologies in Architecture and Civil Engineering

Controllability, Dynamics and Randomness: The Generation of Visualization Integration in Parametric Tools during Architectural Design Process T. Han	103
Identification of Building Envelope Characteristics to Reduce Vulnerability against Earthquakes and Meteorological Hazards E.P. Zitiello, R. Marmo, M. Fraiese, R. Castelluccio and A. Salzano	113
