

Table of Contents

Preface

Chapter 1: Optical Materials

Plasmonic-Metal Nanostructures-Enhanced Photoconductive Terahertz Emission and Detection

S. Nomoev, I. Vasilevskii, A. Klochkov, A. Vinichenko and E. Khartaeva 3

Synthesis, Structure, and Light Absorption of Octanoyl Amino Acids

A. Bohnuud, G. Naren, Z.H. Qiu, R. Meng and O. Tegus 13

Chapter 2: Luminophores

Synthesis and Luminescent Properties of TiO₂ Materials Single and Triple Doped with Rare Earth Ions (Sm³⁺, Tb³⁺ and Eu³⁺)

W.H. Liu, J.R. Zhang, G. Naren and A. Bohnuud 25

Energy Transfer of a New Self-Activating Ba₃TaGa₃Si₂O₁₄: ySm³⁺, xNb⁵⁺ Phosphor Obtained by a Small Substitution of Nb⁵⁺ for Ta⁵⁺

X.L. Zhou, K.X. Wang, Y. Zhang, Z. Wang, S. Rilige, Q.X. Tian, H. Halamuji and K.F. Chao 35

Luminescence Properties of Cs₃Cu₂I₅ Phosphors Powder with Solid State Method

Y.L. Zhu, X.C. Song, N.Y. Pan, C.H. Huang, H. Alata, A. Bolag, H. Oimod, J. Ning, B.Q. Zhou and O. Tegus 43

Nonlinear Excitation of Color Centers in a LiF Crystal by Femtosecond Laser Radiation

E.F. Martynovich, A.S. Frolova, D. Unurbileg, B. Ulziibayar, O. Bukhtsooj and J. Davaasambuu 49

Chapter 3: Materials for Energy Storage and Energy Conversion Devices

Enhanced Cyclic Performance of Lithium-Ion Battery Based on Anthraquinone/SBA-15 Composite Cathode Prepared via Ultra-Sonication

W.H. Liu, A. Bolag, Y.C. Sun and T.N. Bao 61

Effect of Rare Earth Ion Doping on the Performance of Lithium-Rich Cathode Materials for Lithium-Ion Batteries

H. Wu, W. Li, X.T. Wang, B. Liao, O. Tegus and S.Q. Bator 69

The Effect of Mono-Halogenation on the Performance of Anthraquinone Cathode in Lithium-Ion Batteries

X. Hong, A. Bolag, W.H. Liu and T.N. Bao 83

The Effect of Ethanol Treatment of PEDOT:PSS Hole Transport Layer on the Performance of P3HT: PCBM-Based Solar Cells

H. Alata, H. Lian, J. Ning, A. Bolag, N. Gerile and O. Tegus 91

The Effect of the Number of Precursor Spin-Coating on the Properties of Sb₂(S,Se)₃ Thin Film

X.R. Cui, Y.Y. Shi, X.T. Bai and L.R. Zhang 97

Chapter 4: Functional Materials

Structure, Magnetic and Magnetocaloric Properties of Attempted P Substitutions in LaFe_{11.5}Si_{1.5} Giant Magnetocaloric Material

J.Y. Xue, H. Yibole and F. Guillou 107

The Influence of Sn Addition on the Magnetocaloric Effects, Magnetic and Mechanical Properties of Fe₂P-Type Mn-Fe-P-Si Compounds

T.C. Zhang, X.R. Zhao, Q.Y. Bu, Y.J. Jiang and Z.Q. Ou 115

Preparation and Characterization of Black Phosphene/Titanium Dioxide Composite Nanomaterials by Liquid-Stripping and Solution Mixing Method T.N. Bao, A. Bolag, J.Y. Li and O. Tegus	127
Lignocellulose Composition of Preparation of Porous Carbon Materials and CO₂ Adsorption Performance Research B. Wurentuya, W. Ren and B. Agula	137
Producing Animal Originated Charcoal Production and its Characterization Analysis Compared to Brown Coal E. Sukhbaatar, N. Ganbold, B. Saruultuya, B. Norov, M. Ganbold, R. Dashzeveg, E. Ganbold, A. Bayarsaikhan, R. Tschaggelar and M. Sambuu	151
Preparation and Characterization of Urea-Modified Lignin-Derived Porous Carbon Materials and their CO₂ Adsorption Properties S. Bao, L.Z. Gong and B. Agula	161
Detailed Analytical EPMA Study of the OPC Pastes Prepared with the Addition of Raw and Milled Fly Ashes J. Temuujin, C.H. Ruescher, J. Erdenebayar and T. Ogata	173

Chapter 5: Numerical Investigations and Theoretical Approaches

A Numerical Method for Solving the Time Dependent Hartree-Fock Equations of the Helium Atom D. Naranchimeg, O. Sukh, G. Munkhsaikhan and N. Tsogbadrakh	185
First Principles Study on the Point Defects of Compound FeMnP_{0.67}Si_{0.33} Y.J. Jiang, X.X. Wu, Z.Q. Ou and B. Narsu	193
Expressions for Elements of Dynamical Matrix for HCP Crystals G. Myagmarsuren, T. Amartaivan and L. Enkhtor	201
Effect of Surface Layer on Young's Modulus of Ultrathin Nanofilms: A Theoretical Model Y. Jia, Y. Saqier and B. Narsu	209
Close Coupled Channels Method: For Hydrogen Atom in Strong Laser Fields A. Chuluunbaatar, K. Lochin, Z. Gombosuren and A. Ochirbat	221
