

Table of Contents

Foreword and Congress Committees

I. Biomaterials

Molecular Dynamics Investigation on Shearing between Osteopontin and Hydroxyapatite in Biological Materials

Z.B. Lai, C. Yan and A. Oloyede 3

Nanostructure and Fatigue Behavior of β -Type Titanium Alloy Subjected to High-Pressure Torsion after Aging Treatment

H. Yilmazer, M. Niinomi, K. Cho, M. Nakai, J. Hieda and Y. Todaka 9

II. Case Studies and Industrial Applications

Analysis and Design of Offshore Pile Foundation

S. Basack 17

Offshore Pile Foundation Subjected to Lateral Cyclic Load in Layered Soil

S. Basack and A.K. Banerjee 24

Fatigue Strength of Machined and Shot Peened Grey Cast Iron

M. Lundberg, R.L. Peng, M. Ahmad, D. Bäckström, T. Vuoristo and S. Johansson 30

On Thermo-Hydro-Mechanical (THM) Fatigue Damage of Historical Stone Buildings

D. Hoxha, N. Belayachi and D.P. Do 36

Effect of Thermal Cycling on the Mechanical Properties of a Continuous Fibre Composite Used for Car Clutch Facings

C. Flament, M. Salvia, B. Berthel and G. Crosland 42

The Role of Surface Topography on Fatigue Behaviour of Nickel Based Superalloys

D.T. Ardi, Y.G. Li, K.H.K. Chan, L. Blunt and M.R. Bache 48

Failure Analysis to Blades of Steam Turbines at Normal Conditions of Operations and Resonance

A.L. Tejeda, J.A. Rodríguez, J.M. Rodríguez, J.C. García and M.A. Basurto-Pensado 54

Failure Analysis of Repeat Tooth Breakage of a 40MW Steam Turbine Load Gearbox

W. Liu 60

III. Case Studies, Materials and Processes

Fatigue of Cold Expanded Open Hole Coupons with Pre-Existing Cracks

P.S. Baburamani, R. Ogden, Q.C. Liu and P.K. Sharp 69

A Fractographic Investigation of a Failed Precombustion Chamber Nozzle from a Large Marine Diesel Engine

L. Davidson 75

Case Studies of Fatigue Failures in Defence Aircraft Components

C. Smith and D. Donnelly 81

The Influence of Corrosion Pits and Cold Expanded Fastener Holes on the Fatigue Life Aluminium 7075-T651

B. Withy, S. Campbell and G. Stephen 87

An Investigation of the Extent of Crack Closure for Crack Growth in an Aluminium Alloy S.A. Barter, M. Burchill and M. Jones

93

Effect of Load Spectra and Stress Magnitude on Crack Growth Behavior Variability from Typical Manufacturing Defects

J.P. Gallagher and L. Molent 100

A Brief History of Structural Fatigue Testing at Fishermans Bend Australia

L. Molent 106

Fatigue Life Improvement of Laser Clad 7075 Aluminium Alloy by Deep Surface Rolling Technique

Q.C. Liu, W. Zhuang and P.K. Sharp

115

IV. Civil and Mining Structures

Fatigue Assessment of Large Thin-Walled Structures with Initial Distortions

I. Lillemäe, H. Remes and J. Romanoff

123

Retrofitting for Fatigue Cracks at Connection between the Main Girder Web and Lateral Girder Flange Using the Bolting-Stop-Hole Method with Attached Plates

T. Mori, K. Sasaki and M. Nakanuma

130

A Self-Heating Approach to Characterize Anisotropy Effects in Fatigue Behaviour: Application to a Nineteenth Century Puddled Iron from a French Railway Bridge

L. Gallegos Mayorga, S. Sire, S. Calloch, S. Yang, L. Dieleman and J.L. Martin

136

Evaluation of Bonding between High Modulus CFRP Sheet and Steel after Environmental Exposure and Fatigue Loading

H.B. Liu, D. Borrie, X.L. Zhao, Y. Bai and R.K. Singh Raman

143

Improved Fatigue Life Assessment of Lighting Poles

C.W.K. Hyland, W.G. Ferguson and K. Csikasz

149

V. Composites

A Brief Review of Fatigue Strengthening of Metallic Structures in Civil Engineering Using Fibre Reinforced Polymers

X.L. Zhao and M. Motavalli

157

Stiffness Based Fatigue Characterisation of CFRP

J. Brumbauer, F. Arbeiter, S. Stelzer and G. Pinter

166

Fatigue Crack Growth Rate in Mode I of a Carbon Fiber 5HS Weave Composite Laminate Processed via RTM

M.Y. Shiino, R.C. Alderliesten, M.Y. Pitanga and M.O.H. Cioffi

172

The Influence of Orthotropy and Taper Angle on the Compressive Strength of Composite Laminates with Scarfed Holes

M. Patel, S. Daynes and C.H. Wang

178

Notched Fatigue Behavior under Multiaxial Stress States

N.R. Gates, A. Fatemi, D.F. Socie and N. Phan

185

Effect of Disbonds on the Fatigue Endurance of Composite Scarf Joints

J.Y. Goh, S. Georgiadis, A.C. Orifici and C.H. Wang

191

Delamination Fatigue Properties of Z-Pinned Composites

K. Pingkarawat and A.P. Mouritz

197

VI. Corrosion and Fatigue

Standardized Test Method for Corrosion Pit-to-Fatigue Crack Transition for AA7075-T651 Aluminum Alloy

D. Mantha and S.A. Fawaz

205

Effects of Waveform and Cycle Period on Corrosion-Fatigue Crack Growth in Cathodically Protected High-Strength Steels

M. Knop, N. Birbilis and S. Lynch

211

Influence of Load Signal Form and Variable Amplitude Loading on the Corrosion Fatigue Behaviour of Aluminium Alloys

K. Bauer-Trossmann, L.H. Yu, T. Melz, M. Oechsner and H. Kaufmann

217

The Effect of *Ralstonia pickettii* on Environmental Fatigue Crack Growth of 7xxx Series Aluminum Alloys

S.E. Galyon Dorman, B.K. Hoff, T.A. Reid, S.E. Collins and D.H. Henning

224

The Effect of Corrosion Inhibitors on Environmental Fatigue Crack Growth in Al-Zn-Mg-Cu

S.E. Galyon Dorman

230

Experimental and Modeling Study of the Effect of Corrosion Pitting on Fatigue Failure Locations in Aircraft Components	236
B.R. Crawford, C. Loader, Q.C. Liu, T.J. Harrison, P.K. Sharp and G. Härkegård	
A Model for Predicting the Stress Concentration of Intergranular Corrosion around a Fastener Hole	242
T.J. Harrison, B.R. Crawford, G. Clark and M. Brandt	
Corrosion-Fatigue Crack Growth in Age-Hardened Al Alloys: Examples of Failures and Explanations for Fractographic Observations	248
R. Byrnes, N. Goldsmith, M. Knop and S. Lynch	
An Extended Finite Element Model Coupled with Level Set Method for Stable Pitting Corrosion	254
A.S. Vagbharathi and S. Gopalakrishnan	
Managing Fatigue from Corrosion Pits in Aircraft Structures	261
L. Molent	
Corrosion Fatigue Behaviour of a Common AZ91D Magnesium Alloy in Modified Simulated Body Fluid	267
S. Jafari and R.K. Singh Raman	
Three Ways of Sampling and Fatigue Test Results of Steel P92	273
J. Volák and Z. Bunda	
Effect of Environmental Corrosion on Fatigue Crack Growth Morphology: A Detailed Investigation of the Boundary between Fatigue and Corrosion Control Regimes	278
S.R. Shah, I.L. Pryce, T.B. St John and J.M. Greer	

VII. Crack Closure and Shielding

The Explanation of Stress Ratio Effect and Crack Opening Corrections for Fatigue Crack Growth in Metallic Materials	289
R.C. Alderliesten	
3D Numerical Study on how the Local Effective Stress Intensity Factor Range Can Explain the Fatigue Crack Front Shape	295
C. Gardin, S. Fiordalisi, C. Sarrazin-Baudoux and J. Petit	
Influence of Martensitic Phase on Microcrack Propagation in a Ferritic-Martensitic Steel	301
A. Brueckner-Foit, P. Pitz, F. Zeismann and L. Zellmer	
Experimental and Numerical Simulation Study of Plasticity-Induced and Roughness-Induced Fatigue Crack Closure	307
K. Masuda, S. Ishihara, Y. Sugai and A.J. McEvily	
Micro Fatigue Crack Propagation Behavior in a Duplex Stainless Steel Studied Using <i>In Situ</i> SEM/EBSD Method	313
G.C. Chai, R.L. Peng and S. Johansson	
Fatigue Crack Closure due to Surface Roughness and Plastic Deformation	319
K. Walker, C.H. Wang and J.C. Newman Junior	

VIII. Crack Growth Thresholds

Fatigue Crack Growth Behavior in the Threshold Region	327
R.G. Forman and M. Zanganeh	
Crack Growth Threshold Criterion Based on Calculation of Dynamic Stress Intensity Factors in the Mixed Mode (Complex Functions Theory Approach)	333
S.H. Eslami	
Influence of the Inclusion Type on the Threshold Value of Failure in the VHCF-Regime of High-Strength Steels	339
P. Grad, D. Spriestersbach and E. Kerscher	
Comparison of SGBEM-FEM Alternating Method and XFEM Method for Determining Stress Intensity Factor for 2D Crack Problems	345
S. Sarkar, N. Apetre, N. Iyyer, N. Phan, K. Goel and S. Atluri	
Influence of Crack Retardation on Fatigue Crack Propagation in Steels for Railway Axles	351
L. Náhlík, P. Pokorný and P. Hutař	

Investigations on the Fatigue Crack Propagation Threshold in Very High Cycle Fatigue	357
C. Wang, D. Wagner and C. Bathias	

IX. Creep-Fatigue

J-Integral Approach to Creep-Fatigue Crack Propagation in Lead-Free Solder under Various Loading Waveforms	
K. Tanaka, T. Fujii and K. Fujiyama	365
Determination of Creep Crack Growth Threshold by Experiments under Elevated Temperature with Pre-Stressed Specimens	
H. Liu, R. Bao and B.J. Fei	371
Low Cycle Fatigue Behavior and Mechanism of Newly Developed Advanced Heat Resistant Austenitic Stainless Steels at High Temperature	
G.C. Chai	377
Low Cycle Fatigue and Creep-Fatigue Interaction Behaviour of Reduced Activation Ferritic Martensitic (RAFM) Steels with Varying W and Ta Contents	
R. Sandhya, V. Shankar, K. Mariappan, M.D. Mathew, T. Jayakumar and E.R. Kumar	383

X. Cyclic Deformation and Crack Initiation

Cyclic Deformation of Rare-Earth Containing Magnesium Alloys	
F.A. Mirza, D.L. Chen, D.J. Li and X.Q. Zeng	391
Fatigue Behaviour of AZ91 Magnesium Alloy in as-Cast and Severe Plastic Deformed Conditions	
L. Kunz and S. Fintová	397
Fatigue of Austenitic High Interstitial Steels - The Role of N and C	
M. Schymura and A. Fischer	403
Damage Evaluation of Ferrite and Ferrite-Pearlite Steel during Fatigue Crack Initiation by EBSD	
M. Hayakawa, M. Wakita and E. Nakayama	410
Low-Cycle Fatigue Behaviour of a Ni-Based Single-Crystal Superalloy	
M. Segersäll, J. Moverare, D. Leidermark and K. Simonsson	416
Low-Cycle Fatigue Crack Growth in Ti-6242 at Elevated Temperature	
R. Brommesson, M. Hörmqvist and M. Ekh	422
C. Ruffing and E. Kerscher	428
Period of Fine Granular Area Formation of Bearing Steel in Very High Cycle Fatigue Regime	
N. Oguma, N. Sekisugi, K. Kida, Y. Odake and T. Sakai	434
Effect of Geometry and Distribution of Inclusions on the VHCF Properties of a Metastable Austenitic Stainless Steel	
A. Grigorescu, P.M. Hilgendorff, M. Zimmermann, C.P. Fritzen and H.J. Christ	440
Experimental Investigations and Damage Calculations of a Load Time History in the Very High Cycle Fatigue	
T. Müller and M. Sander	446
Cyclic Slip Localization and Crack Initiation in Crystalline Materials	
J. Polák and J. Man	452
Identifying the Effect of 475°C Embrittlement on the Cyclic Stress-Strain Response of Duplex Stainless Steel by Means of the Change in the Yield Stress Distribution	
K. Wackermann and H.J. Christ	458
Influence of Surface Morphology on the Fatigue Behavior of Metastable Austenitic Steel	
R. Skorupski, M. Smaga and D. Eifler	464
Cyclic Deformation Response of Polycrystalline OFHC Copper under Pure Compression Fatigue	
T.Y.J. Hsu and Z.R. Wang	470
Fatigue Behavior of Precipitation Hardening Alloys in the LCF and VHCF Regime	
M. Zimmermann, C. Stoecker, M. Cremer, A. Kolyshkin and H.J. Christ	476

Investigation of the Three-Dimensional Shape of Slip Bands in Fatigued Dual Phase Steel L. Zellmer, S. Tereschenko, A. Brueckner-Foit and P. Lehmann	482
Mutual Interaction between Fatigue Crack Initiation/Propagation and Microstructural Features in Cast Aluminum Alloys U. Krupp, A. Giertler, S. Siegfanz and W. Michels	488
Experimental and Theoretical Study of the Performance of Reinforced Concrete Specimen Subjected to Cyclic Loading and Aggressive Environment J. Göringer and M. Foglar	494
Unifying Monotonic and Hysteresis Material Properties for Notch Plasticity Analysis under Variable Amplitude Loads X.B. Yu, Q.C. Liu and C. Wallbrink	500
Low Cycle Fatigue Behaviour of a Turbine Blade Made of Nickel Base Wrought Alloy B. Sahoo and S.K. Panigrahi	506
Fatigue Life Analysis of Specimens Subjected to Infrequent Severe Loading Using a Nonlinear Kinematic Hardening Cyclic Plasticity Model W.P. Hu and C. Wallbrink	512
An Overview of the Fatigue of Polychloroprene Rubber J.L. Poisson, F. Lacroix, S. Méo, G. Berton and N. Ranganathan	518
AFM and FIB Study of Cyclic Strain Localization and Surface Relief Evolution in Fatigued f.c.c. Polycrystals J. Man, M. Valtr, I. Kuběna, M. Petrenec, K. Obrtlík and J. Polák	524
In Situ Study of the Mechanisms of High Temperature Damage in Elastic-Plastic Cyclic Loading of Nickel Superalloy M. Petrenec, J. Polák, T. Šamořil, J. Dluhoš and K. Obrtlík	530
Very High Cycle Fatigue in Pulsed High Power Spallation Neutron Source Z.H. Xiong, M. Futakawa, T. Naoe and K. Maekawa	536
Simulation of Surface Crack Initiation Induced by Slip Localization and Point Defect Kinetics M. Sauzay and J. Liu	542

XI. Damage Evaluation and Fatigue Design

Fatigue Monitoring of Double Surface Defects Using PZT Based Electromechanical Impedance and Digital Image Correlation Methods V.G.M. Annamdas, J.H.L. Pang, Y.X. Chew, H.J. Hoh, K. Zhou and B. Song	551
Effect of Stress Ratio and Loading Mode on High Cycle Fatigue Properties of Extruded Magnesium Alloys K. Shiozawa, A. Ikeda and T. Fukumori	557
Fatigue Crack Propagation Limit Curves for High Strength Steels and their Application for Engineering Critical Assessment Calculations J. Lukács and M. Gáspár	563
Titanium Alloy Developments For Future Fan Disc Applications – The Fatigue Response of "Alloy 104" J.S. Hewitt, M.J. Thomas, P. Garratt and M.R. Bache	569
High-Cycle Fatigue Properties of Carbon Steel and Work-Hardened Oxygen Free Copper in High Pressure Hydrogen M. Kubota and K. Kawakami	575
Investigation of Fatigue Crack Acceleration under Variable Amplitude Loading for a Structural Steel and Aluminium Alloy M.J. Doré and S.J. Maddox	581
Fatigue Analysis and Design of Composite-Metal Joints in Primary Aircraft Structures A.C. Rufin and R.L. Jochum	588
Nondestructive Evaluation of Mechanically Loaded Advanced Marine Composite Structures M.E. Ibrahim, A.W. Phillips, R.J. Ditchburn and C.H. Wang	594
Evaluation of Fatigue Damage by Diffraction Contrast Tomography Using Synchrotron Radiation D. Shiozawa, Y. Nakai, R. Miura and S. Matsuda	600

Experimental Study of Relationship between Energy Dissipation and Fatigue Damage from Observation of Slip Band by Atomic Force Microscope	606
D. Shiozawa, K. Inaba, A. Akai and T. Sakagami	

XII. Damage Tolerance/Aging Aircraft

Optimization of Numerical Analyses for Maintenance of Fuselage Skins with Rectangular Repairs	
--	--

V. Pastoukhov, C.A. Reis Pereira Baptista, H.D.S. Teixeira Junior and P.R.P. Manzoli	615
--	-----

Residual Fatigue Properties of a 2024-T351 Aluminium Alloy from the Teardown of AIRBUS A320 Wing Panels after Service	
--	--

F. Billy, G. Hénaff, G. Benoit and S. van der Veen	621
--	-----

Effects of Bonded Crack Retarders on Fatigue Parameters of FSWed Integral Panel	
--	--

Y.E. Ma and P.F. Xu	627
---------------------	-----

Comparison of Tensile and Compressive Creep-Fatigue Damage Behavior of Cellular Composites	
---	--

S. Diel and O. Huber	633
----------------------	-----

XIII. Experimental Techniques

Thermal Cycling Fatigue of Thermal Barrier Coatings - Rig and Experiment Design	
--	--

R. Eriksson, H. Brodin, S. Johansson, L. Östergren and X.H. Li	641
--	-----

XIV. Fatigue Life Enhancement

Effect of Ultrasonic Shot Peening on the Fatigue Strength of Stainless Cast Steel ASTM CA6NM for Hydraulic Turbine Runner	
--	--

J. Arakawa, M. Kakuta, Y. Hayashi, R. Tanegashima, H. Akebono, M. Kato and A. Sugeta	649
--	-----

Development of Low Temperature Nitriding Process and its Effects on the 4-Points Bending Fatigue Properties of Commercially Pure Titanium	
--	--

S. Kikuchi, Y. Nakamura, A. Ueno and K. Ameyama	656
---	-----

Improvement of Fatigue Properties in a Cast Aluminum Alloy by Roller Burnishing and Friction Stir Processing	
---	--

Y. Nakamura, M. Nakajima, H. Masuda, T. Kakiuchi and Y. Uematsu	662
---	-----

Influence of Shot Peening on the Fatigue Strength of Custom 465 Stainless Steel for Aeronautic Application	
---	--

R.G. Bonora, H.J.C. Voorwald and M.O.H. Cioffi	668
--	-----

Nitriding Effect on Corrosion Fatigue Strength of Low Alloy Steel in 1% HCl Aqueous Solution	
---	--

R. Ebara, Y. Fukushima, S. Nakagawa and R. Ueji	674
---	-----

Hole Cold Expansion the Fatigue Mitigation Game Changer of the Past 50 Years	
---	--

L. Reid	679
---------	-----

XV. Fatigue Life Prediction and Test

Fractographic Study on the Use of Rainflow Counting for Small and Long Cracks in AA7050	
--	--

P. White and D.S. Mongru	687
--------------------------	-----

F-35 Full Scale Durability Modeling and Test	
---	--

D.L. Ball, P.C. Gross and R.J. Burt	693
-------------------------------------	-----

Development of CGAP for Fatigue Damage and Crack Growth Analysis: Verification, Validation and Examples of Application	
---	--

C. Wallbrink and W.P. Hu	702
--------------------------	-----

Analysis of Black Hawk Main Transmission Support Beam In-Service Fatigue Crack	
---	--

J. Vine, P. Jackson and W.P. Hu	708
---------------------------------	-----

Helicopter Airframe Fatigue Spectra Truncation and Verification	
--	--

J. Vine, L. Krake and B. Krieg	714
--------------------------------	-----

Helicopter Airframe Fatigue Spectra Generation	720
L. Krake	
Probabilistic Vibration Analysis of a Mistuned Integrally Bladed Disk	726
G.X. Chen and J.F. Hou	
A Modified Compliance Method for Automatically Measuring Fatigue Crack Growth <i>In Situ</i> during Spectrum Fatigue Testing	732
W. Zhuang and Q.C. Liu	
Life Extension of F/A-18 LAU-7 Missile Launcher Housings Using Rework Shape Optimisation	739
M. Heller, J. Calero, R. Wescott, S.A. Barter, J. Choi and G. Surtees	

XVI. Fatigue Modelling and Simulation

Development of New Fatigue Model for New Zealand Dense Graded Hot Mix Asphalts	747
M.F. Saleh	
Experimental Study on the Multistage Strength Degradation and the Associated Strain Energy Variation of S25C	753
Z.H. Shi, M. Nakano and C.P. Liu	
Modelling of Fatigue Crack Growth in Inconel 718 under Hold Time Conditions - Application to a Flight Spectrum	759
E. Lundström, K. Simonsson, T. Måansson and D. Gustafsson	
A Cohesive Zone Model to Simulate Fatigue Crack Propagation under High Pressure Gaseous Hydrogen	765
G. Bilotta, C. Moriconi, G. Hénaff, M. Arzaghi and D. Halm	
Rainflow-on-the-Fly Methodology: Fatigue-Crack Growth under Aircraft Spectrum Loading	771
J.C. Newman	
Numerical Simulation of Fatigue Crack Growth Rate and Crack Retardation due to an Overload Using a Cohesive Zone Model	777
S. Silitonga, J. Maljaars, F. Soetens and H.H. Snijder	
Stress Intensity Factor Solutions for Narrow Plates	784
M.J. Hammond and S.A. Fawaz	
A Probabilistic Two-Scale Approach to Predict the High Cycle Fatigue Behaviour of Ti-Al6-V4 Parts Machined by High Pressure Water Jet Assisted Turning	791
P. Mella, R. Billardon and R. Desmorat	
A Deviatoric Stress-Strain Function for Fatigue Life Analysis	797
P.C.R. Sree and D. Kujawski	
Fatigue Assessment of Existing Shiploaders	803
F. Gatto	
Constitutive Modeling for Cyclic Behavior of AZ31B Magnesium Alloy and its Application	809
S.B. Behravesh, H. Jahed, S.B. Lambert and M. Chengji	
The Effect of the Microstructure and Defects on Crack Initiation in 316L Stainless Steel under Multiaxial High Cycle Fatigue	815
R. Guerchais, F. Morel and N. Saintier	
The Energy Based Approach to Fatigue	821
N. Ranganathan	
Assessing Structural Safety of Bolted Joints Subject to Cyclic Loading Using Advanced Nonlinear FEA	827
J.M. Alden and P.H. Brand	
Physically-Based Simulations of the Cyclic Behavior of FCC Polycrystals	833
M. Sauzay, J. Liu, F. Rachdi, L. Signor, T. Ghidossi and P. Villechaise	

XVII. Fatigue of Coatings

Influence of HVOF Coating on the Fatigue Strength of 15-5 PH Stainless Steel	843
H.J.C. Voorwald, M.O.H. Cioffi and G.S. Júnior	

Effect of Thermal Barrier Coating on Low Cycle Fatigue Behavior of Cast Inconel 713LC at 900 °C

K. Obrlík, S. Hutařová, L. Čelko, M. Juliš, T. Podrábský and I. Šulák

848

Fatigue Crack Development in Epoxy Coatings on Steel Substrate: The Role of Coating and Substrate Properties in Determination of the Onset of Fatigue Cracks

T.Y. Wu, D. Arye, P.E. Irving, F.M. Zhao and P. Jackson

854

XVIII. Fracture Processes and Fatigue in Rocks

Dependence of Static Fatigue Tests on Experimental Configuration for a Crystalline Rock

J. Kear and A.P. Bunker

863

Large-Scale Deformation Patterning in Geomaterials Associated with Grain Rotation

M. Esin, A.V. Dyskin and E. Pasternak

872

The Cyclic Loading as a Result of the Stick-Slip Motion

I. Karachevtseva, A.V. Dyskin and E. Pasternak

878

The Fracture Characteristic of Mode III Rock Crack under Different Temperature

L.Y. Li, T.W. Tang, Z.Q. Xu, W.B. Liu and G.Y. Zhou

884

XIX. Fretting and Contact Fatigue

Reduction in Fretting Fatigue Strength of Austenitic Stainless Steels due to Internal Hydrogen

R. Komoda, N. Yoshigai, M. Kubota and J. Furtado

891

Fretting Fatigue Behavior of Titanium Alloy Coated with Functionally Graded Ti/TiN Film

M. Nakatani, S. Shimizu, Y. Harada and H. Uchida

897

Fatigue Stress Ratio Effect on Fretting-Fatigue Crack Nucleation: Comparison between Multi-Axial and Uni-Axial Predictions

C. Gadiolle and S. Fourny

903

XX. Growth of Short and Long Cracks

Description of Small Fatigue Crack Propagation in ODS Steel

P. Hutař, I. Kuběna, M. Šmíd, M. Ševčík, T. Kruml and L. Náhlík

911

Fatigue Crack Propagation Behavior of AZ61 Magnesium Alloy under Controlled Cathodic Potential

T. Taniguchi, Y. Uematsu, Y. Hatano, T. Kakiuchi, M. Nakajima and Y. Nakamura

917

Investigation of Fatigue Crack Propagation in Nickel Superalloy Using Diffraction Contrast Tomography and Phase Contrast Tomography

O.M.D.M. Messé, J. Lachambre, A. King, J.Y. Buffière and C.M.F. Rae

923

Calculating the Resistance of a Grain Boundary against Fatigue Crack Growth

A.F. Knorr and M. Marx

929

Thermographic Investigation of Fatigue Crack Propagation in a High-Alloyed Steel

J. Bär and S. Seifert

936

Effect of Hydrogen Gas on the Growth of Small Fatigue Crack in JIS-SCM435

H. Itoga, H. Matsunaga and S. Matsuoka

942

The Effect of Crack Growth Retardation when Comparing Constant Amplitude to Variable Amplitude Loading in an Aluminium Alloy

M. Burchill, S.A. Barter and M. Jones

948

Fatigue Lifetime and Crack Growth Behavior of WC-Co Cemented Carbide

H. Mikado, S. Ishihara, N. Oguma, K. Masuda and S. Kawamura

955

Fatigue Crack Growth in a Precipitation-Hardened Martensitic Stainless Steel: Influence of Ageing, Temperature and Loading History

L.D. Aboumou, G. Hénaff, M. Arzaghi and S. Pommier

961

XXI. Laser Shock Peening

Improvement in Fatigue Strength of Friction Stir Welded Aluminum Alloy Plates by Laser Peening	969
Y. Sano, K. Masaki and K. Hirota	
Laser Shock Peening on a 6056-T4 Aluminium Alloy for Airframe Applications	974
D. Glaser, C. Polese, R.D. Bedekar, J. Plaisier, S. Pityana, B. Masina, T. Mathebula and E. Troiani	
Fatigue Life Recovery via Laser Shock Peening in Mechanically Damaged Aluminium Sheet; Experiments and Prediction Models	980
N. Smyth and P.E. Irving	
Fatigue Crack Retardation in LSP and Sp Treated Aluminium Specimens	986
E. Hombergsmeier, V. Holzinger and U.C. Heckenberger	
Laser Shock Peening to Repair, Design and Manufacture Current and Future Aircraft Structures by Residual Stress Engineering	992
D. Furfari	

XXII. Life Prediction Methodology and Software Development

Fatigue Crack Growth and Coalescence Algorithm Starting from Multiple Surface Cracks	1003
J.H.L. Pang and Y.X. Chew	
Integrating Fatigue Crack Growth into Reliability Analysis and Computational Materials Design	1009
R.C. McClung, M.P. Enright, J.P. Moody, Y.D. Lee and J. McFarland	
A New Progressive Curvilinear Strain Energy-Based Crack Growth Modeling Algorithm Using Multicomplex Variable Finite Elements	1015
H. Millwater and D. Wagner	
Numerical Fatigue Analysis for Twin Roll Cast Magnesium Sheet Metal Structures	1021
J. Dallmeier, O. Huber and H. Saage	
High Temperature Multiaxial Creep-Fatigue Life Prediction for YH61 Nickel-Base Single Crystal Superalloy	1027
W.Z. Wang, M. Sakane, T. Itoh, A. Yoshinari, N. Isobe and N. Matsuda	
Anisotropic Life Prediction for Single Crystal Nickel-Base Flat Plate with a Hole	1033
C.L. Dong, H.C. Yu and Y. Li	

XXIII. Management of Fatigue and Reliability

Localized Fatigue Failure Analysis of Aluminium Crewboats due to Propeller Pulse Loads: A Case Study	1041
T.M. Leacy and R. Ojeda	
Bayesian Updating of Aircraft Risk Assessments Using Results of Inspection	1047
R.F. Torregosa and W.P. Hu	
Structural Integrity – Yesterday – Today – Tomorrow	1053
M. Guillaume, A. Uebersax, G. Mandanis and C. Huber	
Pseudo Fatigue Testing for Rapid Certification to Service	1059
L. Molent, S.A. Barter, M. Gordon and L. Weibler	
Practical Application of Structural Repair Fatigue Life Determination on the AP-3C Orion Platform	1065
J. Ayling, A. Bowler, G. Brick and M. Ignjatovic	
C-130H Centre Wing Lower Surface Tang Blend Repair Management	1071
R. Stewart, A. Ng, S. Trezise, P. East and K. Jackson	
QinetiQ Aircraft Structural Integrity Experience and Lessons Learnt	1077
M. Houston, K. Watters, J. Moews and R. Stewart	
Cost Effective Safety from Full System Teardowns	1084
R. Boykett	

XXIV. Microstructural Aspects

Development of a Probabilistic Model for the Prediction of Fatigue Life in the Very High Cycle Fatigue (VHCF) Range Based on Inclusion Population	1093
A. Kolyshkin, A. Grigorescu, E. Kaufmann, M. Zimmermann and H.J. Christ	
Fatigue Crack Growth in Ultrafine-Grained Copper Obtained by ECAP	1099
M. Arzaghi, C. Sarrazin-Baudoux and J. Petit	
Fatigue Behavior and Life Prediction of an Equiaxed Crystal Nickel-Base Superalloy under Different Dwell Times and Strain Ratios	1105
H.C. Yu, C.L. Dong and Y. Li	
Study of the Effects of Two-Step Ageing Heat Treatment on Fatigue Crack Growth on an AA7050 Aluminum Alloy	1111
L.O. Ribas Lima, S.C. Jacumasso, C.O.F.T. Ruchert, J.P. Martins and A.L. Moreira Carvalho	

XXV. New Materials (MMCs, CMCs, Intermetallics, Hybrid Materials)

Numerical Modeling of Graphene/Polymer Interfacial Behaviour Using Peel Test	1119
Y.Y. Jia and W.Y. Yan	
Fatigue of Ultra-Fine Grained α-Brass	1125
Y. Nakai, T. Imanaka and D. Shiozawa	
Cyclic Deformation of a Modern TiAl Alloy at High Temperatures	1131
T. Kruml, A. Chlupová and K. Obrtlik	

XXVI. Rail Transport

Influence of Short Thermal Cracks on the Material Behaviour of a Railway Wheel Subjected to Repeated Rolling	1139
S. Caprioli and A. Ekberg	
On Constitutive Models for Ratcheting of a High Strength Rail Steel	1146
C.L. Pun, Q.H. Kan, P.J. Mutton, G.Z. Kang and W.Y. Yan	
Fretting Fatigue Testing of Carburized Alloy Steel in Very High Cycle Regime Using an Ultrasonic Torsional Fatigue Testing Machine	1152
Y. Shimamura, A. Kokubo, H. Ishii, K. Tohgo, T. Fujii, T. Yagasaki and M. Harada	
On the Evaluation of the Stress State in Rail Head for Assessing Fatigue Resistance	1157
C.L. Pun, Q.H. Kan, P.J. Mutton, G.Z. Kang and W.Y. Yan	
Fatigue in Railway Components - Understanding vs. Resolution	1163
J.M. Cookson and P.J. Mutton	
Rail Bogie Structural Assurance	1169
R. Stewart, P. Hayes, S. Trezise, M. Houston, A. Jackson and T. Cooper	
Calculation of Critical Crack Size of Repair Welded Rail	1175
H.K. Jun and J.W. Seo	
Fatigue Analysis of the Rail Underhead Radius under High Axle Load Conditions	1181
S.A. Ranjha, P.J. Mutton and A. Kapoor	

XXVII. Reliability Analysis

Probabilistic Damage Tolerance Analysis for General Aviation	1191
H. Millwater, J.D. Ocampo and A. Castaldo	
Material Scatter in Crack Growth Rates of 7075-T7351 under Spectrum Loading	1197
W.P. Hu, B. Krieg and R.F. Torregosa	

XXVIII. Residual Stresses and Fatigue

A Detailed Evaluation of the Effects of Bulk Residual Stress on Fatigue in Aluminum	1205
D.L. Ball, M.A. James, R.J. Bucci, J.D. Watton, A.T. DeWald, M.R. Hill, C.F. Popelar and R.C. McClung	

Fatigue Crack Growth Rate in Laser-Welded Web Core Sandwich Panels - Fatigue Crack Propagation in Welded Base Metal

A. Cernescu, H. Remes, P. Lehto and J. Romanoff

1212

Repairing and Preserving Bridge and Steel Structure Using an Innovative Crack Arrest Repair System

L. Reid

1217

XXIX. Structural Health Monitoring and Prognostics

Proposal of an Eigen-Strain Estimation for Determination of Residual Stresses Considering the Influence of Machining

M. Ogawa

1225

Influence of Cyclic Deformation Induced Phase Transformation on the Fatigue Behavior of the Austenitic Steel X6CrNiNb1810

A. Sorich, M. Smaga and D. Eifler

1231

Scattering of the Fundamental Symmetric Wave Mode Incident at a Defect on the Blind Side of a Weep Hole in an Isotropic Plate

B.S. Vien, N. Nadarajah, W.K. Chiu and L.R.F. Rose

1237

Preliminary Study on the Acoustic Emission Wave Velocity on Filament Wound Glass Fiber Reinforced Polymer Pipes and its Correspondence with the Winding Angle

A. Ortenzi, A. Corvi and A. Virga

1243

Scattering Phenomena of Edge Guided Waves at and around Notches

N. Nadarajah, B.S. Vien, W.K. Chiu and L.R.F. Rose

1249

Durability of Embedded PZTs in Structural Health Monitoring Systems under Cyclic Loading

S. Yoo, A.A. Khatibi and E. Kandare

1255

Endurance Testing of a Vibration Energy Harvester for Structural Health Monitoring

G.A. Hart, S.D. Moss, D.J. Nagle and S.C. Galea

1261

Detection and Monitoring of Fatigue Cracks in Metallic Structures Using Acoustic Emission: Routes to Quantification of Probability of Detection

D. Gagar, P. Foote and P.E. Irving

1268

XXX. Thermomechanical Fatigue

Material Modelling and Lifetime Prediction of Ni-Base Gas Turbine Blades under TMF Conditions

S. Gruetzner, B. Fedelich, B. Rehmer and B. Buchholz

1277

Modelling of TMF Crack Initiation in Smooth Single-Crystal Superalloy Specimens

D. Leidermark, M. Segersäll, J. Moverare and K. Simonsson

1283

Investigation on Fatigue Crack Interaction with Grain Orientation during TMF Tests in Nickel-Base Superalloy

O.M.D.M. Messé, S. Stekovic, M. Hardy and C.M.F. Rae

1289

Fatigue Crack Thresholds Significantly Affected by Thermo-Mechanical Loading Histories in an Austenitic and a Ferritic Low Alloy Steel

M. Okazaki, M. Muzvidziwa, R. Iwasaki and N. Kasahara

1295

Crack Growth of a Polycrystalline Nickel Alloy under TMF Loading

C.J. Pretty, M.T. Whittaker and S.J. Williams

1302

Evaluation of Conventional Al 2024 Fatigue Limit in Fatigue Test Using Thermographic Measurement: Effect of Frequency

S. Seitl, J. Klusák, F. Pelayo and A. Canteli

1308

Influence of Extremum Temperatures on TMF of a Ni-Base Superalloy

M.M. Kirka, S.R. Shinde, P.W. Gravett and R.W. Neu

1314

Influence of the Strain Rate on the Low Cycle Fatigue Life of an Austenitic Stainless Steel with a Ground Surface Finish in Different Environments

T. Poulain, J. Mendez, G. Hénaff and L. de Baglion

1320

XXXI. Variable Amplitude Loads, Multiaxial and Mixed Mode Fatigue

Specificity of Crack Initiation under Equibiaxial Fatigue: Development of a New Experimental Device S. Bradaï, C. Gourdin, S. Courtin, J.C. Leroux and C. Gardin	1329
Low Cycle and Multiaxial Fatigue Behavior of Three Al-Mg-Si Alloys D.F. Laurito-Nascimento, A.M.B. da Silva Antunes, C.A. Reis Pereira Baptista, J.C. Dias and A. Souza	1335
High-Cycle Fatigue Behaviour of Pure Tantalum under Multiaxial and Variable Amplitude Loadings D. Marechal, N. Saintier, T. Palin-Luc and F. Nadal	1341
Accurate Prediction of Fatigue Life under Random Loading N. Takeda and T. Naruse	1347
Experiments and Interpretations of some Load Interaction Phenomena in Fatigue Crack Growth Related to Compressive Loading C. Benz and M. Sander	1353
A New Criterion for Evaluating Multiaxial Fatigue Damage under Multiaxial Random Loading Conditions V. Anes, L.G. Reis and M. de Freitas	1360
AZ31 Magnesium Alloy Multiaxial LCF Behavior: Theory, Simulation and Experiments L.G. Reis, V. Anes and M. de Freitas	1366
A Flexible HCF Modeling Framework Leading to a Probabilistic Multiaxial Kitagawa-Takahashi Diagram D. Bellett, E. Pessard and F. Morel	1372
Fundamental Concepts for Formulating Fatigue Strength Diagrams of Notched Metals H. Matsuno	1379
Fatigue Failure Life of SS400 Steel under Non-Proportional Loading in High Cycle Region T. Morishita, S.L. Liu, T. Itoh, M. Sakane, H. Kanayama, M. Sakabe and N. Takeda	1385
Visualization of Multiaxial Stress/Strain State and Evaluation of Failure Life by Developed Analyzing Program under Non-Proportional Loading S.L. Liu, T. Itoh and N. Fujii	1391
Fatigue Behaviour of Laser Beam Welded Circular Weld Seams under Multi-Axial Loading M. Zimmermann, J. Bretschneider, G. Kirchhoff, U. Stamm, J. Standfuss and B. Brenner	1397
Notch Effects on Fatigue Behavior of Thermoplastics S. Mortazavian and A. Fatemi	1403

XXXII. Very-High-Cycle Fatigue

High-Temperature Ultrasonic Fatigue Testing at 1000°C Y. Furuya, K. Kobayashi, M. Hayakawa, M. Sakamoto, Y. Koizumi and H. Harada	1413
Initiation from Low Cycle Fatigue to Gigacycle Fatigue C. Bathias and C. Wang	1419
Partition of Cyclic Plasticity in an Austenitic-Ferritic Duplex Stainless Steel and its Significance for Fatigue Crack Initiation under High and Very High Cycle Fatigue Loading Conditions B. Dönges, M. Söker, A. Giertler, U. Krupp, C.P. Fritzen and H.J. Christ	1424
Influence of Frequency and Testing Technique on the Fatigue Behaviour of Quenched and Tempered Steel in the VHCF-Regime N. Schneider, B. Pyttel, C. Berger and M. Oechsner	1430
Formation Mechanism of Specific Fracture Surface Region in the Sub-Surface Fracture of Titanium Alloy H. Oguma and T. Nakamura	1436

XXXIII. Welding, Casting and Other Manufacturing Technologies

Influence of Weld Imperfections on the Fatigue Behaviour of Resistance Spot Welded Advanced High Strength Steels	1445
M. Rethmeier	
On the Effect of Electrodischarge Drilling on the Fatigue Life of Inconel 718	1451
E. Bassoli, A. Baldini, A. Gatto, A. Strozzi and L. Denti	
Fatigue and Fatigue Crack Propagation of Laser Beam-Welded AA2198 Joints and Integral Structures	1457
N. Kashaev, S. Chupakhin, J. Enz, V. Ventzke, A. Groth, M. Horstmann and S. Riekehr	
Behaviour of Friction Stir Welded Joints Made out of Two Aluminium Alloys under Cyclic Loading Conditions	1463
J. Lukács and Á. Meilinger	
Reduction in Fatigue Strength of Arc Welded Aluminium 5083-H111 on Immersion in NaCl	1469
M. du Toit and K. Mutombo	
Influence of Process-Related Defects on the Fatigue Behaviour of Welded Aluminium Joints at Very High Cycles	1476
M. Cremer, A. Kolyshkin, M. Zimmermann and H.J. Christ	
Effect of Fine-Grained Microstructure Induced by Induction-Heating Fine Particle Peening Treatment on Fatigue Properties of Structural Steel (0.45% C)	1482
K. Murai, R. Toyama, J. Komotori, K. Fukazawa, Y. Misaka and K. Kawasaki	
Fatigue Behaviour of Friction Stir Welded Steel Joints	1488
J. Azevedo, V. Infante, L. Quintino and J. dos Santos	
Role of Friction Stir Channel Geometry on the Fatigue Behaviour of AA5083-H111 at 120°C and 200°C	1494
C. Vidal and V. Infante	
Microstructure and Strain-Based Fatigue Life Approach for High-Performance Welds	1500
H. Remes, P. Lehto and J. Romanoff	
Comparison of High Cycle Fatigue in 4340 and 300M Steel Welded with Fiber Laser	1507
A. de Souza Martins Cardoso, A.J. Abdalla, C.A. Reis Pereira Baptista and M.S.F. de Lima	
The Effectiveness of Design Procedures for Fatigue Design of Welds	1513
J.W.H. Price	
The Effect of Manufacturing Defects on the Fatigue Behaviour of Ti-6Al-4V Specimens Fabricated Using Selective Laser Melting	1519
Q.C. Liu, J. Elambasseril, S.J. Sun, M. Leary, M. Brandt and P.K. Sharp	
Weld Toe SCF and Stress Distribution Parametric Equations for Tension (Membrane) Loading	1525
A.K. Hellier, F.P. Brennan and D.G. Carr	

XXXIV. Poster

Effects of Carbon Fibre Geogrid Reinforcement on Propagation of Cracking in Pavement and Augmentation of Flexible Pavement Life	1533
A.B. Dizaj, H. Ziari and M.A. Nejhad	
Influence of Heat Treatment on Fatigue Resistance of Electron Beam Welded Dissimilar Titanium Alloy Joints	1539
S.Q. Wang, J.H. Liu and D.L. Chen	
Rolling Contact Fatigue and Wear Behavior of Rail Steel under Dry Rolling-Sliding Contact Condition	1545
J.W. Seo, H.K. Jun, S.J. Kwon and D.H. Lee	
Groove Angles Influence on Mechanical and Microstructural Properties of P460N Steel in SMAW	1551
R.M. Pezeshkian, P. Shayanfar and S. Shafaiepour	
Three-Dimensional Porous Carbonate Apatite with Sufficient Mechanical Strength as a Bone Substitute Material	1559
T. Nguyen Xuan Thanh, M. Maruta, K. Tsuru, S. Matsuya and K. Ishikawa	
Modeling Reliability of Critical Infrastructures with Application to Port Oil Transportation System	1565
K. Kołowrocki	

Optimizing Reliability of Critical Infrastructures with Application to Port Oil Piping Transportation System	1571
J. Soszyńska-Budny	
Postponing Crack Nucleation in 2024 Aluminium Alloy by Dynamic Precipitation from the Supersaturated State	1577
M. Mahdavi Shahri, R.C. Alderliesten, S. van der Zwaag and H. Schut	
Specimens for Simultaneous Mode II, III and II+III Fatigue Crack Propagation: Elasto-Plastic Solution of Crack Tip Stress-Strain Field	1585
J. Horníková, P. Šandera, S. Žák and J. Pokluda	
Review on the Fatigue of Composite Hybrid Joints Used in Aircraft Structures	1591
N. Chowdhury, W.K. Chiu and J. Wang	
A Review of Damage Tolerant Design, Certification and Repair in Metals Compared to Composite Materials	1597
N. Chowdhury, W.K. Chiu and J. Wang	
Low-Cycle Fatigue Behavior of TWIP Steel - Effect of Grain Size	1603
C.J. Rüsing, T. Niendorf, A. Frehn and H.J. Maier	
Crystal Plasticity Finite Element Simulations of Polycrystalline Aluminium Alloy under Cyclic Loading	1609
L. Li, L.M. Shen and G. Proust	
Modelling the Effect of Particle Size Distribution in Multiphase Flows with Computational Fluid Dynamics and Physical Erosion Experiments	1615
C.Y. Wong, J. Boulanger and G. Short	
Cyclic Deformation Behavior of a New N+C Alloying Austenitic Manganese Steel	1621
J. Kang, F.C. Zhang, Z.N. Yang and X.Y. Long	
Lifetime Improvement of AlSi6Cu4 Cylinder Head Alloy	1627
C. Kliemt, F. Wilhelm and J. Hammer	
Biaxial Specimen Design for Structures Subjected to Multi-Axial Loads	1633
N.T. Chowdhury, W.K. Chiu and J. Wang	
A Study on Estimation of S-N Curves for Structural Steels Based on their Static Mechanical Properties	1639
K. Mukoyama, K. Hanaki, K. Okada, A. Sakaida, A. Sugeta, I. Nishikawa, A. Ueno and T. Sakai	
Crack Growth Study of Dissimilar Steels (Stainless - Structural) Butt and Overlap Welded Unions under Cyclic Load	1645
A.L.G. Fuentes and A.V. del Rosario	
On the Development of a Prediction Methodology for Crack Growth in Fibre Metal Laminates with MSD Scenario	1651
W.D. Wang, R.C. Alderliesten and R. Benedictus	
Effects of Long-Time Aging on Fatigue Crack Propagation Behaviors of a Hardworking Ni-Based Superalloy	1657
L. Wang, Y. Liu, X. Song, G.H. Xu and G.P. Zhao	
Non-Classical Solutions of Critical Rock Behavior	1663
M.A. Guzev	
Fatigue and Damage Tolerance of Aging Airplane Structures	1669
B.G. Nesterenko and G.I. Nesterenko	
Finite Element Simulation of Stable Fatigue Crack Growth Using Critical CTOD Determined by Preliminary Finite Element Analysis	1675
S.J. Chu and C.H. Liu	
Mechanics of Fatigue Crack Propagation in Submicron-Thick Freestanding Copper Films	1681
H. Hirakata, T. Kondo, M. Sakihara and K. Minoshima	
Fatigue and Damage Tolerance Substantiation Approach for a Regional Jet	1688
T. Fukuoka, K. Tsukigase and K. Kumagai	
Analysis of the Fatigue Stress on Welded Joints of the U-Rib in an Orthotropic Steel Deck	1694
S.N. Hong, J.G. Park, S.K. Park and J.W. Choi	
Evaluation of the Serviceability of the Transverse Joint of a Modular Bridge under a Cyclic Load	1699
S.N. Hong, S.H. Kim, S.K. Park and J.W. Choi	
Effect of Microscopic Structure on High-Cycle Fatigue Behavior in Nano-Components	1705
T. Sumigawa, K. Matsumoto and T. Kitamura	

Plastic Slip and Early Stage of Fatigue Damage in Polycrystals: Comparison between Experiments and Crystal Plasticity Finite Elements Simulations	1711
L. Signor, E. Lacoste, P. Villechaise, T. Ghidossi and S. Courtin	
Wavelet-Based Feature Extraction Algorithm for Fatigue Strain Data Associated with the <i>k</i>-Means Clustering Technique	1717
T.E. Putra, S. Abdullah, D. Schramm, M.Z. Nuawi and T. Bruckmann	
Fatigue Behavior and Surface Sensitivity of Board-Shaped Sample of Powder Metallurgy FGH 96	1723
X.L. Liu, K. Zhao and C.J. Liu	
Prediction of Fatigue Crack Growth of Aged Hardening Al-Alloys under Variable Amplitude Loading	1729
M. Benachour, B. Zeggai, N. Benachour, M. Benguediab and A. Belmokhtar	
Fatigue Behavior of Weld Repaired AISI 4130 Aeronautic Steel Used in Critical Flight Safety Structures	1736
M.P. do Nascimento, C.C. Batista, C.P.M. Pereira and H.J.C. Voorwald	
Screw Dislocations Emitted from a Blunt Crack in a Piezoelectric Material	1742
H.P. Song and C.F. Gao	
Measurement and Simulation of Random Vibro-Impact Responses at Brake Guide Pins	1749
J.M. Mroueh and H.T. Kang	
Fatigue Life Prediction for Caliper Guide Pin under Random Vibrational Loading	1755
B.I. Antar and H.T. Kang	
Influence of Milling and Abrasive Waterjet Cutting on the Fatigue Behaviour of DP600 Steel Sheet	1761
P. Duarte, V. Infante and M. de Freitas	
High Cycle Fatigue Behavior and Microstructural Characterization of 6013-T4 Aluminum Alloy Laser Welded Joints	1767
R.H.M. de Siqueira, A.C. de Oliveira, R. Riva, A.J. Abdalla, C.A. Reis Pereira Baptista and M.S.F. de Lima	
Low Cycle Fatigue Estimation Based on the Critical Distance Stress Theory	1773
T. Hattori, M.A. Bin Ab Wahab and M. Yamashita	
Peculiarities of Elastic Waves Generated by Fatigue Tensile Fractures	1779
S. Turuntaev	
Study of Fatigue Crack Growth in Al-Mg-Si Alloys Using a Predictive Model under Positive and Negative Load Ratios	1785
S.V.P. Espeza, C.A. Reis Pereira Baptista, A.M.B. da Silva Antunes, V. Pastoukhov and M.A.S. Torres	
Numerical Analysis of the Effect of Slip Ratio on the Fatigue Crack Initiation Life in Rolling Contact	1791
D.H. Lee, J.W. Seo and S.J. Kwon	
Enhancement of Rolling Contact Wear and Fatigue Resistance of Wheel Steel by Laser Dispersed Treatment	1797
D.F. Zeng and L.T. Lu	
Modelling Fatigue Crack Growth Rates in Aluminium Plates Reinforced by Bonded Fibre-Metal Laminates for Fatigue Life Extension	1803
J. Doucet, X. Zhang and P.E. Irving	
Effect of Incipient Heat Damage on the Fatigue Properties of Aircraft Composites	1810
R. Ong and C.H. Wang	
Influence of Secondary Ageing on Fatigue Crack Propagation of the AA7050 Aluminum Alloy	1816
S.C. Jacumasso, L.O. Ribas Lima, J.P. Martins and A.L. Moreira Carvalho
