

Table of Contents

Foreword and Congress Committees

I. Biomaterials

Molecular Dynamics Investigation on Shearing between Osteopontin and Hydroxyapatite in Biological Materials

Z.B. Lai, C. Yan and A. Oloyede 3

Nanostructure and Fatigue Behavior of β -Type Titanium Alloy Subjected to High-Pressure Torsion after Aging Treatment

H. Yilmazer, M. Niinomi, K. Cho, M. Nakai, J. Hieda and Y. Todaka 9

II. Case Studies and Industrial Applications

Analysis and Design of Offshore Pile Foundation

S. Basack 17

Offshore Pile Foundation Subjected to Lateral Cyclic Load in Layered Soil

S. Basack and A.K. Banerjee 24

Fatigue Strength of Machined and Shot Peened Grey Cast Iron

M. Lundberg, R.L. Peng, M. Ahmad, D. Bäckström, T. Vuoristo and S. Johansson 30

On Thermo-Hydro-Mechanical (THM) Fatigue Damage of Historical Stone Buildings

D. Hoxha, N. Belayachi and D.P. Do 36

Effect of Thermal Cycling on the Mechanical Properties of a Continuous Fibre Composite Used for Car Clutch Facings

C. Flament, M. Salvia, B. Berthel and G. Crosland 42

The Role of Surface Topography on Fatigue Behaviour of Nickel Based Superalloys

D.T. Ardi, Y.G. Li, K.H.K. Chan, L. Blunt and M.R. Bache 48

Failure Analysis to Blades of Steam Turbines at Normal Conditions of Operations and Resonance

A.L. Tejeda, J.A. Rodríguez, J.M. Rodríguez, J.C. Garcia and M.A. Basurto-Pensado 54

Failure Analysis of Repeat Tooth Breakage of a 40MW Steam Turbine Load Gearbox

W. Liu 60

III. Case Studies, Materials and Processes

Fatigue of Cold Expanded Open Hole Coupons with Pre-Existing Cracks

P.S. Baburamani, R. Ogden, Q.C. Liu and P.K. Sharp 69

A Fractographic Investigation of a Failed Precombustion Chamber Nozzle from a Large Marine Diesel Engine

L. Davidson 75

Case Studies of Fatigue Failures in Defence Aircraft Components

C. Smith and D. Donnelly 81

The Influence of Corrosion Pits and Cold Expanded Fastener Holes on the Fatigue Life Aluminium 7075-T651

B. Withy, S. Campbell and G. Stephen 87

An Investigation of the Extent of Crack Closure for Crack Growth in an Aluminium Alloy

S.A. Barter, M. Burchill and M. Jones 93

Effect of Load Spectra and Stress Magnitude on Crack Growth Behavior Variability from Typical Manufacturing Defects

J.P. Gallagher and L. Molent 100

A Brief History of Structural Fatigue Testing at Fishermans Bend Australia

L. Molent 106

Fatigue Life Improvement of Laser Clad 7075 Aluminium Alloy by Deep Surface Rolling Technique	
Q.C. Liu, W. Zhuang and P.K. Sharp	115

IV. Civil and Mining Structures

Fatigue Assessment of Large Thin-Walled Structures with Initial Distortions	
I. Lillemäe, H. Remes and J. Romanoff	123
Retrofitting for Fatigue Cracks at Connection between the Main Girder Web and Lateral Girder Flange Using the Bolting-Stop-Hole Method with Attached Plates	
T. Mori, K. Sasaki and M. Nakanuma	130
A Self-Heating Approach to Characterize Anisotropy Effects in Fatigue Behaviour: Application to a Nineteenth Century Puddled Iron from a French Railway Bridge	
L. Gallegos Mayorga, S. Sire, S. Calloch, S. Yang, L. Dieleman and J.L. Martin	136
Evaluation of Bonding between High Modulus CFRP Sheet and Steel after Environmental Exposure and Fatigue Loading	
H.B. Liu, D. Borrie, X.L. Zhao, Y. Bai and R.K. Singh Raman	143
Improved Fatigue Life Assessment of Lighting Poles	
C.W.K. Hyland, W.G. Ferguson and K. Csikasz	149

V. Composites

A Brief Review of Fatigue Strengthening of Metallic Structures in Civil Engineering Using Fibre Reinforced Polymers	
X.L. Zhao and M. Motavalli	157
Stiffness Based Fatigue Characterisation of CFRP	
J. Brunbauer, F. Arbeiter, S. Stelzer and G. Pinter	166
Fatigue Crack Growth Rate in Mode I of a Carbon Fiber 5HS Weave Composite Laminate Processed via RTM	
M.Y. Shiino, R.C. Alderliesten, M.Y. Pitanga and M.O.H. Cioffi	172
The Influence of Orthotropy and Taper Angle on the Compressive Strength of Composite Laminates with Scarfed Holes	
M. Patel, S. Daynes and C.H. Wang	178
Notched Fatigue Behavior under Multiaxial Stress States	
N.R. Gates, A. Fatemi, D.F. Socie and N. Phan	185
Effect of Disbonds on the Fatigue Endurance of Composite Scarf Joints	
J.Y. Goh, S. Georgiadis, A.C. Orifici and C.H. Wang	191
Delamination Fatigue Properties of Z-Pinned Composites	
K. Pingkarawat and A.P. Mouritz	197

VI. Corrosion and Fatigue

Standardized Test Method for Corrosion Pit-to-Fatigue Crack Transition for AA7075-T651 Aluminum Alloy	
D. Mantha and S.A. Fawaz	205
Effects of Waveform and Cycle Period on Corrosion-Fatigue Crack Growth in Cathodically Protected High-Strength Steels	
M. Knop, N. Birbilis and S. Lynch	211
Influence of Load Signal Form and Variable Amplitude Loading on the Corrosion Fatigue Behaviour of Aluminium Alloys	
K. Bauer-Trossmann, L.H. Yu, T. Melz, M. Oechsner and H. Kaufmann	217
The Effect of <i>Ralstonia pickettii</i> on Environmental Fatigue Crack Growth of 7xxx Series Aluminum Alloys	
S.E. Galyon Dorman, B.K. Hoff, T.A. Reid, S.E. Collins and D.H. Henning	224
The Effect of Corrosion Inhibitors on Environmental Fatigue Crack Growth in Al-Zn-Mg-Cu	
S.E. Galyon Dorman	230

Experimental and Modeling Study of the Effect of Corrosion Pitting on Fatigue Failure Locations in Aircraft Components	
B.R. Crawford, C. Loader, Q.C. Liu, T.J. Harrison, P.K. Sharp and G. Härkegård	236
A Model for Predicting the Stress Concentration of Intergranular Corrosion around a Fastener Hole	
T.J. Harrison, B.R. Crawford, G. Clark and M. Brandt	242
Corrosion-Fatigue Crack Growth in Age-Hardened Al Alloys: Examples of Failures and Explanations for Fractographic Observations	
R. Byrnes, N. Goldsmith, M. Knop and S. Lynch	248
An Extended Finite Element Model Coupled with Level Set Method for Stable Pitting Corrosion	
A.S. Vagbharathi and S. Gopalakrishnan	254
Managing Fatigue from Corrosion Pits in Aircraft Structures	
L. Molent	261
Corrosion Fatigue Behaviour of a Common AZ91D Magnesium Alloy in Modified Simulated Body Fluid	
S. Jafari and R.K. Singh Raman	267
Three Ways of Sampling and Fatigue Test Results of Steel P92	
J. Volák and Z. Bunda	273
Effect of Environmental Corrosion on Fatigue Crack Growth Morphology: A Detailed Investigation of the Boundary between Fatigue and Corrosion Control Regimes	
S.R. Shah, I.L. Pryce, T.B. St John and J.M. Greer	278

VII. Crack Closure and Shielding

The Explanation of Stress Ratio Effect and Crack Opening Corrections for Fatigue Crack Growth in Metallic Materials	
R.C. Alderliesten	289
3D Numerical Study on how the Local Effective Stress Intensity Factor Range Can Explain the Fatigue Crack Front Shape	
C. Gardin, S. Fiordalisi, C. Sarrazin-Baudoux and J. Petit	295
Influence of Martensitic Phase on Microcrack Propagation in a Ferritic-Martensitic Steel	
A. Brueckner-Foit, P. Pitz, F. Zeismann and L. Zellmer	301
Experimental and Numerical Simulation Study of Plasticity-Induced and Roughness-Induced Fatigue Crack Closure	
K. Masuda, S. Ishihara, Y. Sugai and A.J. McEvily	307
Micro Fatigue Crack Propagation Behavior in a Duplex Stainless Steel Studied Using <i>In Situ</i> SEM/EBSD Method	
G.C. Chai, R.L. Peng and S. Johansson	313
Fatigue Crack Closure due to Surface Roughness and Plastic Deformation	
K. Walker, C.H. Wang and J.C. Newman Junior	319

VIII. Crack Growth Thresholds

Fatigue Crack Growth Behavior in the Threshold Region	
R.G. Forman and M. Zanganeh	327
Crack Growth Threshold Criterion Based on Calculation of Dynamic Stress Intensity Factors in the Mixed Mode (Complex Functions Theory Approach)	
S.H. Eslami	333
Influence of the Inclusion Type on the Threshold Value of Failure in the VHCF-Regime of High-Strength Steels	
P. Grad, D. Spriestersbach and E. Kerscher	339
Comparison of SGBEM-FEM Alternating Method and XFEM Method for Determining Stress Intensity Factor for 2D Crack Problems	
S. Sarkar, N. Apetre, N. Iyyer, N. Phan, K. Goel and S. Atluri	345
Influence of Crack Retardation on Fatigue Crack Propagation in Steels for Railway Axles	
L. Náhlík, P. Pokorný and P. Hutař	351

Investigations on the Fatigue Crack Propagation Threshold in Very High Cycle Fatigue C. Wang, D. Wagner and C. Bathias	357
--	-----

IX. Creep-Fatigue

J-Integral Approach to Creep-Fatigue Crack Propagation in Lead-Free Solder under Various Loading Waveforms K. Tanaka, T. Fujii and K. Fujiyama	365
Determination of Creep Crack Growth Threshold by Experiments under Elevated Temperature with Pre-Stressed Specimens H. Liu, R. Bao and B.J. Fei	371
Low Cycle Fatigue Behavior and Mechanism of Newly Developed Advanced Heat Resistant Austenitic Stainless Steels at High Temperature G.C. Chai	377
Low Cycle Fatigue and Creep-Fatigue Interaction Behaviour of Reduced Activation Ferritic Martensitic (RAFM) Steels with Varying W and Ta Contents R. Sandhya, V. Shankar, K. Mariappan, M.D. Mathew, T. Jayakumar and E.R. Kumar	383

X. Cyclic Deformation and Crack Initiation

Cyclic Deformation of Rare-Earth Containing Magnesium Alloys F.A. Mirza, D.L. Chen, D.J. Li and X.Q. Zeng	391
Fatigue Behaviour of AZ91 Magnesium Alloy in as-Cast and Severe Plastic Deformed Conditions L. Kunz and S. Fintová	397
Fatigue of Austenitic High Interstitial Steels - The Role of N and C M. Schymura and A. Fischer	403
Damage Evaluation of Ferrite and Ferrite-Pearlite Steel during Fatigue Crack Initiation by EBSD M. Hayakawa, M. Wakita and E. Nakayama	410
Low-Cycle Fatigue Behaviour of a Ni-Based Single-Crystal Superalloy M. Segersäll, J. Moverare, D. Leidermark and K. Simonsson	416
Low-Cycle Fatigue Crack Growth in Ti-6242 at Elevated Temperature R. Brommesson, M. Hörnqvist and M. Ekh	422
C. Ruffing and E. Kerscher	428
Period of Fine Granular Area Formation of Bearing Steel in Very High Cycle Fatigue Regime N. Oguma, N. Sekisugi, K. Kida, Y. Odake and T. Sakai	434
Effect of Geometry and Distribution of Inclusions on the VHCF Properties of a Metastable Austenitic Stainless Steel A. Grigorescu, P.M. Hilgendorff, M. Zimmermann, C.P. Fritzen and H.J. Christ	440
Experimental Investigations and Damage Calculations of a Load Time History in the Very High Cycle Fatigue T. Müller and M. Sander	446
Cyclic Slip Localization and Crack Initiation in Crystalline Materials J. Polák and J. Man	452
Identifying the Effect of 475°C Embrittlement on the Cyclic Stress-Strain Response of Duplex Stainless Steel by Means of the Change in the Yield Stress Distribution K. Wackermann and H.J. Christ	458
Influence of Surface Morphology on the Fatigue Behavior of Metastable Austenitic Steel R. Skorupski, M. Smaga and D. Eifler	464
Cyclic Deformation Response of Polycrystalline OFHC Copper under Pure Compression Fatigue T.Y.J. Hsu and Z.R. Wang	470
Fatigue Behavior of Precipitation Hardening Alloys in the LCF and VHCF Regime M. Zimmermann, C. Stoecker, M. Cremer, A. Kolyshkin and H.J. Christ	476

Investigation of the Three-Dimensional Shape of Slip Bands in Fatigued Dual Phase Steel L. Zellmer, S. Tereschenko, A. Brueckner-Foit and P. Lehmann	482
Mutual Interaction between Fatigue Crack Initiation/Propagation and Microstructural Features in Cast Aluminum Alloys U. Krupp, A. Giertler, S. Siegfanz and W. Michels	488
Experimental and Theoretical Study of the Performance of Reinforced Concrete Specimen Subjected to Cyclic Loading and Aggressive Environment J. Göringer and M. Foglar	494
Unifying Monotonic and Hysteresis Material Properties for Notch Plasticity Analysis under Variable Amplitude Loads X.B. Yu, Q.C. Liu and C. Wallbrink	500
Low Cycle Fatigue Behaviour of a Turbine Blade Made of Nickel Base Wrought Alloy B. Sahoo and S.K. Panigrahi	506
Fatigue Life Analysis of Specimens Subjected to Infrequent Severe Loading Using a Nonlinear Kinematic Hardening Cyclic Plasticity Model W.P. Hu and C. Wallbrink	512
An Overview of the Fatigue of Polychloroprene Rubber J.L. Poisson, F. Lacroix, S. Méo, G. Berton and N. Ranganathan	518
AFM and FIB Study of Cyclic Strain Localization and Surface Relief Evolution in Fatigued f.c.c. Polycrystals J. Man, M. Valtr, I. Kuběna, M. Petrenec, K. Obrtlík and J. Polák	524
<i>In Situ</i> Study of the Mechanisms of High Temperature Damage in Elastic-Plastic Cyclic Loading of Nickel Superalloy M. Petrenec, J. Polák, T. Šamořil, J. Dluhoš and K. Obrtlík	530
Very High Cycle Fatigue in Pulsed High Power Spallation Neutron Source Z.H. Xiong, M. Futakawa, T. Naoe and K. Maekawa	536
Simulation of Surface Crack Initiation Induced by Slip Localization and Point Defect Kinetics M. Sauzay and J. Liu	542

XI. Damage Evaluation and Fatigue Design

Fatigue Monitoring of Double Surface Defects Using PZT Based Electromechanical Impedance and Digital Image Correlation Methods V.G.M. Annamdas, J.H.L. Pang, Y.X. Chew, H.J. Hoh, K. Zhou and B. Song	551
Effect of Stress Ratio and Loading Mode on High Cycle Fatigue Properties of Extruded Magnesium Alloys K. Shiozawa, A. Ikeda and T. Fukumori	557
Fatigue Crack Propagation Limit Curves for High Strength Steels and their Application for Engineering Critical Assessment Calculations J. Lukács and M. Gáspár	563
Titanium Alloy Developments For Future Fan Disc Applications – The Fatigue Response of “Alloy 104” J.S. Hewitt, M.J. Thomas, P. Garratt and M.R. Bache	569
High-Cycle Fatigue Properties of Carbon Steel and Work-Hardened Oxygen Free Copper in High Pressure Hydrogen M. Kubota and K. Kawakami	575
Investigation of Fatigue Crack Acceleration under Variable Amplitude Loading for a Structural Steel and Aluminium Alloy M.J. Doré and S.J. Maddox	581
Fatigue Analysis and Design of Composite-Metal Joints in Primary Aircraft Structures A.C. Rufin and R.L. Jochum	588
Nondestructive Evaluation of Mechanically Loaded Advanced Marine Composite Structures M.E. Ibrahim, A.W. Phillips, R.J. Ditchburn and C.H. Wang	594
Evaluation of Fatigue Damage by Diffraction Contrast Tomography Using Synchrotron Radiation D. Shiozawa, Y. Nakai, R. Miura and S. Matsuda	600

Experimental Study of Relationship between Energy Dissipation and Fatigue Damage from Observation of Slip Band by Atomic Force Microscope D. Shiozawa, K. Inaba, A. Akai and T. Sakagami	606
--	-----

XII. Damage Tolerance/Aging Aircraft

Optimization of Numerical Analyses for Maintenance of Fuselage Skins with Rectangular Repairs V. Pastoukhov, C.A. Reis Pereira Baptista, H.D.S. Teixeira Junior and P.R.P. Manzoli	615
Residual Fatigue Properties of a 2024-T351 Aluminium Alloy from the Teardown of AIRBUS A320 Wing Panels after Service F. Billy, G. Hénaff, G. Benoit and S. van der Veen	621
Effects of Bonded Crack Retarders on Fatigue Parameters of FSWed Integral Panel Y.E. Ma and P.F. Xu	627
Comparison of Tensile and Compressive Creep-Fatigue Damage Behavior of Cellular Composites S. Diel and O. Huber	633

XIII. Experimental Techniques

Thermal Cycling Fatigue of Thermal Barrier Coatings - Rig and Experiment Design R. Eriksson, H. Brodin, S. Johansson, L. Östergren and X.H. Li	641
--	-----

XIV. Fatigue Life Enhancement

Effect of Ultrasonic Shot Peening on the Fatigue Strength of Stainless Cast Steel ASTM CA6NM for Hydraulic Turbine Runner J. Arakawa, M. Kakuta, Y. Hayashi, R. Tanegashima, H. Akebono, M. Kato and A. Sugeta	649
Development of Low Temperature Nitriding Process and its Effects on the 4-Points Bending Fatigue Properties of Commercially Pure Titanium S. Kikuchi, Y. Nakamura, A. Ueno and K. Ameyama	656
Improvement of Fatigue Properties in a Cast Aluminum Alloy by Roller Burnishing and Friction Stir Processing Y. Nakamura, M. Nakajima, H. Masuda, T. Kakiuchi and Y. Uematsu	662
Influence of Shot Peening on the Fatigue Strength of Custom 465 Stainless Steel for Aeronautic Application R.G. Bonora, H.J.C. Voorwald and M.O.H. Cioffi	668
Nitriding Effect on Corrosion Fatigue Strength of Low Alloy Steel in 1% HCl Aqueous Solution R. Ebara, Y. Fukushima, S. Nakagawa and R. Ueji	674
Hole Cold Expansion the Fatigue Mitigation Game Changer of the Past 50 Years L. Reid	679

XV. Fatigue Life Prediction and Test

Fractographic Study on the Use of Rainflow Counting for Small and Long Cracks in AA7050 P. White and D.S. Mongru	687
F-35 Full Scale Durability Modeling and Test D.L. Ball, P.C. Gross and R.J. Burt	693
Development of CGAP for Fatigue Damage and Crack Growth Analysis: Verification, Validation and Examples of Application C. Wallbrink and W.P. Hu	702
Analysis of Black Hawk Main Transmission Support Beam In-Service Fatigue Crack J. Vine, P. Jackson and W.P. Hu	708
Helicopter Airframe Fatigue Spectra Truncation and Verification J. Vine, L. Krake and B. Krieg	714

Helicopter Airframe Fatigue Spectra Generation L. Krake	720
Probabilistic Vibration Analysis of a Mistuned Integrally Bladed Disk G.X. Chen and J.F. Hou	726
A Modified Compliance Method for Automatically Measuring Fatigue Crack Growth <i>In Situ</i> during Spectrum Fatigue Testing W. Zhuang and Q.C. Liu	732
Life Extension of F/A-18 LAU-7 Missile Launcher Housings Using Rework Shape Optimisation M. Heller, J. Calero, R. Wescott, S.A. Barter, J. Choi and G. Surtees	739

XVI. Fatigue Modelling and Simulation

Development of New Fatigue Model for New Zealand Dense Graded Hot Mix Asphalts M.F. Saleh	747
Experimental Study on the Multistage Strength Degradation and the Associated Strain Energy Variation of S25C Z.H. Shi, M. Nakano and C.P. Liu	753
Modelling of Fatigue Crack Growth in Inconel 718 under Hold Time Conditions - Application to a Flight Spectrum E. Lundström, K. Simonsson, T. Månsson and D. Gustafsson	759
A Cohesive Zone Model to Simulate Fatigue Crack Propagation under High Pressure Gaseous Hydrogen G. Bilotta, C. Moriconi, G. Hénaff, M. Arzaghi and D. Halm	765
Rainflow-on-the-Fly Methodology: Fatigue-Crack Growth under Aircraft Spectrum Loading J.C. Newman	771
Numerical Simulation of Fatigue Crack Growth Rate and Crack Retardation due to an Overload Using a Cohesive Zone Model S. Silitonga, J. Maljaars, F. Soetens and H.H. Snijder	777
Stress Intensity Factor Solutions for Narrow Plates M.J. Hammond and S.A. Fawaz	784
A Probabilistic Two-Scale Approach to Predict the High Cycle Fatigue Behaviour of Ti-Al6-V4 Parts Machined by High Pressure Water Jet Assisted Turning P. Mella, R. Billardon and R. Desmorat	791
A Deviatoric Stress-Strain Function for Fatigue Life Analysis P.C.R. Sree and D. Kujawski	797
Fatigue Assessment of Existing Shiploaders F. Gatto	803
Constitutive Modeling for Cyclic Behavior of AZ31B Magnesium Alloy and its Application S.B. Behraves, H. Jahed, S.B. Lambert and M. Chengji	809
The Effect of the Microstructure and Defects on Crack Initiation in 316L Stainless Steel under Multiaxial High Cycle Fatigue R. Guerchais, F. Morel and N. Saintier	815
The Energy Based Approach to Fatigue N. Ranganathan	821
Assessing Structural Safety of Bolted Joints Subject to Cyclic Loading Using Advanced Nonlinear FEA J.M. Alden and P.H. Brand	827
Physically-Based Simulations of the Cyclic Behavior of FCC Polycrystals M. Sauzay, J. Liu, F. Rachdi, L. Signor, T. Ghidossi and P. Villechaise	833

XVII. Fatigue of Coatings

Influence of HVOF Coating on the Fatigue Strength of 15-5 PH Stainless Steel H.J.C. Voorwald, M.O.H. Cioffi and G.S. Júnior	843
---	-----

Effect of Thermal Barrier Coating on Low Cycle Fatigue Behavior of Cast Inconel 713LC at 900 °C	
K. Obrtlík, S. Hutařová, L. Čelko, M. Juliš, T. Podrábský and I. Šulák	848
Fatigue Crack Development in Epoxy Coatings on Steel Substrate: The Role of Coating and Substrate Properties in Determination of the Onset of Fatigue Cracks	
T.Y. Wu, D. Arye, P.E. Irving, F.M. Zhao and P. Jackson	854

XVIII. Fracture Processes and Fatigue in Rocks

Dependence of Static Fatigue Tests on Experimental Configuration for a Crystalline Rock	
J. Kear and A.P. Bungler	863
Large-Scale Deformation Patterning in Geomaterials Associated with Grain Rotation	
M. Esin, A.V. Dyskin and E. Pasternak	872
The Cyclic Loading as a Result of the Stick-Slip Motion	
I. Karachevtseva, A.V. Dyskin and E. Pasternak	878
The Fracture Characteristic of Mode III Rock Crack under Different Temperature	
L.Y. Li, T.W. Tang, Z.Q. Xu, W.B. Liu and G.Y. Zhou	884

XIX. Fretting and Contact Fatigue

Reduction in Fretting Fatigue Strength of Austenitic Stainless Steels due to Internal Hydrogen	
R. Komoda, N. Yoshigai, M. Kubota and J. Furtado	891
Fretting Fatigue Behavior of Titanium Alloy Coated with Functionally Graded Ti/TiN Film	
M. Nakatani, S. Shimizu, Y. Harada and H. Uchida	897
Fatigue Stress Ratio Effect on Fretting-Fatigue Crack Nucleation: Comparison between Multi-Axial and Uni-Axial Predictions	
C. Gandiolle and S. Fouvry	903

XX. Growth of Short and Long Cracks

Description of Small Fatigue Crack Propagation in ODS Steel	
P. Hutař, I. Kuběna, M. Šmid, M. Ševčík, T. Kruml and L. Náhlík	911
Fatigue Crack Propagation Behavior of AZ61 Magnesium Alloy under Controlled Cathodic Potential	
T. Taniguchi, Y. Uematsu, Y. Hatano, T. Kakiuchi, M. Nakajima and Y. Nakamura	917
Investigation of Fatigue Crack Propagation in Nickel Superalloy Using Diffraction Contrast Tomography and Phase Contrast Tomography	
O.M.D.M. Messé, J. Lachambre, A. King, J.Y. Buffière and C.M.F. Rae	923
Calculating the Resistance of a Grain Boundary against Fatigue Crack Growth	
A.F. Knorr and M. Marx	929
Thermographic Investigation of Fatigue Crack Propagation in a High-Alloyed Steel	
J. Bär and S. Seifert	936
Effect of Hydrogen Gas on the Growth of Small Fatigue Crack in JIS-SCM435	
H. Itoga, H. Matsunaga and S. Matsuoka	942
The Effect of Crack Growth Retardation when Comparing Constant Amplitude to Variable Amplitude Loading in an Aluminium Alloy	
M. Burchill, S.A. Barter and M. Jones	948
Fatigue Lifetime and Crack Growth Behavior of WC-Co Cemented Carbide	
H. Mikado, S. Ishihara, N. Oguma, K. Masuda and S. Kawamura	955
Fatigue Crack Growth in a Precipitation-Hardened Martensitic Stainless Steel: Influence of Ageing, Temperature and Loading History	
L.D. Aboumou, G. Hénaff, M. Arzaghi and S. Pommier	961

XXI. Laser Shock Peening

Improvement in Fatigue Strength of Friction Stir Welded Aluminum Alloy Plates by Laser Peening Y. Sano, K. Masaki and K. Hirota	969
Laser Shock Peening on a 6056-T4 Aluminium Alloy for Airframe Applications D. Glaser, C. Polese, R.D. Bedekar, J. Plaisier, S. Pityana, B. Masina, T. Mathebula and E. Troiani	974
Fatigue Life Recovery via Laser Shock Peening in Mechanically Damaged Aluminium Sheet; Experiments and Prediction Models N. Smyth and P.E. Irving	980
Fatigue Crack Retardation in LSP and Sp Treated Aluminium Specimens E. Hombergsmeier, V. Holzinger and U.C. Heckenberger	986
Laser Shock Peening to Repair, Design and Manufacture Current and Future Aircraft Structures by Residual Stress Engineering D. Furfari	992

XXII. Life Prediction Methodology and Software Development

Fatigue Crack Growth and Coalescence Algorithm Starting from Multiple Surface Cracks J.H.L. Pang and Y.X. Chew	1003
Integrating Fatigue Crack Growth into Reliability Analysis and Computational Materials Design R.C. McClung, M.P. Enright, J.P. Moody, Y.D. Lee and J. McFarland	1009
A New Progressive Curvilinear Strain Energy-Based Crack Growth Modeling Algorithm Using Multicomplex Variable Finite Elements H. Millwater and D. Wagner	1015
Numerical Fatigue Analysis for Twin Roll Cast Magnesium Sheet Metal Structures J. Dallmeier, O. Huber and H. Saage	1021
High Temperature Multiaxial Creep-Fatigue Life Prediction for YH61 Nickel-Base Single Crystal Superalloy W.Z. Wang, M. Sakane, T. Itoh, A. Yoshinari, N. Isobe and N. Matsuda	1027
Anisotropic Life Prediction for Single Crystal Nickel-Base Flat Plate with a Hole C.L. Dong, H.C. Yu and Y. Li	1033

XXIII. Management of Fatigue and Reliability

Localized Fatigue Failure Analysis of Aluminium Crewboats due to Propeller Pulse Loads: A Case Study T.M. Leacy and R. Ojeda	1041
Bayesian Updating of Aircraft Risk Assessments Using Results of Inspection R.F. Torregosa and W.P. Hu	1047
Structural Integrity – Yesterday – Today – Tomorrow M. Guillaume, A. Uebersax, G. Mandanis and C. Huber	1053
Pseudo Fatigue Testing for Rapid Certification to Service L. Molent, S.A. Barter, M. Gordon and L. Weibler	1059
Practical Application of Structural Repair Fatigue Life Determination on the AP-3C Orion Platform J. Ayling, A. Bowler, G. Brick and M. Ignjatovic	1065
C-130H Centre Wing Lower Surface Tang Blend Repair Management R. Stewart, A. Ng, S. Trezise, P. East and K. Jackson	1071
QinetiQ Aircraft Structural Integrity Experience and Lessons Learnt M. Houston, K. Watters, J. Moews and R. Stewart	1077
Cost Effective Safety from Full System Teardowns R. Boykett	1084

XXIV. Microstructural Aspects

Development of a Probabilistic Model for the Prediction of Fatigue Life in the Very High Cycle Fatigue (VHCF) Range Based on Inclusion Population	
A. Kolyshkin, A. Grigorescu, E. Kaufmann, M. Zimmermann and H.J. Christ	1093
Fatigue Crack Growth in Ultrafine-Grained Copper Obtained by ECAP	
M. Arzaghi, C. Sarrazin-Baudoux and J. Petit	1099
Fatigue Behavior and Life Prediction of an Equiaxed Crystal Nickel-Base Superalloy under Different Dwell Times and Strain Ratios	
H.C. Yu, C.L. Dong and Y. Li	1105
Study of the Effects of Two-Step Ageing Heat Treatment on Fatigue Crack Growth on an AA7050 Aluminum Alloy	
L.O. Ribas Lima, S.C. Jacumasso, C.O.F.T. Ruchert, J.P. Martins and A.L. Moreira Carvalho	1111

XXV. New Materials (MMCs, CMCs, Intermetallics, Hybrid Materials)

Numerical Modeling of Graphene/Polymer Interfacial Behaviour Using Peel Test	
Y.Y. Jia and W.Y. Yan	1119
Fatigue of Ultra-Fine Grained α-Brass	
Y. Nakai, T. Imanaka and D. Shiozawa	1125
Cyclic Deformation of a Modern TiAl Alloy at High Temperatures	
T. Kruml, A. Chlupová and K. Obrtlík	1131

XXVI. Rail Transport

Influence of Short Thermal Cracks on the Material Behaviour of a Railway Wheel Subjected to Repeated Rolling	
S. Caprioli and A. Ekberg	1139
On Constitutive Models for Ratcheting of a High Strength Rail Steel	
C.L. Pun, Q.H. Kan, P.J. Mutton, G.Z. Kang and W.Y. Yan	1146
Fretting Fatigue Testing of Carburized Alloy Steel in Very High Cycle Regime Using an Ultrasonic Torsional Fatigue Testing Machine	
Y. Shimamura, A. Kokubo, H. Ishii, K. Tohgo, T. Fujii, T. Yagasaki and M. Harada	1152
On the Evaluation of the Stress State in Rail Head for Assessing Fatigue Resistance	
C.L. Pun, Q.H. Kan, P.J. Mutton, G.Z. Kang and W.Y. Yan	1157
Fatigue in Railway Components - Understanding vs. Resolution	
J.M. Cookson and P.J. Mutton	1163
Rail Bogie Structural Assurance	
R. Stewart, P. Hayes, S. Trezise, M. Houston, A. Jackson and T. Cooper	1169
Calculation of Critical Crack Size of Repair Welded Rail	
H.K. Jun and J.W. Seo	1175
Fatigue Analysis of the Rail Underhead Radius under High Axle Load Conditions	
S.A. Ranjha, P.J. Mutton and A. Kapoor	1181

XXVII. Reliability Analysis

Probabilistic Damage Tolerance Analysis for General Aviation	
H. Millwater, J.D. Ocampo and A. Castaldo	1191
Material Scatter in Crack Growth Rates of 7075-T7351 under Spectrum Loading	
W.P. Hu, B. Krieg and R.F. Torregosa	1197

XXVIII. Residual Stresses and Fatigue

A Detailed Evaluation of the Effects of Bulk Residual Stress on Fatigue in Aluminum	
D.L. Ball, M.A. James, R.J. Bucci, J.D. Watton, A.T. DeWald, M.R. Hill, C.F. Popelar and R.C. McClung	1205

Fatigue Crack Growth Rate in Laser-Welded Web Core Sandwich Panels - Fatigue Crack Propagation in Welded Base Metal	
A. Cernescu, H. Remes, P. Lehto and J. Romanoff	1212
Repairing and Preserving Bridge and Steel Structure Using an Innovative Crack Arrest Repair System	
L. Reid	1217

XXIX. Structural Health Monitoring and Prognostics

Proposal of an Eigen-Strain Estimation for Determination of Residual Stresses Considering the Influence of Machining	
M. Ogawa	1225
Influence of Cyclic Deformation Induced Phase Transformation on the Fatigue Behavior of the Austenitic Steel X6CrNiNb1810	
A. Sorich, M. Smaga and D. Eifler	1231
Scattering of the Fundamental Symmetric Wave Mode Incident at a Defect on the Blind Side of a Weep Hole in an Isotropic Plate	
B.S. Vien, N. Nadarajah, W.K. Chiu and L.R.F. Rose	1237
Preliminary Study on the Acoustic Emission Wave Velocity on Filament Wound Glass Fiber Reinforced Polymer Pipes and its Correspondence with the Winding Angle	
A. Ortenzi, A. Corvi and A. Virga	1243
Scattering Phenomena of Edge Guided Waves at and around Notches	
N. Nadarajah, B.S. Vien, W.K. Chiu and L.R.F. Rose	1249
Durability of Embedded PZTs in Structural Health Monitoring Systems under Cyclic Loading	
S. Yoo, A.A. Khatibi and E. Kandare	1255
Endurance Testing of a Vibration Energy Harvester for Structural Health Monitoring	
G.A. Hart, S.D. Moss, D.J. Nagle and S.C. Galea	1261
Detection and Monitoring of Fatigue Cracks in Metallic Structures Using Acoustic Emission: Routes to Quantification of Probability of Detection	
D. Gagar, P. Foote and P.E. Irving	1268

XXX. Thermomechanical Fatigue

Material Modelling and Lifetime Prediction of Ni-Base Gas Turbine Blades under TMF Conditions	
S. Gruetzner, B. Fedelich, B. Rehmer and B. Buchholz	1277
Modelling of TMF Crack Initiation in Smooth Single-Crystal Superalloy Specimens	
D. Leidermark, M. Segersäll, J. Moverare and K. Simonsson	1283
Investigation on Fatigue Crack Interaction with Grain Orientation during TMF Tests in Nickel-Base Superalloy	
O.M.D.M. Messé, S. Stekovic, M. Hardy and C.M.F. Rae	1289
Fatigue Crack Thresholds Significantly Affected by Thermo-Mechanical Loading Histories in an Austenitic and a Ferritic Low Alloy Steel	
M. Okazaki, M. Muzvidziwa, R. Iwasaki and N. Kasahara	1295
Crack Growth of a Polycrystalline Nickel Alloy under TMF Loading	
C.J. Pretty, M.T. Whittaker and S.J. Williams	1302
Evaluation of Conventional Al 2024 Fatigue Limit in Fatigue Test Using Thermographic Measurement: Effect of Frequency	
S. Seitzl, J. Klusák, F. Pelayo and A. Canteli	1308
Influence of Extremum Temperatures on TMF of a Ni-Base Superalloy	
M.M. Kirka, S.R. Shinde, P.W. Gravett and R.W. Neu	1314
Influence of the Strain Rate on the Low Cycle Fatigue Life of an Austenitic Stainless Steel with a Ground Surface Finish in Different Environments	
T. Poulain, J. Mendez, G. Hénaff and L. de Baglion	1320

XXXI. Variable Amplitude Loads, Multiaxial and Mixed Mode Fatigue

Specificity of Crack Initiation under Equibiaxial Fatigue: Development of a New Experimental Device

S. Bradaï, C. Gourdin, S. Courtin, J.C. Leroux and C. Gardin 1329

Low Cycle and Multiaxial Fatigue Behavior of Three Al-Mg-Si Alloys

D.F. Laurito-Nascimento, A.M.B. da Silva Antunes, C.A. Reis Pereira Baptista, J.C. Dias and A. Souza 1335

High-Cycle Fatigue Behaviour of Pure Tantalum under Multiaxial and Variable Amplitude Loadings

D. Marechal, N. Saintier, T. Palin-Luc and F. Nadal 1341

Accurate Prediction of Fatigue Life under Random Loading

N. Takeda and T. Naruse 1347

Experiments and Interpretations of some Load Interaction Phenomena in Fatigue Crack Growth Related to Compressive Loading

C. Benz and M. Sander 1353

A New Criterion for Evaluating Multiaxial Fatigue Damage under Multiaxial Random Loading Conditions

V. Anes, L.G. Reis and M. de Freitas 1360

AZ31 Magnesium Alloy Multiaxial LCF Behavior: Theory, Simulation and Experiments

L.G. Reis, V. Anes and M. de Freitas 1366

A Flexible HCF Modeling Framework Leading to a Probabilistic Multiaxial Kitagawa-Takahashi Diagram

D. Bellett, E. Pessard and F. Morel 1372

Fundamental Concepts for Formulating Fatigue Strength Diagrams of Notched Metals

H. Matsuno 1379

Fatigue Failure Life of SS400 Steel under Non-Proportional Loading in High Cycle Region

T. Morishita, S.L. Liu, T. Itoh, M. Sakane, H. Kanayama, M. Sakabe and N. Takeda 1385

Visualization of Multiaxial Stress/Strain State and Evaluation of Failure Life by Developed Analyzing Program under Non-Proportional Loading

S.L. Liu, T. Itoh and N. Fujii 1391

Fatigue Behaviour of Laser Beam Welded Circular Weld Seams under Multi-Axial Loading

M. Zimmermann, J. Bretschneider, G. Kirchhoff, U. Stamm, J. Standfuss and B. Brenner 1397

Notch Effects on Fatigue Behavior of Thermoplastics

S. Mortazavian and A. Fatemi 1403

XXXII. Very-High-Cycle Fatigue

High-Temperature Ultrasonic Fatigue Testing at 1000°C

Y. Furuya, K. Kobayashi, M. Hayakawa, M. Sakamoto, Y. Koizumi and H. Harada 1413

Initiation from Low Cycle Fatigue to Gigacycle Fatigue

C. Bathias and C. Wang 1419

Partition of Cyclic Plasticity in an Austenitic-Ferritic Duplex Stainless Steel and its Significance for Fatigue Crack Initiation under High and Very High Cycle Fatigue Loading Conditions

B. Dönges, M. Söker, A. Giertler, U. Krupp, C.P. Fritzen and H.J. Christ 1424

Influence of Frequency and Testing Technique on the Fatigue Behaviour of Quenched and Tempered Steel in the VHCF-Regime

N. Schneider, B. Pyttel, C. Berger and M. Oechsner 1430

Formation Mechanism of Specific Fracture Surface Region in the Sub-Surface Fracture of Titanium Alloy

H. Oguma and T. Nakamura 1436

XXXIII. Welding, Casting and Other Manufacturing Technologies

Influence of Weld Imperfections on the Fatigue Behaviour of Resistance Spot Welded Advanced High Strength Steels M. Rethmeier	1445
On the Effect of Electrodischarge Drilling on the Fatigue Life of Inconel 718 E. Bassoli, A. Baldini, A. Gatto, A. Strozzi and L. Denti	1451
Fatigue and Fatigue Crack Propagation of Laser Beam-Welded AA2198 Joints and Integral Structures N. Kashaev, S. Chupakhin, J. Enz, V. Ventzke, A. Groth, M. Horstmann and S. Riekehr	1457
Behaviour of Friction Stir Welded Joints Made out of Two Aluminium Alloys under Cyclic Loading Conditions J. Lukács and Á. Meilinger	1463
Reduction in Fatigue Strength of Arc Welded Aluminium 5083-H111 on Immersion in NaCl M. du Toit and K. Mutombo	1469
Influence of Process-Related Defects on the Fatigue Behaviour of Welded Aluminium Joints at Very High Cycles M. Cremer, A. Kolyshkin, M. Zimmermann and H.J. Christ	1476
Effect of Fine-Grained Microstructure Induced by Induction-Heating Fine Particle Peening Treatment on Fatigue Properties of Structural Steel (0.45%C) K. Murai, R. Toyama, J. Komotori, K. Fukazawa, Y. Misaka and K. Kawasaki	1482
Fatigue Behaviour of Friction Stir Welded Steel Joints J. Azevedo, V. Infante, L. Quintino and J. dos Santos	1488
Role of Friction Stir Channel Geometry on the Fatigue Behaviour of AA5083-H111 at 120°C and 200°C C. Vidal and V. Infante	1494
Microstructure and Strain-Based Fatigue Life Approach for High-Performance Welds H. Remes, P. Lehto and J. Romanoff	1500
Comparison of High Cycle Fatigue in 4340 and 300M Steel Welded with Fiber Laser A. de Souza Martins Cardoso, A.J. Abdalla, C.A. Reis Pereira Baptista and M.S.F. de Lima	1507
The Effectiveness of Design Procedures for Fatigue Design of Welds J.W.H. Price	1513
The Effect of Manufacturing Defects on the Fatigue Behaviour of Ti-6Al-4V Specimens Fabricated Using Selective Laser Melting Q.C. Liu, J. Elambasseril, S.J. Sun, M. Leary, M. Brandt and P.K. Sharp	1519
Weld Toe SCF and Stress Distribution Parametric Equations for Tension (Membrane) Loading A.K. Hellier, F.P. Brennan and D.G. Carr	1525

XXXIV. Poster

Effects of Carbon Fibre Geogrid Reinforcement on Propagation of Cracking in Pavement and Augmentation of Flexible Pavement Life A.B. Dizaj, H. Ziari and M.A. Nejhad	1533
Influence of Heat Treatment on Fatigue Resistance of Electron Beam Welded Dissimilar Titanium Alloy Joints S.Q. Wang, J.H. Liu and D.L. Chen	1539
Rolling Contact Fatigue and Wear Behavior of Rail Steel under Dry Rolling-Sliding Contact Condition J.W. Seo, H.K. Jun, S.J. Kwon and D.H. Lee	1545
Groove Angles Influence on Mechanical and Microstructural Properties of P460N Steel in SMAW R.M. Pezeshkian, P. Shayanfar and S. Shafaiepour	1551
Three-Dimensional Porous Carbonate Apatite with Sufficient Mechanical Strength as a Bone Substitute Material T. Nguyen Xuan Thanh, M. Maruta, K. Tsuru, S. Matsuya and K. Ishikawa	1559
Modeling Reliability of Critical Infrastructures with Application to Port Oil Transportation System K. Kołowrocki	1565

Optimizing Reliability of Critical Infrastructures with Application to Port Oil Piping Transportation System J. Soszyńska-Budny	1571
Postponing Crack Nucleation in 2024 Aluminium Alloy by Dynamic Precipitation from the Supersaturated State M. Mahdavi Shahri, R.C. Alderliesten, S. van der Zwaag and H. Schut	1577
Specimens for Simultaneous Mode II, III and II+III Fatigue Crack Propagation: Elasto-Plastic Solution of Crack Tip Stress-Strain Field J. Horníková, P. Šandera, S. Žák and J. Pokluda	1585
Review on the Fatigue of Composite Hybrid Joints Used in Aircraft Structures N. Chowdhury, W.K. Chiu and J. Wang	1591
A Review of Damage Tolerant Design, Certification and Repair in Metals Compared to Composite Materials N. Chowdhury, W.K. Chiu and J. Wang	1597
Low-Cycle Fatigue Behavior of TWIP Steel - Effect of Grain Size C.J. Rüsing, T. Niendorf, A. Frehn and H.J. Maier	1603
Crystal Plasticity Finite Element Simulations of Polycrystalline Aluminium Alloy under Cyclic Loading L. Li, L.M. Shen and G. Proust	1609
Modelling the Effect of Particle Size Distribution in Multiphase Flows with Computational Fluid Dynamics and Physical Erosion Experiments C.Y. Wong, J. Boulanger and G. Short	1615
Cyclic Deformation Behavior of a New N+C Alloying Austenitic Manganese Steel J. Kang, F.C. Zhang, Z.N. Yang and X.Y. Long	1621
Lifetime Improvement of AlSi6Cu4 Cylinder Head Alloy C. Kliemt, F. Wilhelm and J. Hammer	1627
Biaxial Specimen Design for Structures Subjected to Multi-Axial Loads N.T. Chowdhury, W.K. Chiu and J. Wang	1633
A Study on Estimation of S-N Curves for Structural Steels Based on their Static Mechanical Properties K. Mukoyama, K. Hanaki, K. Okada, A. Sakaida, A. Sugeta, I. Nishikawa, A. Ueno and T. Sakai	1639
Crack Growth Study of Dissimilar Steels (Stainless - Structural) Butt and Overlap Welded Unions under Cyclic Load A.L.G. Fuentes and A.V. del Rosario	1645
On the Development of a Prediction Methodology for Crack Growth in Fibre Metal Laminates with MSD Scenario W.D. Wang, R.C. Alderliesten and R. Benedictus	1651
Effects of Long-Time Aging on Fatigue Crack Propagation Behaviors of a Hardworking Ni-Based Superalloy L. Wang, Y. Liu, X. Song, G.H. Xu and G.P. Zhao	1657
Non-Classical Solutions of Critical Rock Behavior M.A. Guzev	1663
Fatigue and Damage Tolerance of Aging Airplane Structures B.G. Nesterenko and G.I. Nesterenko	1669
Finite Element Simulation of Stable Fatigue Crack Growth Using Critical CTOD Determined by Preliminary Finite Element Analysis S.J. Chu and C.H. Liu	1675
Mechanics of Fatigue Crack Propagation in Submicron-Thick Freestanding Copper Films H. Hirakata, T. Kondo, M. Sakihara and K. Minoshima	1681
Fatigue and Damage Tolerance Substantiation Approach for a Regional Jet T. Fukuoka, K. Tsukigase and K. Kumagai	1688
Analysis of the Fatigue Stress on Welded Joints of the U-Rib in an Orthotropic Steel Deck S.N. Hong, J.G. Park, S.K. Park and J.W. Choi	1694
Evaluation of the Serviceability of the Transverse Joint of a Modular Bridge under a Cyclic Load S.N. Hong, S.H. Kim, S.K. Park and J.W. Choi	1699
Effect of Microscopic Structure on High-Cycle Fatigue Behavior in Nano-Components T. Sumigawa, K. Matsumoto and T. Kitamura	1705

Plastic Slip and Early Stage of Fatigue Damage in Polycrystals: Comparison between Experiments and Crystal Plasticity Finite Elements Simulations L. Signor, E. Lacoste, P. Villechaise, T. Ghidossi and S. Courtin	1711
Wavelet-Based Feature Extraction Algorithm for Fatigue Strain Data Associated with the <i>k</i>-Means Clustering Technique T.E. Putra, S. Abdullah, D. Schramm, M.Z. Nuawi and T. Bruckmann	1717
Fatigue Behavior and Surface Sensitivity of Board-Shaped Sample of Powder Metallurgy FGH 96 X.L. Liu, K. Zhao and C.J. Liu	1723
Prediction of Fatigue Crack Growth of Aged Hardening Al-Alloys under Variable Amplitude Loading M. Benachour, B. Zeggai, N. Benachour, M. Benguediab and A. Belmokhtar	1729
Fatigue Behavior of Weld Repaired AISI 4130 Aeronautic Steel Used in Critical Flight Safety Structures M.P. do Nascimento, C.C. Batista, C.P.M. Pereira and H.J.C. Voorwald	1736
Screw Dislocations Emitted from a Blunt Crack in a Piezoelectric Material H.P. Song and C.F. Gao	1742
Measurement and Simulation of Random Vibro-Impact Responses at Brake Guide Pins J.M. Mroueh and H.T. Kang	1749
Fatigue Life Prediction for Caliper Guide Pin under Random Vibrational Loading B.I. Antar and H.T. Kang	1755
Influence of Milling and Abrasive Waterjet Cutting on the Fatigue Behaviour of DP600 Steel Sheet P. Duarte, V. Infante and M. de Freitas	1761
High Cycle Fatigue Behavior and Microstructural Characterization of 6013-T4 Aluminum Alloy Laser Welded Joints R.H.M. de Siqueira, A.C. de Oliveira, R. Riva, A.J. Abdalla, C.A. Reis Pereira Baptista and M.S.F. de Lima	1767
Low Cycle Fatigue Estimation Based on the Critical Distance Stress Theory T. Hattori, M.A. Bin Ab Wahab and M. Yamashita	1773
Peculiarities of Elastic Waves Generated by Fatigue Tensile Fractures S. Turuntaev	1779
Study of Fatigue Crack Growth in Al-Mg-Si Alloys Using a Predictive Model under Positive and Negative Load Ratios S.V.P. Espezua, C.A. Reis Pereira Baptista, A.M.B. da Silva Antunes, V. Pastoukhov and M.A.S. Torres	1785
Numerical Analysis of the Effect of Slip Ratio on the Fatigue Crack Initiation Life in Rolling Contact D.H. Lee, J.W. Seo and S.J. Kwon	1791
Enhancement of Rolling Contact Wear and Fatigue Resistance of Wheel Steel by Laser Dispersed Treatment D.F. Zeng and L.T. Lu	1797
Modelling Fatigue Crack Growth Rates in Aluminium Plates Reinforced by Bonded Fibre-Metal Laminates for Fatigue Life Extension J. Doucet, X. Zhang and P.E. Irving	1803
Effect of Incipient Heat Damage on the Fatigue Properties of Aircraft Composites R. Ong and C.H. Wang	1810
Influence of Secondary Ageing on Fatigue Crack Propagation of the AA7050 Aluminum Alloy S.C. Jacumasso, L.O. Ribas Lima, J.P. Martins and A.L. Moreira Carvalho	1816
