Preface

Committees

Keynote Lecture

The Federation for International Refractories Research and Education (FIRE): Progress and Outcome on Education, Research and Industrial Partnership

M. Rigaud 1

SECTION I – RAW MATERIALS

Exploitation of Ceramic Wastes by Recycling in Alumina-Mullite Refractories

F. Mazzanti, A. Brentari, E. Burresi, A. Coglitore, M. Labanti, S. Martelli, C. Mingazzini, A. Ricci, S. Sangiorgi, M. Scafè and M. Villa 9

Calcium Zirconate as the Secondary Phase of Magnesia Refractories for Cement Rotary Kiln

J. Szczerba 15

SECTION II – TESTING

Standard Testing of Refractories

X. Buttol and J.P. Erauw 21

Characterisation of the Fracture Path in ‘Flexible’ Refractories

H. Harmuth 30

Thermomechanical Characterization of Monolithic Refractory Castables

T. Cutard, N. Donval, A. Mazzoni, C. Michel and F. Nazaret 37

Mechanical Behaviour of MgO-CaZrO₃-Based Refractories for Cement Kilns

C. Baudín, P. Pena, Á. Obregón and J.L. Rodríguez-Galicia 47

Alumina-Mullite Refractories: Prototypal Components Production for Thermal Shock Tests

A. Brentari, M. Labanti, F. Mazzanti, C. Mingazzini, S. Sangiorgi, M. Villa, S. Martelli and D. Olevano 53

Thermal Shock Behavior of Zircon Based Refractories

N. Rendtorff, G. Suárez, Y.L. Bruni, L. Garrido and E.F. Aglietti 59

Laboratory Study of Corrosion of an Alumina Refractory by Molten Potassium Salts

N. Li, L. Hupa, P. Yrjas and M. Hupa 65

SECTION III – MANUFACTURING, SELECTION, DESIGN AND USE

Carbon Containing Castables and More

C.G. Aneziris and S. Dudezig 72

Microtexture Control of Alumina Using Anisotropic Alumina Particles

S. Hashimoto, N. Yoshitaka, H. Hirofumi, H. Sawao and Y. Iwamoto 82

Novel Refractory Development for Synthetic Rutile Manufacture via the Becher Process

N.A. Stone, W. Wright, M. O’Byrne and S. Bow 91

Organic Viscosity Modifiers for Controlling Rheology of Ceramic Slurries Used in the Investment Casting

J. Ferenc-Dominik, H. Matysiak and K.J. Kurzydlowski 102

Sintering Studies on Magnesia-Rich Chromium-Free Spinel-Bonded Basic Refractories

R. Lodha, C. Oprea, T. Troczynski and G. Oprea 108

Analysis and Interpretation of Microstructures after Liquid Oxide Corrosion

J. Poirier 114

Interactions between Superalloys and Mould Materials for Investment Casting of Turbine Blades

F. Valenza, R. Nowak, N. Sobczak, A. Passerone, M. Di Foggia and M.L. Muolo 130

Interaction between the Ceramic CaZrO₃ and the Melt of Titanium Alloys	136
C.H. Li, Y.H. Gao, X.G. Lu, W.Z. Ding, Z.M. Ren and K. Deng	
Novel Magnesia Carbon Slide Gate Refractory Material for Corrosive Steel Application	141
M. Ziemnicki, A. Rezaie, M. Snyder and P. Desai	
The Latest Trends in Refractories Technology for Iron and Steel Production at Nippon Steel Corporation	150
T. Matsui	

SECTION IV – SYSTEM MODELING, SIMULATION AND SELECTION CRITERIA

Thermal Schock Criteria of Refractory Ceramics: Limitations of Conventional Analyses and Some Numerical Approaches to Improve the Prediction of the Resistance to Thermal Schock	160
N. Schmitt	
Simulation of Moulding of Refractory Bricks	167
D. Gruber and H. Harmuth	
Sizing of Refractory Castable Gas-Burner Using Thermomechanical Simulations	173
F. Nazaret, T. Cutard and O. Barrau	
A New Generation of Refractories to Enable Gasifier Fuel Flexibility	179
J.P. Bennett, K.S. Kwong, H. Thomas and R. Krabbe	
Selection Criteria and Tools for Refractory Materials to Be Used in Pulverised Coal Combustion (PCC) Reactors	193
P. Miceli, A. di Donato and U. Martini	
Investigation of Refractory Corrosion of a Gas-Stirred Steel Ladle by Simulation	199
S. Vollmann and H. Harmuth	
Impact of Free Fluor Fluxes on Nozzle Wear Mechanisms	205
E. Brandaleze, E. Benavidez, V. Peirani, L. Santini and C. Gorosurreta
