

# Table of Contents

## Preface

## Chapter 1: Structural Alloys

<b>Tribological Properties of Spark Plasma Sintered Ti48Al48Cr2Nb2 Alloy</b> M.R. Mphahlele, P.A. Olubambi and E. Olevsky	3
<b>A Study on Alloy Characterizations for Long Term Service Based Effects on Materials</b> A. Alduaij and H. Sundaram	11
<b>Effect of Adding Minor Cu Amounts on Stability of Constituent Phases in Al<sub>x</sub>CrFeMnNi High Entropy Alloy Microstructure</b> M. Navazani, S.R. Kada, D. Fabijanic and M.R. Barnett	19

## Chapter 2: Friction Stir Welding of Dissimilar Materials

<b>Friction Stir Welding between Marine Grade Aa 5083 and HSLA Steel</b> M. Sahu and S. Ganguly	29
<b>Microstructure and Mechanical Characteristics of Friction Welded Joint between Alumina and Aluminum Casting Alloy</b> T. Takahashi, S.T. Nguyen and M. Kimura	35

## Chapter 3: Polymers and Composites

<b>Surface Finish Optimization of Vapor Smoothened PLA Fabricated Parts with Microstructural Analysis</b> C.E. Alviar and B.A. Basilia	45
<b>Investigation of the Mechanical Properties of Urethane Dimethacrylate (UDMA) Reinforced with Abaca Cellulose for Vat Photopolymerization (VP)</b> C.A. Dela Cruz, J.A.M. Medenilla and B.A. Basilia	51
<b>TiO<sub>2</sub>- Polyurethane Cocopol Blend Nanocomposites as an Anticorrosion Coating for Mild Steel</b> A.G. Ruda, M.T. Bonilla, K.S.M. Ubas, A.C. Tilendo, D.J.E. Estrada, R. Capangpangan, R.M.T. Cumba, J.P. Labis, N.L.B. Sayson and A.C. Alguno	57

## Chapter 4: Functional Materials

<b>Thermoelectric Properties of Spray Coated n-Type PEDOT:PSS Film</b> C.O. Ugwuoke, A. Abd El-Moneim and M. Ghali	67
<b>Synthesis and Fabrication of Luminescence of CsPbBr<sub>3</sub>/PAN Nanocomposite Fiber</b> T.G. De Yonarosa, A.D. Pramata, F.A. Hutomo and D. Susanti	73

## Chapter 5: Materials Physics and Computational Materials Science

<b>Non-Arrhenius Transport Properties of Glass-Forming Materials in a Wide Temperature Range: A Systematic Study Based on the BSCNF Model</b> M. Ikeda and M. Aniya	83
--	----

## Chapter 6: Wastewater Treatment and Waste Recycling

<b>Evaluation of Recycled Polypropylene (PP) Made from Plastic Cups as Filaments for Additive Manufacturing</b> R.G.P. Abdon, S.F. Barbastro, K.J.C. Francisco and C.J.D. Quicay	91
---	----

<b>Synthesis, Characterization, and Utilization of Water Hyacinth (<i>Eichhornia crassipes</i>) Magnetic Biochar for Nitrate Removal from Simulated Wastewater</b> T.R.L. Panaligan, A.K.S. Lee, C.J. Petareal and J.R. Tadena	97
---	----

## **Chapter 7: Green Building Materials**

<b>Mitigation of Efflorescence and Alkali Leaching in Activated Slag Using Foundry Sand</b> N.T. Sithole	105
<b>Synthesis of Acid-Based Fly Ash Geopolymer with Pure Phosphoric Acid Compare with P-Leachate Activator</b> E. Mkhonto, T. Mashifana and N.T. Sithole	113

## **Chapter 8: Heat and Mass Transfer in Engineering Objects**

<b>Influence of Shape and Bubble Diameter on Marangoni Convection in Gold Nanoparticles</b> J. Fernandes and S. Kang	123
<b>Simulation of the Heat Transfer during the Casting Process by Mirror U-Net Models</b> J.W. Kang, Q.C. Zhao, J.W. Wang, X. Han and Y.H. Yang	129
<b>Investigation of Convective Heat Transfer of a Multi-Story Building and its Effect to the Comfort of Residents in Metro Manila</b> C.D. Eguita and R.G. Tayactac	137
