

# Table of Contents

## Preface

## Chapter 1: Materials for Tribology Applications

<b>Novel Super-Elastic Materials for Advanced Bearing Applications</b> C. Della Corte	1
<b>Tribological Behaviour of Ceramic Hip Replacements</b> E. Ciulli, F. Di Puccio, L. Mattei, S. Battaglia and S. Affatato	10
<b>Carbon Based Coatings for Hermetic Compressor Applications</b> J.D.B. de Mello	21
<b>Effect of Different Form of Carbon Addition on the Wear Behaviour of Copper Based Composites</b> M. Chmielewski, K. Pietrzak, J. Dutkiewicz, W. Piekoszewski and R. Michalczewski	31

## Chapter 2: High and Ultra High Temperature Ceramics

<b>Amorphization, Field Activated Sintering and Superplastic Forming of UHTCs</b> H. Kimura	37
<b>Nonoxide High-Melting Point Compounds as Materials for Extreme Conditions</b> S.S. Ordanyan, S.V. Vikhman, D.D. Nesmelov, D.P. Danilovich and I.B. Pantelev	47
<b>Reaction Bonded Si<sub>3</sub>N<sub>4</sub> (RBSN)/BN Composites for Industrial Applications</b> L. Cavalli	57
<b>Development and Processing of SiAlON Nano-Ceramics by Spark Plasma Sintering</b> A. Hakeem, R.M.A. Khan, M.M. Al-Malki, F. Patel, A.I. Bakare, S. Ali, S. Hampshire and T. Laoui	63
<b>Two-Step Pressureless Sintering of Silicon Carbide-Based Materials</b> G. Magnani, G. Sico and A. Brentari	70
<b>Dispersion of Carbon Nanotubes in Alumina Using a Novel Mixing Technique and Spark Plasma Sintering of the Nanocomposites with Improved Fracture Toughness</b> N. Bakhsh, F.A. Khalid, A. Hakeem and T. Laoui	76
<b>Corrosion of Polymer-Derived Ceramics in Hydrofluoric Acid and Sodium Salts</b> S. Jothi, S. Ravindran and R. Kumar	82
<b>Fracture Mechanics of Y<sub>2</sub>O<sub>3</sub> Ceramics at High Temperatures</b> M. Boniecki, Z. Librant, W. Wesolowski, M. Gizowska, M. Osuchowski, K. Perkowski, I. Witosławska and A. Witek	88
<b>Development of Cordierite Ceramics from Natural Raw Materials</b> M. Rundans, G. Sedmale, I. Sperberga and I. Pundiene	94
<b>First Principles Calculations of Interfaces in Ultra High Temperature Ceramics</b> V. Tomar	100
<b>Influence of B<sub>4</sub>C, SiC and Si<sub>3</sub>N<sub>4</sub> Additions on Microstructures and Selected Properties of Titanium Nitride Matrix Materials Obtained by HPHT Method</b> J. Cyboron, P. Klimczyk, P. Figiel and M. Karolus	109

## Chapter 3: Max Phases

<b>Critical Review of the Oxidation of Cr<sub>2</sub>AlC</b> D.B. Lee	115
<b>Study of the Thermal Stability and Mechanical Characteristics of MAX Phases of Ti-Al-C(N) System and their Solid Solutions</b> T. Prikhna, T. Cabioch, W. Gawalek, O. Ostash, D. Litzkendorf, S. Dub, M. Loshak, V. Sverdun, P. Chartier, T. Basyuk, V. Moshchil, A. Kozyrev, M. Karpets, V. Kovylaev, A. Starostina and D. Turkrvich	123

## Chapter 4: Fiber Composites

<b>Heat-Resistant Inorganic Fibers</b> T. Ishikawa	129
<b>Poly-Siloxane Impregnation and Pyrolysis of Basalt Fibers for the Cost-Effective Production of CFCCs</b> C. Mingazzini, M. Scafè, D. Caretti, D. Nanni, E. Burresti and A. Brentari	139
<b>Multilayered Fiber-Reinforced Oxide Composites Produced by Lamination of Thermoplastic Prepregs</b> P.O. Guglielmi, D. Blaese, M. Hablitzel, G. Nunes, V.R. Lauth, D. Garcia, H.A. Al-Qureshi, D. Hotza and R. Janssen	145
<b>Evaluation of Wearing Properties of Polyamide 66 Containing Glass Wool</b> M. Tsukamoto, Y. Yoshimura, Y. Kuroki, T. Okamoto and M. Takata	151
