

Table of Contents

Preface

Chapter 1: Materials for Tribology Applications

Novel Super-Elastic Materials for Advanced Bearing Applications

C. Della Corte 1

Tribological Behaviour of Ceramic Hip Replacements

E. Ciulli, F. Di Puccio, L. Mattei, S. Battaglia and S. Affatato 10

Carbon Based Coatings for Hermetic Compressor Applications

J.D.B. de Mello 21

Effect of Different Form of Carbon Addition on the Wear Behaviour of Copper Based Composites

M. Chmielewski, K. Pietrzak, J. Dutkiewicz, W. Piekoszewski and R. Michalczewski 31

Chapter 2: High and Ultra High Temperature Ceramics

Amorphization, Field Activated Sintering and Superplastic Forming of UHTCs

H. Kimura 37

Nonoxide High-Melting Point Compounds as Materials for Extreme Conditions

S.S. Ordanyan, S.V. Vikhman, D.D. Nesmelov, D.P. Danilovich and I.B. Panteleev 47

Reaction Bonded Si₃N₄ (RBSN)/BN Composites for Industrial Applications

L. Cavalli 57

Development and Processing of SiAlON Nano-Ceramics by Spark Plasma Sintering

A. Hakeem, R.M.A. Khan, M.M. Al-Malki, F. Patel, A.I. Bakare, S. Ali, S. Hampshire and T. Laoui 63

Two-Step Pressureless Sintering of Silicon Carbide-Based Materials

G. Magnani, G. Sico and A. Brentari 70

Dispersion of Carbon Nanotubes in Alumina Using a Novel Mixing Technique and Spark Plasma Sintering of the Nanocomposites with Improved Fracture Toughness

N. Bakhsh, F.A. Khalid, A. Hakeem and T. Laoui 76

Corrosion of Polymer-Derived Ceramics in Hydrofluoric Acid and Sodium Salts

S. Jothi, S. Ravindran and R. Kumar 82

Fracture Mechanics of Y₂O₃ Ceramics at High Temperatures

M. Boniecki, Z. Librant, W. Wesołowski, M. Gizowska, M. Osuchowski, K. Perkowski, I. Witosławska and A. Witek 88

Development of Cordierite Ceramics from Natural Raw Materials

M. Rundans, G. Sedmale, I. Sperberga and I. Pundiene 94

First Principles Calculations of Interfaces in Ultra High Temperature Ceramics

V. Tomar 100

Influence of B₄C, SiC and Si₃N₄ Additions on Microstructures and Selected Properties of Titanium Nitride Matrix Materials Obtained by HPHT Method

J. Cyboron, P. Klimczyk, P. Figiel and M. Karolus 109

Chapter 3: Max Phases

Critical Review of the Oxidation of Cr₂AlC

D.B. Lee 115

Study of the Thermal Stability and Mechanical Characteristics of MAX Phases of Ti-Al-C(N) System and their Solid Solutions

T. Prikhna, T. Cabioc'h, W. Gawalek, O. Ostash, D. Litzkendorf, S. Dub, M. Loshak, V. Sverdun, P. Chartier, T. Basyuk, V. Moshchil, A. Kozyrev, M. Karpets, V. Kovylaev, A. Starostina and D. Turkrvich 123

Chapter 4: Fiber Composites

Heat-Resistant Inorganic Fibers T. Ishikawa	129
Poly-Siloxane Impregnation and Pyrolysis of Basalt Fibers for the Cost-Effective Production of CFCCs C. Mingazzini, M. Scafè, D. Caretti, D. Nanni, E. Burresi and A. Brentari	139
Multilayered Fiber-Reinforced Oxide Composites Produced by Lamination of Thermoplastic Prepregs P.O. Guglielmi, D. Blaese, M. Hablitzel, G. Nunes, V.R. Lauth, D. Garcia, H.A. Al-Qureshi, D. Hotza and R. Janssen	145
Evaluation of Wearing Properties of Polyamide 66 Containing Glass Wool M. Tsukamoto, Y. Yoshimura, Y. Kuroki, T. Okamoto and M. Takata	151
