Preface

Chapter 1: Electroceramics

Structural and High Frequency Dielectric Properties of Ba(Zr_xTi_{1-x})O₃ Films Prepared by Reactive Magnetron Sputtering Using Metal Targets J.W. Kim, H. Shima, T. Yamamoto, H. Funakubo and K. Nishida	1
The Effects of the Annealing Conditions on the Dielectric Properties of the Sol-Gel Derived MgNb₂O₆ Thin Films Y.D. Ho, K.R. Chen and C.L. Huang	7
Characterization of Nanostructured Phases and Peculiar Phase Transitions in BNBT Lead-Free Piezoceramics L. Pardo, A. Garcia, K. Brebøl, E. Mercadelli and C. Galassi	12
Photoluminescence, Ferroelectric, Dielectric and Piezoelectric Properties of Sol-Gel-Derived Er-Doped KNN-LN Lead-Free Multifunctional Ceramics X. Wu, M. Lin, C.M. Lau and K.W. Kwok	19
Electromechanical Properties and Microstructure of Undoped K_{0.5}Na_{0.5}NbO₃ Ceramics and KNbO₃-NaNbO₃ Crystals M. Bah, F. Giovannelli, F. Schoenstein, G. Feuillard, E. Le Clezio and I. Monot-Laffez	25
How Can Be Realized High Piezoelectricity from Measuring Acoustic Wave Velocities ? T. Ogawa	33
Effect of Isovalent B-Site Doping on Structural and Electrical Properties of Bismuth-Sodium-Titanate K. Reichmann, M. Naderer, J. Albering and F.A. Mautner	43
Effectiveness of Magnetic Sheets in Suppressing Magnetic Leakage in Automobile Wireless Energy Transfer Systems T. Takeo, M. Kawaguchi, T. Ishihara and T. Matsuzaki	51
Metal-Organic Chemical Vapor Deposition of BiFeO₃ Based Multiferroics M.R. Catalano, G.G. Condorelli, R. Lo Nigro and G. Malandrino	57
High Crystalline Cu₂O Thin Films Prepared by Electric Current Heating Using Copper Wire T. Okamoto, K. Yamazaki, Y. Kuroki and M. Takata	66
Modelling of the Oxygen Transport through MIEC Membrane in Transient Stage C. Gazeau, E. Blond, M. Reichmann, P.M. Geffroy, T. Chartier and N. Richet	72
Correlation between Powder Characteristic and Microstructure Development of Y-Doped BaCeO₃ H.E. Araujo and D.P.F. Souza	78
Screen-Printed Ceramic Based MEMS Piezoelectric Cantilever for Harvesting Energy S.L. Kok, A.R. Othman and A. Shaaban	84
The PiezoElectronic Switch: A Path to High Speed, Low Energy Electronics D.M. Newns, G.J. Martyna, B.G. Elmegreen, M. Copel, M.A. Kuroda, P.M. Solomon, T.M. Shaw, A.G. Schrott, X.H. Liu and S. Trolrier-McKinstry	93
Observing the Chiral Charge Ordering Transition in TiSe₂ J. van Wezel	103

Chapter 2: Optical and Photonic Ceramics

Transparent Nano-Glass-Ceramic for Photonic Applications - Distribution of RE-Doping Elements in the Fluoride Nano-Crystals Analysed by XAS and HR-TEM A. de Pablos-Martín, M.J. Pascual and A. Durán	111
Glass-Based Photonic Crystals: From Fabrication to Applications A. Chiappini, A. Chiasera, C. Armellini, A. Carpentiero, A. Lukowiak, M. Mazzola, S. Normani, D. Ristic, S. Valligatla, I. Vasilchenko, S. Varas, G.C. Righini and M. Ferrari	121
Luminescence Intensity Enhancement of Copper Doped Hydronium Alunite Synthesized under Hydrothermal Conditions Using Sulfates Solution Y. Kuroki, T. Hatsuse, T. Okamoto and M. Takata	127

The Investigations on Luminescence Characteristics and Influence of Doping and Co-Doping Different Rare Earth Ions in White Phosphorescence Materials Having Different Luminescent Centers	
E. Karacaoglu, B. Karasu and E. Öztürk	133
Synthesis and Optical Characterization of M-α-Sialon (M=Ca, Ba, Sr) Doped by Europium	
D. Michalik, T. Pawlik, M. Sopicka-Lizer and R. Lisiecki	141
Influence of m and n Parameters of Ca-α-Sialon: Eu Solid Solution on Phosphor's Optical Properties	
T. Pawlik, D. Michalik, M. Sopicka-Lizer and S. Serkowski	149
Persistent Luminescence Cr³⁺ Doped Spinel and Use as Biomarker for <i>In Vivo</i> Imaging	
S.K. Sharma, D. Gourier, B. Viana, T. Maldiney, E. Teston, D. Scherman and C. Richard	157
Femtosecond Laser Processing of Glass Materials for Assembly-Free Fabrication of Photonic Microsensors	
L. Yuan, X.W. Lan, J. Huang and H. Xiao	166
Rare Earth Doped Glasses for Displays and Light Generation	
U. Caldiño, M. Bettinelli, M. Ferrari, E. Pasquini, S. Pelli, A. Speghini and G.C. Righini	174
