

Table of Contents

Preface

Chapter 1: Steel and Pure Metals

Enhancing Cryogenic Strength of Austenitic Stainless Steels through Thermo-Mechanical Controlled Processing and Nitrogen Alloying A. Smith, F. Hoffmann, M.C. Somani, A. Abdelghany and M. Muratori	3
Revealing the Microstructure and Mechanical Properties of Rapidly Quenched and Tempered 51CrV4 Steel Processed Via a Continuous Induction Line A.W. Abdelghany, O. Haiko, A. Järvenpää and A. Kaijalainen	9
Effect of EAF Impurities on Microstructure and Mechanical Properties of Low-Carbon Steels A.J.T. Hoikkaniemi, O. Haiko and A. Kaijalainen	15
Impact of Non-Metallic Inclusions and Grain Structures Modified by Fast Heating Annealing on Tensile Properties of a V-Microalloyed High-Mn TWIP Steel A.S. Hamada, T. Alatarvas, M. Jaskari and A. Järvenpää	21
High-Throughput Computational Screening, Non-Metallic Inclusion Analysis, and Microstructural Characterization of a Novel Medium Manganese Steel M. Elaraby, M. Ali, M. Eissa, J.I. Kömi, H. Tervo, T. Alatarvas, S. Pallaspuuro, E. Ghassemali, J. Steggo and V. Javaheri	27
Special Steels for the Hydrogen Society D. Nguyen, A. Moshiri, H. Tervo, J. Paavola and J.I. Kömi	35
Investigating the Influence of Trace Tantalum on the Microstructure and Mechanical Properties of Niobium Microalloyed Steels F.M. Carvalho, R.M. Lasmar, L.L.O. Goulart, M.S. Siqueira and A.P.V. Braga	42
Impact of Aluminum in Comparison to Silicon on Liquid Metal Embrittlement of 3rd Generation AHSS K.M. Höger, S. Kaar-Schickinger, M. Wallner, R. Schneider, K. Steineder, M. Gruber and C. Sommitsch	48
Evaluating LME Susceptibility in Third-Generation AHSS: The Role of Testing Methodologies and Silicon Concentration K. Steineder, M. Gruber, S. Kaar-Schickinger, M. Wallner, K.M. Höger and R. Schneider	54
Influence of Quenching Medium on Ordered Phases Formation and Vickers Microhardness of Fe-6.5 Wt%Si T. Badaoui, E. Bérard, V. Ji, Y. Ateba Betanda, T. Wackerle and A.L. Helbert	61
Enhancing Fatigue Performance of Additively Manufactured H13 Tool Steel through Surface Finishing Processes A. Hamada, A. Abdelghany, M. Jaskari, H. Hosseinlou, M. Shakeri and A. Järvenpää	67
Influence of Process Parameters Variation on Microstructure and Mechanical Properties of SLM-Printed 316L Stainless Steel M.T. Hauschultz, M.H. Friedo, U. Geissler, A. Böhme and R. Krenz-Baath	75
Optimizing Thermal Cycles in Wire-Arc Additive Manufacturing: Investigating Inter-Pass Time and Use of an External Cooling System A. Rassane, E. Bertrand, D. Gloaguen, G. Bazin, S. Morville and B. Courant	81
Analysis of Generation and Propagation of Fatigue Crack in Oxygen-Free Copper Using Electron Backscattered Diffraction Method H. Yonekura, T. Kobayashi and I. Shohji	88
Automated <i>In Situ</i> Thermomechanical Analysis of Cobalt under EBSD I. Addi, P. Dubos, B. Girault, S. Branchu and D. Gloaguen	95
Dynamic Recovery as a Strengthening Mechanism A.P. Carvalho and R. Figueiredo	101

Chapter 2: Alloys

Thermomechanical Testing and Precipitation Modelling of Al-Mg-Si Alloys for Hot Forming Applications	
O.R. Myhr, A.J. Tomstad, C.D. Marioara, T. Børvik and O. Hopperstad	109
Microstructure Evolution of Twin-Roll Cast and Hot-Rolled WZ73 Alloy during the Finishing Heat-Treatment	
F. Ueberschär, M. Ullmann and U. Prael	115
Anisotropic Mechanical Property-Induced Ductilization (AMID) – A New Mechanism to Simultaneously Improve the Strength and Ductility of Multiphase Alloys	
K. Hagihara, T. Tokunaga, M. Yamasaki and M. Sugita	121
Development of Non-Equimolar CoCrCuFeNi High Entropy Alloys for Aerospace Brazing	
S. Ross, D. Butcher, D. Williams, C. Goddard, P. Cookson, S. Mehraban and N. Lavery	127
Effect of Heat Treatment and Rolling Process on Microstructure and Deformation Behavior in Al-Si Alloy	
T. Tokunaga, R. Hirono, T. Mayama and K. Hagihara	135
Effect of Subgrain Boundary Distributions on Extra-Hardening of SPD-Processed Al-3%Mg Alloy	
T. Morishige, A. Kozaki and T. Tanaka	141
Creep Strength of AlCoCrFeNi High-Entropy Alloy Fabricated by Spark Plasma Sintering	
N. Ohgi, R. Honda, L. He, M. Kawabata, H. Fujiwara and T. Itoh	146
A Unique High-Temperature Deformation Mechanism in a CrMnFeCoNi Alloy	
H. Kawano, S. Onoue, M. Kawabata, H. Fujiwara and K. Ameyama	152
Visualization of Dynamic Deformation Behavior of Al-Mg Alloys Using Electronic Speckle Pattern Interferometry	
Y. Takanezawa, T. Sasaki and S. Yoshida	158
Effect of Zinc Content on the Hitting Sound Characteristics of Brass	
R. Naganuma, T. Kato and M. Furui	164
The Effect of Intensification Pressure on the Microstructure of Non-Heat Treated HPDC AlSi9MnVZr Alloy	
S. Akhtar and S.M. Xiong	170
Microstructural Characterization and Analyses of the Damage in a Ti-Based Alloy by X-Ray Computed Microtomography	
J.D. Moreno-Martinez, E.O. Avila-Davila, I. Monroy-Sanchez, M. Moreno-Rios, N. Cayetano-Castro, V.M. Lopez-Hirata, J.E. Resendiz-Hernandez and J.L. Cuevas-Hernandez	176
Damage Development in Aluminum 2050 Alloy during High-Temperature Loading Studied by Synchrotron Diffraction and Tomography	
G.F.C. Macieira, P. Lhuissier, L. Salvo and H. Fang	183
Microstructure and Young's Modulus of $(\text{TiZr})_{2-x}(\text{NbTaMo})_x$ Bio-High Entropy Alloys	
M. Todai, N. Takahashi, N. Tanaka, D. Tanaka, T. Nagase, A. Matsugaki and T. Nakano	190
Experimental and Numerical Investigation of Mechanical Properties of Laser-Welded Additively Manufactured Inconel 718	
M. Khedr, A. Khosravi, A.W. Abdelghany, A. Järvenpää and A.S. Hamada	196
Cyclic Deformation Mechanisms in a 3D-Printed High-Entropy Alloy	
D. Bajaj, A. Feng, S.J. Qu, D.Y. Li and D.L. Chen	203
<i>In Situ</i> Alloyed Refractory High Entropy Alloy by Laser Powder Bed Fusion	
Y.S. Kim, O. Gokcekaya, R. Ozasa and T. Nakano	208
Low Cycle Fatigue Response of Additive Manufactured Advanced Structural Alloys: Insights into High Performance Alloy Fatigue Life	
N.C. Santhi Srinivas, K. Chattopadhyay, S. Vasu, K.R. Pavan and J. Vishwakarma	214
Comparison of Pd-42Cu-10Ni and Pd-30Cu-29.5Ag-0.5Zn as Probe Material in Interfacial Reaction with Sn	
R. Hashizume, T. Kobayashi, I. Shohji, T. Hoshino, K. Sato, S. Kobayashi and N. Odani	220
Elevated Temperature Mechanical Properties of Harmonic Structure Designed AlCoCrFeNi High Entropy Alloy by MM/SPS Process	
R. Hori, R. Honda, M. Kawabata, T. Kuno, L. He, K. Ameyama, T. Itoh and H. Fujiwara	226
Influence of Hierarchical Structure on Mechanical Properties of Additive Manufactured IN718 Alloys	
K. Yamashita, K. Cho, T. Saito, T. Sasaki, K. Sawaizumi, M. Okugawa, Y. Koizumi, T. Nakano and H.Y. Yasuda	232

Chapter 3: Coatings and Corrosion Behaviour of Structural Metals

Compositionally Complex Refractory Metal Nitride Coatings: The Effects of V, Nb and Ta on their Structure and Mechanical Properties F. Lofaj, L. Kvetková, P. Hviscova, M. Mikula, T. Roch and D. Albov	241
Characterization and Effects of Anodized Aluminum Oxide Film on Additively Manufactured AlSi10Mg Alloy M. Jaskari, A. Abdelghany, T. Rautio, T.T. Nyo, A. Järvenpää and A.S. Hamada	248
Electrochemical Synthesis of Ni-Co-W-Zr(P) Quinary Medium Entropy Alloy for Enhanced Hydrogen Evolution Reaction M. Unni, P. Nageena, S.D. Ramarao, M. Muneeswaran, W. Sha and J. Sudagar	255
Copper-Nickel Alloy Coating on Cast Iron by Cold Spray: Microstructure and Thermal Analysis T. Lauridant, A. Rostom, F. Brisset and F. Bourahima	262
Effects of Changes in Crystal Structure by Plastic Deformation on Corrosion Resistance of Magnesium Alloys R. Hayasaka, S. Yoshihara, R. Mitome, Y. Honma, T. Kishimoto and T. Furushima	269
Effect of Grain Size on the Behavior of Exfoliation Corrosion in Cold-Rolled Mg-14Mass%Li-3Mass%Al Alloy Y. Kawahara and T. Morishige	275
Neutralization of Impurity Elements of Cu and Ni in Mg-Zn Alloy by Dissolution into MgZn₂ Phase K. Uruchida, N. Kadota and T. Morishige	281
Relationship between Maximum Bending Stress and Surface Roughness of AZ31 Magnesium Alloy Fully Corroded in Salt-Water Environment K. Iizuka, T. Kato, K. Yamada and M. Furui	287
Multi-Scale Investigation of Oxygen-Induced Damage in Nickel-Based Superalloy Alloy 718 L. Bähren, C. Baumann, A. Baumann, R. Ghassemizadeh, T. Seifert, D. Urban and U. Krupp	293
Effects of Alloying Elements on Marine Corrosion Resistance of Structural Steel B. Peña, M. Arribas, I. Pérez, A. Urbegain, M. Merchan, J.C. Garcia, R. Elvira and J.T. San Jose	299
Corrosion Fatigue Property of Steel/Aluminum Alloy Weld-Bonded Lap Joint in High Temperature and High Humidity H. Serizawa	306

Chapter 4: Metal Processing

Forming of Multifunctional Corrugated Cup Using Roller Ball Die Y. Harada and S. Okada	315
Experimental Studies and Simulation of TRIP-TWIP Roll Bonding J. Mantel, M. Schmidtchen, M. Seleznev, A. Weidner, H. Biermann and U. Prah	322
Effect of Wire Electrical Discharge Machining on Hole Expansion Ratio of 1 GPa Low Carbon Low Alloyed Steel O. Nousiainen, J. Hannula, J.I. Kömi and A. Kaijalainen	328
In Situ Synchrotron XRD Analysis of Phase Evolution and its Impact on Mechanical Properties in Quenched and Partitioned Medium-Carbon AHSS Z.A. Hafshejani, R.F. Chuproski, S. Ghosh, A. Stark, M. Huttula, S. Urpelainen, J.I. Kömi and V. Javaheri	333
Evaluation of Strain Distribution of Perforated Sheet in Circular Cup Deep Drawing S. Yoshihara, T. Nakagawa, O. Hasegawa and H. Nishimura	339
Effect of Cold-Forming on Mechanical Properties of AHSS Steel T.T. Nyo, L. Autio, J. Tulonen and A. Kaijalainen	345
Finite Element Modeling of Electromagnetic Heating K. Lehtola, J. Ilmola and J. Larkiola	351
Influence of Si and Process Parameters on the Microstructure and Properties of Continuously Annealed Low C-Nb-Ti Strip Steel K.M. Banks, D.R.N. Maubane and M. Netshilema	359

Application of Bi-Modal Milling Process to Fabricate Harmonic Structure Materials S. Suzuki, K. Yagi, M. Kawabata, H. Fujiwara and K. Ameyama	367
Effect of Annealing Process on Microstructures and Mechanical Properties of Cold-Rolled Martensitic Steels for Automotive Structural Parts K.C. Yang, J.F. Tu, T.F. Wu, P.C. Hsieh and P.H. Liu	374
Formulation and Characterization of Stainless Steel-Based Feedstocks for Fused Deposition Modeling: Effects of Binder Composition on Rheology, Printability, Physical, and Mechanical Properties S. Khazaei, R. Boukhili, J. Kostenov, W. Regnaud and E. Martin	380
Laser Surface Hardening of AISI 431 Martensitic Stainless Steel by Using Different Laser Sources O. Aroubi, F. Bourahima, C. Lafarge, R. Ardid and F. Brisset	387
Effect of Intercritical Annealing Temperature to Mechanical Performance of Hot-Rolled Medium Manganese Steel T. Perkiö, P.K. Kantanen and A. Kaijalainen	393
Research on the Microstructural Evolution of Injection Molded AZ91 and Ultralight LAZ561Ca Magnesium Alloys during Solidification and Heat Treatment: Multiscale Characterizations and Multiphase Field Modeling T.C. Su, S.Y. Hu, M.H. Wu, I.A. Chen, L.H. Wu, H.C. Huang and K.Y. Liang	399
Thermomechanical Rolling of Air-Cooled Thick Nb-Ti-V-Ni High Strength Structural Plate D.R.N. Maubane, K.M. Banks and N.T. Luthuli	405
Thermodynamics of Bimetallic Joints between Titanium and Tantalum Produced by Laser Powder Bed Fusion B. Gaskey, R. Montoya, M. Brand, R.A. Bloom and J.S. Carpenter	411
Fabrication and Bonding Properties of Joints Formed by Transient Liquid Phase Diffusion Bonding Using Electroplated Films T. Kobayashi, S. Totsuka and I. Shohji	417

Chapter 5: Welding and Soldering Processes

Effect of Magnesium and Silicon on Temperature and Mechanical Properties in Refill Friction Stir Spot Welding of Aluminum to Titanium L. Malaske, U.F.H. Suhuddin and B. Klusemann	425
Formation Mechanism of Dense and Uniform Structure during Tailor Welding of Aluminum Foam Structure Preform J. Zheng and M.J. Tan	433
Welding Distortion Control in T-Joint Structure of Al-Sheets by Using Pre-Tension J. Song, W. Zhu, X.M. Chen, X.J. Fan, S.C. Luo and H. Nagaumi	441
Microstructural Characterisations of Static Strain Ageing in C-Mn Steel Welds of the Secondary Circuit of Pressurized Water Reactors R. Riverie, V. Massardier, S. Dancette, G. Ben Salem, D. Clement and S. Marie	447
Creep Properties of P92 Pipe Weld after Annealing at 600 and 650°C K. Sówka, H. Purzyńska, A. Zieliński, M. Sroka and K. Kwieciński	454
Application of Electron Beam Welding in the Production of TEMPALLOY AA1 and T92 Butt Joints of Pipes Assigned for the Energy Industry K. Kwiecinski, H. Purzynska, M. Urzysnik, A. Zieliński, K. Sówka and R. Jachym	461
Evolution of Inclusions in Physically Simulated Heat-Affected Zones of a Weld Metal Used with a 500 MPa Offshore Steel H. Tervo, M. Gáspár, J. Kovács, V. Javaheri, J. Sainio, T. Alatarvas, J. Kömi and A. Kaijalainen	468
Effect of Thermal Cycle Profile on Thermal Fatigue Life of Sn-3.0Ag-0.5Cu Solder Joints for Wafer-Level Chip Scale Package S. Sakagami, K. Kawaguchi, T. Kobayashi, I. Shohji, F. Funatomi, K. Ohashi and R. Sakai	475
Degradation Behaviour of Sn-Ag-Cu Lead-Free Solder Joint with Electrolytic Ni Plated Electrode due to Electromigration K. Kawaguchi, M. Oyama, T. Kobayashi, I. Shohji, K. Nakamura, K. Hirasawa and H. Amemiya	482

Chapter 6: Polymers, Composites and Ceramic Materials

Gelation, Vitrification and Shrinkage of Thermoset Polymers - Methods for Investigation and Modelling P.L. Geiß and M. Schumann	491
Microstructural and Morphological Evolution of Novel <i>In Situ</i> Al-15%MgSi-4.5%Si Composite with Strontium Addition M. Kadir and P. Das	497
Fabrication and Thermomechanical Processing of Titanium-Based Laminates for Enhanced Performance under High Dynamic Impact S. Prikhodko, P.E. Markovsky and D.G. Savvakina	504
Phase Field Model of Modification of Microstructure of Al-15Mg₂Si- 4.5Si Composite by Addition of Sr during Semi-Solid Processing I. Mukherjee and P. Das	511
Effect of Oxygen on Phase Evolution in Al-Y₂O₃ Nanocomposites by Mechanical Alloying T. Sakamoto, Y. Jinno and H. Takebe	517
Microstructures and Properties of Diffusion Layer Formed at Laminated Interface of Alumina-Particle Dispersed Magnesium Laminated Compacts Fabricated by MM/SPS Method S. Kawamori, Y. Nagai and H. Fujiwara	523
Mechanical and Thermal Properties of Harmonic Structure Composites with Ti-Ni Alloy and Copper K. Miyauchi, M. Kawabata, T. Kuno, K. Ameyama and H. Fujiwara	529
Structure of Ta₂O₅ containing Phosphate Invert Glasses Prepared by Liquid Phase Method H. Asano, M. Takahashi, A. Obata, M. Sakurai, F. Nagata and S. Lee	535
<i>In-Situ</i> Observation and Quantitative Evaluation of Dendritic Silver Precipitates Growth inside Borosilicate Glass Substrate M. Kono, H. Kawamura, S. Matsusaka, S. Itoh and H. Hidai	541
Investigation of Degradation Behavior of Adhesion between Sealing Resin and Copper by Aging Treatment A. Tozaki, T. Kobayashi, I. Shohji, H. Takenaka, H. Suzuki and M. Ueshima	546
Microstructures and Hardness of WC-Co and WC-HEA Cemented Carbides Additively Manufactured by the Multi-Beam Laser Directed Energy Deposition T. Kunimine, W. Guo, K. Ebihara, Y. Yamashita and S. Yasui	552

Chapter 7: Computational Materials Science and Materials Informatics

Reduced-Order Representations of Crystallographic Texture for Application to Surrogate Models of Material Behaviour M.J. Peel, H. Dorward, S. Safari and M. Mosafavi	559
Simple Flow Rules for Three-Phase Viscoplastic Materials F. Montheillet and D. Piot	565
Modelling Combined Hardening Mechanisms in Alloys through the Analysis of Dislocation Percolation R. Schouwenaars	571
Redesign of Low-Activation Vanadium Alloys Based on Impurity Control for Fusion Reactor Applications T. Nagasaka, T. Sugawara, S. Sakurai, K.I. Fukumoto, Y. Yamauchi, K. Katayama, H. Watanabe and V. Tsisar	578
CALPHAD-Based Modelling of Microstructural Evolution during D.C. Casting and Homogenization of AA3003 Aluminium Alloy F. Tsiolis and S. Papaefthymiou	592
Atomistic Investigation of Stability and Segregation of Alpha-genic and Beta-genic Solute in Hexagonal Titanium A. Amitouche, D. Iabbadin, Y.D. Zhang, J.S. Lecomte and J.M. Raulot	600
Simulation-Driven Insights into Heat Transfer during Copper Mold Casting of Magnesium-Based Bulk Metallic Glasses R.K. Rajendran, A. Vishwanath and R. Shabadi	607
Verification of a Novel Mathematical Model for Determination of the Biomass Specific Growth Rate in Bioprocesses Using Relative Change in Biomass Measurements M. Kraus, A. Böhme and G.V. Rinati	613

Numerical Investigation of the Influence of Residual Stresses after Additive Manufacturing on the Fatigue Crack Propagation in 5xxx Aluminum Alloys D. Pörtl, A. Odermatt, N. Kashaev and B. Klusemann	619
Application of Artificial Neural Networks for Microstructure Models ALFLOW and ALSOFT D.A. Premiger, K. Marthinsen and T. Mánik	626
Sintering Process Analysis of Aluminum Matrix Composites Using Machine Learning K. Sugio, Y. Shinohara, Y. Hayashi and G. Sasaki	632
Testing Theories and Simulations on Phase Coarsening by Experiments K.G. Wang	638

Chapter 8: Materials and Technologies for Mechatronics and Energy Conversion

Thermal, Mechanical, and Materials Aspects of a Shape Memory Alloy Stirling Heat Engine M. Chikhareva and R. Vaidyanathan	647
Optimization of Hydrogen Alarm Sensor on Semiconductor Basis R. Werner, P. Proposito, A. Böhme and R. Krenz-Baath	654
Development of Acoustic Device Using Giant Magnetostrictive Material: Consideration of Acoustic Characteristics of Sound Generated by Wall Surface Vibrations T. Kato, Y. Tanaka, K. Sawada, W. Wu, I. Kobayashi, J. Kuroda, D. Uchino, K. Ogawa, K. Ikeda, A. Endo, H. Kato, T. Narita and M. Furui	660
Accuracy Study on X-Ray Stress Measurement Using Fourier Analysis of Debye-Scherrer Ring S. Ejiri, H. Ohba and T. Sasaki	667
Evaluation of a Low-Cost System for Measuring Thermal Conductivity in 3D-Printed Metallic Structures M.H. Friedo, M.T. Hauschultz, H. Jacobs, C. Kallabis, M. Richetta, A. Böhme and R. Krenz-Baath	674
Extruded Magnesium Sodium Chloride Anodes for Use in Metal-Air Batteries K. Otto, J. Heydrich-Bodensieck, P.H. Kamm and S. Müller	681
Sulfonated Poly(Phenylene Sulfone)s Ionomers J. Kim	688
Assessment of Adhesion Degradation in A1050/Epoxy Resin Interface under High-Humidity and High-Temperature Aging Conditions T. Kobayashi, R. Nakagawa, I. Shohji, F. Funatomi, K. Ohashi and R. Sakai	694
Evaluation of Joining Properties between Potential-Controlled Ni–Cu Alloy Plating Film and Pb-Free Solder T. Kobayashi, S. Mori and I. Shohji	701
Effects of Noble Gas Dilution (Ar, Ne, He) on Hydrogenated Amorphous Carbon Films Deposited by Acetylene-Based PECVD K. Nagamine, K. Ikeda, D. Wakita, K. Kamataki and M. Shiratani	707

Chapter 9: Materials and Technologies for Biomedical Applications

Enhanced Polyp Adhesion on Chemically Modified Titanium Nonwoven Fabric M. Inoue and M. Ueda	717
Synthesis of Inorganic Semiconductor Films with Narrow Bandgap Responsive to Visible LEDs and their Photo-Response M. Ueda and J. Lee	723
Smart Materials - Piezoelectric Polyvinylidene Fluoride (PVDF) Composites for Biomedical Applications F. Zivic, S. Milenkovic, K. Virijevic and N. Grujovic	729
Influence of Thermo-Mechanical Processing Conditions on Phase Transformation Temperatures of Nitinol Annuloplasty Rings M.B. Abrami, M. Tocci, C. Guala, G. Giordano and A. Pola	735

Substrate Tubing Heater Suitable for Large Volume 3D Printing with Extrusion of Thermo-Reversible Hydrogels	
A. Engels, S. Speck, V. Schlegel, H. Jacobs, R. Krenz-Baath and A. Böhme	741
Binder Jetting of Co-Cr-Mo Alloys for Biomedical Applications: A Tribocorrosion Perspective	
M. Moradi, S. Arunkumar, M. Azzi, E. Bitar-Nehme, A. Natarajan, S. Khazaei and E. Martin	747
Design and Mechanical Evaluation of Ti-6Al-4V Reticular Structures for Biomedical Implants	
M.F. Nájera, M. Araya, T. Rautio, T. Guillén and A. Järvenpää	753
<i>In Situ</i> Measurement of Micromotion of Acetabular Cup Subjected to Cyclic Load	
Y. Otsuka, S.G. Juan Pablo and Y. Miyashita	760
Development of a Plasma-Based Process for the Deposition of Adherent Diamond-Like Carbon Coating on Titanium Implants	
C. Audet, P. Chevallier, S. Rubio, L. Houssiau and D. Mantovani	766
Influence of Rolling Strain Path on Microstructure Evolution and Mechanical Properties of Mg-Zn-Ca Alloy for Orthopedic Applications	
D. Aggarwal, V.K. Pakki, K. Chatterjee, S. Suwas and R. Shabadi	774
Development of a Realistic Brain Phantom for Medical Education: An Ethical and Technical Alternative to Animal Testing	
S. Speck, C. Verona, J. Reiff-Stephan, A. Böhme and A.H. Foitzik	781
Structure and Dissolution Behavior of ZnO-Containing Phosphate Invert Glasses Prepared by Liquid Phase Method	
S. Lee, S. Tsuzuki and A. Obata	787
