

Table of Contents

Preface and Scientific Committee

Application of Optical Fiber Sensors for Damage Accumulation Monitoring in Composite Structures

W. Blażejewski, P. Gasior, J. Kaleta and R. Rybczyński 1

Test Stand and Method for Determination of the Usefulness of the Magnetorheological Composites in Active Suspension Systems

M. Bocian, J. Kaleta, D. Lewandowski and M. Przybylski 7

Fatigue Properties of Aluminium Alloys for Uniaxial Cyclic Loads

E. Böhm and T. Łagoda 13

Experimental Analysis of Fatigue Life of Laser Weld Zones

D. Boroński 20

The Investigations of Fatigue Cracking of Laser Welded Joint with the Use of 'FatigueVIEW' System

D. Boroński, R. Sołtysiak, T. Giesko, T. Marciniak, Z. Lutowski and S. Bujnowski 26

Analysis of CDM Model in the Scope of Low-Cycle Fatigue Life Estimation

M. Burak, D. Skibicki and M. Stopel 32

Influence of Pearlite Morphology on Creeping Characteristic Curves of R260 Steel

M. Cieśla, J. Herian and G. Junak 39

Interlaminar Mode II Toughness of Unidirectional CF-Epoxy Laminates Made of out of Autoclave Prepregs

K. Czajkowska, P. Czarnocki and Z. Lorenc 45

Model of Fatigue Damage Accumulation

J. Drewniak and J. Rysiński 51

Damage Size Estimation of the Aircraft Structure with Use of Embedded Sensor Network Generating Elastic Waves

M. Dziendzikowski, K. Dragan, A. Kurnyta, S. Kłysz and A. Leski 57

The Simulation of Void Growth along Curvilinear Crack Front

J. Galkiewicz 63

High Power Actuator Based on Magnetostrictive Composite Core with Temperature Drift Compensation

J. Kaleta, K. Kot, R. Mech and P. Wiewiorksi 69

The Use of Magnetostrictive Cores for the Vibrations Generation and Energy Harvesting from Vibration, in the Selected Frequencies of Work

J. Kaleta, K. Kot, R. Mech and P. Wiewiorksi 75

Investigations of Magnetorheological Elastomers Subjected to Cyclic Loading

J. Kaleta, M. Królewicz, D. Lewandowski and M. Przybylski 81

Magnetovision Method for Determining the Martensite Phase in the Austenite in Cylindrical and Spherical Objects as a Result of the Cyclic Loads

J. Kaleta, R. Mech, M. Rikitatt, P. Wiewiorksi and W. Wisniewski 86

Hertzian Crack Propagation in Ceramic Rolling Elements

W. Karaszewski 92

Specifics Deformation Aluminium Alloy D16 in Conditions Additional Load Impulse

D. Kocańda, V. Hutsaylyuk, M. Czausow, V. Berezin and A. Sobchak 99

Fatigue Behaviour of S235JR Steel after Surface Frictional-Mechanical Treatment in Corrosive Environment

D. Kocańda, J. Mierzyński, S. Mroziński and J. Torzewski 105

Effect of Critical Void Volume Fraction f_v on Results of Ductile Fracture Simulation for S235JR Steel under Multi-Axial Stress States

P.G. Kossakowski and W. Wciślik 113

Application of Fictitious Radius to Fatigue Life Calculations of Bending Notched Specimens

D. Krzyżak, G. Robak and T. Łagoda 119

Effect of Stress Ratio on the Cumulative Value of Energy Dissipation

B. Ligaj 125

Impact of the Strain Rate during Tension Test on 46Cr1 Steel Temperature Change

A. Lipski 133

Improving Fatigue Life of Riveted Joints by Rivet Hole Sizing	141
A. Lipski and Z. Lis	
Energy Fatigue Characteristic of C45 Steel Subjected to Cyclic Bending	147
E. Marcisz, Z. Marciak, D. Rozumek and E. Macha	
About Fatigue Tests End Criterion in Elevated Temperatures	153
S. Mroziński and M. Piotrowski	
Effect of Temperature Changes on the Waveform of Fatigue Damage Accumulation	160
S. Mroziński and M. Piotrowski	
Cleavage Fracture of Ultra-High-Strength Steels. Microscopic Observations. Numerical Analysis. Local Fracture Criterion	168
A. Neimitz, I. Dzioba and U. Janus	
Master Curve of High-Strength Ferritic Steel S960-QC	178
A. Neimitz, I. Dzioba and T. Pala	
Numerical Analysis of the Failure Processes of Plates Made of S 960 QC Steel	184
A. Neimitz and A. Grzegorczyk	
Temperature Influence on σ_0 and n Characteristics in the R-O Relationship for High-Strength Steel	190
R. Pała and J. Galkiewicz	
Influence of the Mean Load Value in Fatigue Block Loading on Strains	195
R. Pawliczek	
Modification of Zenner and Liu Criterion due to Non-Proportionality of Fatigue Load by Means of MCE Approach	201
Ł. Pejkowski and D. Skibicki	
Study on Fatigue Cracks in Steel – Concrete Shear Connectors Composite Dowels MCL	207
S. Rowiński, W. Lorenc and M. Kożuch	
Fatigue Crack Growth in Titanium Alloy after Hardening and Ageing	213
D. Rozumek, M. Hepner and E. Marcisz	
Experimental Verification of Analytical Method for Determining the S-N Curve for Alloy Steel	219
P. Strzelecki and J. Sempruch	
The Issue of Low Cycle Fatigue Scope in the Description of Two-Parameter Fatigue Characteristics	225
G. Szala	
Effect of the Exponent in the Description of Wohler Fatigue Diagram on the Results of Calculations of Fatigue Life	231
G. Szala and B. Ligaj	
Fatigue Properties and Cracking of High Strength Steel S1100QL Welded Joints	237
T. Ślęzak and L. Śnieżek	
Verification of the Fatigue Test Method Applied with the Use of Mini Specimen	243
T. Tomaszewski and J. Sempruch	
The Critical Size of Defect in Polyethylene Pipes because of their Cracking	249
K. Werner and W. Baranowski	
Analysis of P-M Damage Accumulation in Zirconium Dioxide; Testing through Gradually Increasing Load Method	255
M. Wirwicki and T. Topoliński	
Crack Growth Simulation in the Compressor Blade Subjected to Vibration Using Boundary Element Method	261
L. Witek	
Fatigue Investigations of the Compressor Blades with Mechanical Defects	269
L. Witek
